Project Summary and Justification Department Lincoln City Libraries Division

Project 1 Arnold Area Branch Library

The construction of a new school to replace Arnold School provides an opportunity to locate a new branch library at that school site. A new public library is needed because it is an underserved area not easily served from any other library. It is also an area where a tremendous amount of growth is anticipated in the future. The Arnold Heights Branch Library opened June 17, 1973, as a station library operated by volunteers. In January 1975 it was designated as a mini branch library and was staff by library personnel. Today Arnold Heights Branch Library attracts about 7,600 people a year and its children's programs are well attended.

Project 2 Gere Branch Library Parking Lot Resurfacing

The Gere Branch Library parking lot and accompanying drives, approximately 46,000 square feet, were constructed in 1971. In 1986 they were overlaid utilizing 2" of Type III asphalt and petro-mat. In 1993 approximately 16,000 square feet of additional parking area was added as part of the Gere Branch expansion project. In the fall of 1996 potholes began appearing in the surface of the lot. The lot has been adequately maintained through repairs for a period of approximately 8 years. In addition to the resurfacing of the entire lot, structural repairs are required on a minimum of 10% of the lot surface area prior to resurfacing operations.

Project 3 South Branch Library Roof Replacement

The current roof, a loosely laid, ballasted, EPDM membrane system, was installed in 1986 and was warranted for a period of ten years. During the summer of 1998 we began to experience problems with leakage. Multiple repairs were made extending the life of the roof by approximately 5 years.

Project 4 Bennett Martin Public Library Roof Replacement

South Portion Unit #1: This roof is a loosely laid, ballasted, EPDM membrane system. Installation was completed in the fall of 1987 and is covered by a 15 year water-tight warranty. This warranty expired in the fall of 2002.

West Portion Unit #1: The current roof, a loosely laid, ballasted, EPDM membrane roof was installed in 1991 and carried a 10-year 'no leak' warranty. In the spring of 2003 leaks were discovered along the East and North sides of the roof; in addition, significant shrinkage was observed across the field of the roof. During the summer/fall of 2003 extensive repairs were made to the roof to relieve tension caused by shrinkage and to repair leaks. These repairs are expected to extend the useful life of the roof by five (5) years. This project will entail removal of the existing roof membrane and all related components. A new EPDM membrane roof, with a 15-year 'no leak' warranty and all related hardware will be installed.

Project 5 Bethany Branch Library Roof Replacement

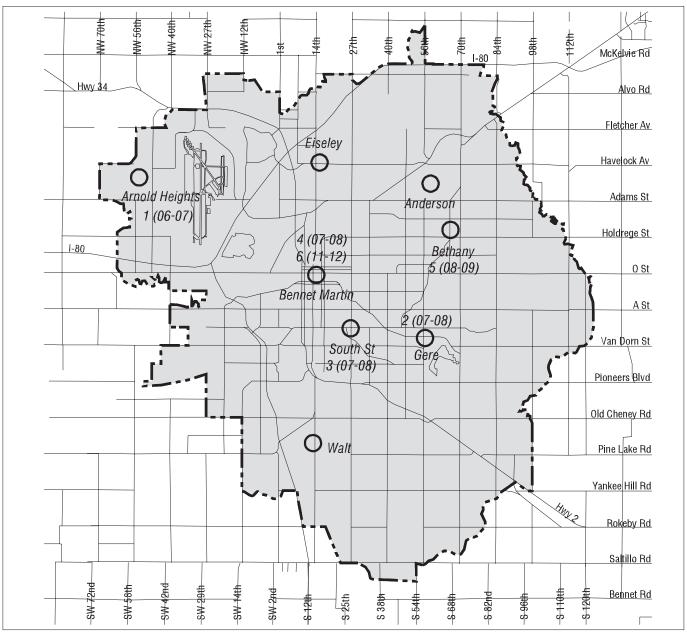

The existing roof is a fully adhered EPDM membrane system. It was installed in 1989 and carries a 15-year watertight warranty. Based on current condition of the roof and past experience, this roof will need to be replaced in 2008-2009.

Division	
the Bennett Man nethor in downto everal years, the 4,000 square fo ennett Martin F grough focus grapuare feet. The reference for the p-to-date facility	Headquarters Library (Bennett Martin Public Library) rtin Public Library has served the City of Lincoln well for over 40 years. It is a cultural own Lincoln and serves the needs of a diverse group of library users. Over the past e role and services provided by public libraries have evolved considerably and the current of building no longer serves a quality community such as Lincoln. During the 2003 Public Library Space Needs & Facility Study, the community provided information oups and one-on-one interviews which results in the need for a facility with 154,489 Library Board of Trustees has designated the full block of the Pershing Center site as its is new facility in order to not only provide quality library services through an efficient, by but also to meet customer demand for parking. The 2005 Downtown Master Plan Lan reflects the preferred relocation of the downtown Library to be the current Pershing
enter site.
