Capital Improvement Program

Introduction

This Capital Improvement Program (CIP) is the City of Lincoln's six year program that plans for significant public improvements across the City. The CIP compiles all City projects to be budgeted in the next two years or planned for over the next six years. The complete CIP represents more than \$1.2 billion worth of investment in our community.

In accordance with Article IX-B, Section 7 of the Lincoln City Charter, City departments and agencies submitted their six year capital improvement requests to the Planning Director for compilation into the CIP document. The Planning Commission reviewed these individual capital requests on May 25, 2016 and determined all projects to be In Conformance with the Comprehensive Plan or Generally Conforms with the Comprehensive Plan. The projects in the FY 2016/17 - 2021/22 CIP are in character with the Comprehensive Plan because they are specifically listed in or are implied by the text in the Comprehensive Plan.

While the City Charter calls for a six year capital improvement program, the City Council only approves a two year Capital Budget. This is not, however, to suggest that the projects in the remaining years of the CIP are not without significance. Projects in the third through sixth year are used by elected officials and staff in the formulation of future CIPs and other departmental level capital programming documents. The private sector also considers the six-year CIP in making investment and development decisions.

The first two years of the CIP were adopted as the two year Capital Budget by the City Council on October 11, 2016.

Capital Improvement Program

Key to Funding Sources and Definitions of Terms

Athletic Fees: This local funding source is generated from a surcharge applied to registration fees for various athletic program activities. Revenues that exceed expenses are used to make specific improvements to athletic fields and facilities.

Advance Acquisition: This funding source provides resources from sources such as property tax, sales tax or special revenues to be used for the acquisition of real estate or right-of-way for public purposes. This funding source may come from local, state or federal funds.

Bridge Replacement: This federal funding source provides resources to assist the City to replace or rehabilitate deficient highway bridges.

Build Nebraska Act Funding: As a result of Nebraska LB 84, 2011, a portion of existing State sales tax funding was directed to transportation projects throughout the State and in Lancaster County and the City of Lincoln. This funding source represents the local share of that funding that is directed to the City of Lincoln.

City Wheel Tax, Residual: This local funding source is generated by a City tax on all vehicles registered within the corporate limits. A portion of the City Wheel Tax is specifically dedicated to only fund the construction, design, and right-of-way acquisition of streets, roads, alleys, public ways, or parts thereof, or for the amortization of bonded indebtedness when created for such purposes.

City Wheel Tax, Residential Rehabilitation Fund: A portion of the City Wheel Tax is specifically dedicated to be used only for the purpose of rehabilitating existing residential streets.

City Wheel Tax, New Construction: This local funding source is generated by a City tax on all vehicles registered within the corporate limits. A portion of the City Wheel Tax is dedicated to fund general street improvements and/or new construction in the City.

Community Development Block Grant (CDBG): This federal funding source is from the City's CDBG Entitlement appropriation and used to fund projects recommended by the Community Development Task Force. Federal guidelines require that a minimum of 70% of these funds be spent on projects and programs that benefit low- and moderate-income persons within the community.

Community Improvement Financing: This local funding source is generated from City approved Redevelopment Projects and provides resources through bonds, generated by tax increment financing, as guided by Community Development Law provided in the Nebraska State Statutes.

Congestion Management Air Quality: This federal funding source provides resources to fund projects and programs in air quality non-attainment and maintenance areas for ozone, carbon monoxide (CO), and small particulate matter (PM-10) which reduce transportation related emissions.

Developer Contribution: This funding source is generated from private development to support specific public projects.

Federal Aid: These funds include any Federal subsidy received in aid of a public undertaking.

Federal National Highway System: Provides federal resources for improvements to roads and related infrastructure that are part of the National Highway System.

Federal Urban Area Projects: This federal funding source is designated for urbanized areas with over 200,000 population and provides resources for a variety of eligible transportation projects.

Golf Capital Improvements: This local funding source is generated from golf course revenues that exceed expenses and used to make golf course improvements.

Golf Surcharge: Fee added to Greens Fee that is designated for capital improvements at all of the City's Municipal courses.

General Obligation Bonds: These bonds are backed by the full faith and credit of the City and require voter approval. The City pays the principal and interest on General Obligation Bonds through a property tax levy.

General Revenues: The general fund provides resources from sources such as property tax and sales tax for general operating functions of City departments. This local funding source represents pay-as-you-go contributions from the general fund for capital projects with or without other funding sources.

Highway Allocation Bonds: These Bonds are payable from a specific source of revenue (State fuel tax, and City Wheel Tax). These funds are designated for projects throughout the City to rehabilitate, construct and improve streets, intersections/ interchanges, sidewalks, bikeways and trails, safety projects, intelligent transportation infrastructure, and landscaping in connection with street improvement projects. These funds are also used in the study, design, acquisition of easements or right-of-way to support public projects.

Highway Allocation Funds: State fuel tax collections allocated to the City via a State funding formula. These funds are designated for projects throughout the City to rehabilitate, construct and improve streets, intersections/ interchanges, sidewalks, bikeways and trails, safety projects, intelligent transportation infrastructure, and landscaping in connection with street improvement projects. These funds are also used in the study, design, acquisition of easements or right-of-way to support public projects.

Impact Fees: This local funding source is dedicated for new infrastructure in the following categories: water, wastewater, parks, and arterial streets. An impact fee charge is levied against new development to generate revenue to support specific public projects. Impact fees are a one-time, up front charge paid by new construction only. The fees can generally be used on public projects within the district that it is collected.

Keno Funds: This local funding source is provided through an agreement between the City and Keno operators within the corporate limits. A percentage of gross receipts from gaming operations are to be used for the purchase, establishment, maintenance or expansion of park and recreational services and library programs and facilities.

Lancaster County: Provided by Lancaster County to support specific projects. This funding source represents pay-as-you-go contributions from general funds for capital projects with or without other funding sources.

Land Sale Proceeds: This local funding source is provided through the sale of City surplus property. The revenues generated are used for specific public projects.

Landfill Revenue: This local funding source is generated from disposal fees levied on commercial refuse haulers and residents. Revenue that exceeds expenses are used to make landfill improvements.

Lease Purchase Financing: Proceeds from a financing agreement in which the City (lessee) purchases a capital item (asset) and agrees to pay rent payments to a lessor over a time period not to exceed the useful life of the asset. The rent payments will include principal and interest and the end of the term of the rent period, the City will own the asset.

Municipal Infrastructure Redevelopment Fund (MIRF): Provided by the State of Nebraska through annual appropriations and must be used for public infrastructure projects.

Other Financing: This revenue refers to sources of funding that are not normally used in the context of the City's CIP program.

Occupation Tax (Solid Waste): This local funding source was implemented in 2003 and levies a tax on the disposal of waste in the municipal landfill to support the City's integrated solid waste management system.

Parks & Recreation Repair and Replacement Fund: Revenue collected from the lease of Parks and Recreation Property for personal wireless facility towers. To be used for repair and replacement of Parks & Recreation facilities.

Revenue Anticipation Notes: A short-term debt security issued on the premise that future revenues will be sufficient to meet repayment obligations.

Revenue Bonds: These Bonds are payable from a specific source of revenue and do not pledge the full faith and credit of the issuer. Revenue Bonds are payable from sources of revenue that do not affect the property tax rate. The City uses revenue bonds for Lincoln Water System, Lincoln Wastewater and Parking Garage public projects. Lincoln Electric System may also use revenue bonds to fund specific projects.

Railroad Transportation Safety District: This local funding source is generated by a county-wide public entity - the Railroad Transportation Safety District, which has taxing authority to levy a property tax. These funds are designated for projects throughout the City and County to eliminate automobile and railroad conflicts.

Service Charges: Income generated by the City's Parking Garages or other services and facilities. Revenues that exceed expenses are used to make specific improvements or construct facilities.

Special Reserves: Existing fund balances which have accumulated in a particular fund and have not been designated for a specific use.

State/Federal Funds: State and Federal funds received in aid of a public undertaking.

State Revenue or Aid: These funds include any State subsidy received in aid of a public undertaking.

State - Train Mile Tax: State tax on rail traffic passing through the City and used for constructing, rehabilitating, relocating or modifying railroad grade separation facilities.

STPP Hazard Elimination: This federal funding source provides resources for safety improvements on any public road for activities including railroad crossings, public transportation facilities and public pedestrian and bicycle pathways, and trails.

Street Drainage Project Funding: This funding source is provided by Watershed Management General Obligation Bonds for street drainage design and/or construction projects at various urban locations to pay for the urban drainage and/or water quality portion of street projects.

Tennis Fees: This local funding source is generated from tennis program activities. Revenues that exceed expenses are used to make specific improvements to tennis facilities.

Tree Assessment: A dedicated citywide special assessment to fund the cost of replacing public street trees systematically as they are removed due to damage, structural deficiency or disease, and to address replacing the current deficit of street trees in the estimated 12,000 "gaps" along public streets. Assessment also used to maintain and preserve existing public street tree infrastructure. Method of assessment per assessable units within city limits.

Transportation Enhancement: This federal funding source provides resources for transportation-related activities that are designed to strengthen the cultural, aesthetic, and environmental aspects of the transportation system.

User Fees: This local funding source is generated from user fee revenues from City services. Revenues that exceed expenses are used to support specific public projects.

Unknown: Generally used when a specific funding source has not yet been identified.

Utility Revenues: This local funding source is from a specific source of revenue. Utility Revenues are from sources of revenue that do not affect the property tax rate. Lincoln Electric System, Lincoln Water System and Lincoln Wastewater use utility revenues for capital improvement projects.

Department Name

Division Names, if applicable (Note: PW&U divisions will all be under one department)

Project Identification - Explanation of headings

Summary of Department Projects - Explanation of selected headings

Group	A category of related programs or projects within a single department or division.
Program	A category of related projects within a single department or division. Subset of "Group"
Budget Outcome	Which of the 8 budget outcomes as identified by the Mayor's "Taking Charge" budget process is addressed by this project?
Budget Goal	Under that particular Outcome, which budget goal is addressed by this project?
Sustainability Category	Three categories which address sustainability efforts
Date Anticipated	The date this facility is anticipated to be in service, if applicable.
Rating	A: Urgent B: Necessary C: Desirable
Status	New: First time this Project appears in CIP
	Continued: Project has appeared previously, future completion date
	Ongoing: Project has appeared previously, no future completion, this project is part of the ongoing mission of the department.
	Delayed: Project has appeared previously and was delayed for one reason or another.
Comp Plan Conformity	Degree to which this project conforms with the current Comprehensive Plan.
Prior Appropriations	Funds were identified in previous Capital Budgets for this project
Six Year Total	Total funds identified for the current 6 year CIP period.
Costs Beyond	Total funds that are planned to be shown in future CIPs (goes forward up to 12 years in the future).
Project Total	Total of the above three amounts - Prior Appropriations, Six Year Total and Costs Beyond.
Funding	This table shows a detailed schedule of the project funding by source of funding and year.
Activity	This table displays the year in which the listed activities are planned to occur.

Lincoln City Libraries

0370 Bethany Branch Library - Roof Replacement

Description:

The existing roof is a flat fully adhered EPDM membrane system, installed in 1989 carrying a 15-year watertight warranty. This has been pushed back on the schedule several times but is now more than 10 years past warranty and needs to be replaced before it fails. No leaks or other problems have developed to date.

0371 Replace Bennett Martin Library

Description:

The Bennett Martin Public Library has served the City of Lincoln well for more than 50 years. It is a cultural anchor in downtown Lincoln and serves the needs of a diverse group of library users. Over the past several years, the role and services provided by public libraries have evolved considerably and the current building no longer serves a quality community such as Lincoln. This project has been included in the CIP for several years. The Main Library Vision and Concept Study completed in 2012 provides an updated estimated cost for such a building and includes structured parking with the concept. Library staff continues to research most-accurate estimated costs; these may be revised as additional information is obtained. The Library Board is on record wanting Block 63 (Pershing Center) as the location for a new central library. Costs are site specific. The Other Financing listed in funding is anticipated to come from fundraising from the Foundation for Lincoln City Libraries.

If the G.O. Bond in Year 2 is not approved then the Bennett Martin Closed Loop Heating/Cooling System and Carpet Replacement projects will be requested in future years.

0840 Upgrading of Branch Libraries

Description:

The libraries of today reflect the shift away from building collections of books and other materials to building human capital, relationships and knowledge networks. This trend in combination with the goals set forth in the library's strategic plan was the basis for the 2015 Facilities Plan adopted by the Library Board on March 17, 2015. We need to improve the spaces that we provide to children by creating areas in all libraries that excite children's imaginations and support effective learning by including developmental play opportunities through furnishings and more permanent installations. A variety of projects will freshen, update, and rearrange the interiors of our facilities for better customer service. Additional square footage would be added to Anderson Branch by expanding to the roof line. Converting to Radio Frequency Identification (RFID) tags would allow items to be processed as a group rather than handling items one-by-one. This greatly improves library efficiency, increases accuracy, and saves time for library customers. RFID requires substantial up-front investment for tags and equipment. Sorters, which check-in and sort materials, would be installed at three of the busiest branch libraries. Smart chutes, which check-in materials immediately when deposited in outside book drops, would be installed at all locations. Additional projects include Anderson Branch HVAC, and Eiseley and Walt Branch Parking Lots. If the G.O. Bond request in Year 2 is not approved then these three projects will be requested in a future year.

**Lincoln
Electric
System**

Lincoln Electric System

0679 G:LES Operations Center

Description:

Continue construction of a second LES operations facility (LOC) at 98th & Rokeby Rd. Upon completion, allocate a portion of existing staff from the Walter A. Canney (WAC) Service Center at 27th & Fairfield to the LOC, and reallocate downtown administrative activities to the LOC and WAC. Identify the placement of a location that will accept customer bill payments. This will provide LES with opportunities to better meet the needs of LES customers by providing an increased level of service reliability, mitigate the risk of having all materials and equipment at one location, and prepare for city growth.

Prior appropriations include actual monies spent in 2015 plus the approved 2016 calendar year budgeted amount.

Also included in appropriations is actual monies spent on the purchase of the property. This was originally 0614 – G: Land – Service Center in 2012/2013 CIP

0795 G:MMR Project

Description:

LES will be transitioning to AMR meters. This will provide for drive-by meter reading.

Funding in 2017/18 are estimated projections as a continuation of the MMR project (phase 2). This phase would be to incorporate enhanced automation targeting the large commercial/industrial customer services.

Exchanging current industrial metering having limited capabilities with technology that will allow for near real-time meter interval data collection and hosted meter data management.

Note: This project was previously shown as part of "Overhead Transformers & Meters" in the 2012/2013 CIP. It was then shown as item 696, O:AMR Meter Conversion in the 2014/2015 CIP.

0638 S:17th & Holdrege Transformer #2

Description:

Add a 115-12kV, 36 MVA transformer and associated switchgear at the existing 17th & Holdrege Substation. This capacity addition will support growth at University of Nebraska (City Campus), research corridor, and the Nebraska Innovation Campus.

Sustainability: Substation transformers are economically evaluated including the life-cycle cost of electrical losses. This allows LES to purchase higher quality transformers with lower electrical losses (lower energy use and reduction of greenhouse gasses) while maintaining lowest overall cost for customers.

0682 S:91st & A Replace Transformer

Description:

This project will replace the existing 115-12kV, 28 MVA transformer (T721) with a new 36 MVA transformer and 12kV switchgear. Transformer T721 was manufactured in 1969, will be 50 years old in 2019 and is one of the oldest 115-12kV transformers in the system. This project acknowledges the need to start replacing older 115-12kV transformers based on the Substation Transformer Replacement Study. It will also provide additional capacity at the 91st & A Substation.

Sustainability: Substation transformers are economically evaluated including the life-cycle cost of electrical losses. This allows LES to purchase higher quality transformers with lower electrical losses (lower energy use and reduction of greenhouse gasses) while maintaining lowest overall cost for customers.

0689 S:29th & Leighton Substation, Add 115-35kV Trfr

Description:

Add a 115-35kV, 56 MVA transformer at the 29th & Leighton Substation. The 115-35kV transformer will absorb load currently served from 115-35kV, 56 MVA transformer (T304) at 2nd & N which was installed in 1964, will be 52 years old in 2016 and has high core and winding losses. A terminal for the transformer will be created by converting the substation to a ring-bus configuration.

Sustainability: Substation transformers are economically evaluated including the life-cycle cost of electrical losses. This allows LES to purchase higher quality transformers with lower electrical losses (lower energy use and reduction of greenhouse gasses) while maintaining lowest overall cost for customers.

0690 S:Wind Project Interconnection

Description:

This project is initiated by the Southwest Power Pool (SPP) generation interconnection process and LES will be reimbursed for all associated project costs. The project adds a 3 terminal 115kV ring-bus switching substation near SW 42nd & West Pella Road connected to L1197. The estimate assumes a location immediately adjacent to the existing transmission line.

The project will happen only if the developer decides to construct the wind farm.

0693 S:20th & Pioneers Substation Replace Transformer

Description:

This project will replace the existing 115-12kV, 28 MVA transformer (T381) with a new 36 MVA transformer and 12kV switchgear. Transformer T381 was manufactured in 1970 and will be 52 years old in 2022. This project acknowledges the need to start replacing older 115-12kV transformers based on the Substation Transformer Replacement Study. It will also provide additional capacity at the 20th & Pioneers Substation.

Sustainability: Substation transformers are economically evaluated including the life-cycle cost of electrical losses. This allows LES to purchase higher quality transformers with lower electrical losses (lower energy use and reduction of greenhouse gasses) while maintaining lowest overall cost for customers.

0078 O:Relocations

Description:

This item provides for the relocation of existing overhead distribution facilities. This item also includes the overhead portion of an overhead-to-underground relocation project. Relocations are generally requested for federal, state, county, or city governmental agencies for road widening, sewer construction, etc. Customers also request relocation work for various projects. An "aid-to-construction", based on non-betterment cost to LES, is usually required for these projects. We anticipate relocating about 3-4 miles of overhead distribution lines annually.

0079 O:Major Circuits

Description:

FEEDERS

This budget item provides for ongoing construction of new 12kV and 35kV feeders (main distribution circuits). Reconductoring of existing overhead feeders for capacity requirements and the installation of 600 amp disconnect switches for sectionalizing are also covered by this project.

Sustainability: Distribution feeder conductors are economically evaluated including the life-cycle cost of electrical losses. This allows LES to install higher capacity lines with lower electrical losses (lower energy use and reduction of greenhouse gasses) while maintaining lowest overall cost for customers.

CAPACITORS

This item provides for the installation of pole-mounted distribution capacitor banks. Capacitors are used for power factor correction on the distribution system. These capacitors provide a more economic operation by reducing unmeasured electric losses in the distribution and transmission system. They also provide needed voltage support at peak load conditions. We plan to install 2 - 1,200 kVAR, radio-controlled, switched overhead capacitor banks per year.

0081 U:Transformers

Description:

Based on projected customer growth, about 50,000 kVA of pad-mounted transformers will be purchased each year to serve new load and to replace existing transformers that are damaged or fail in service. Disposal of PCB-contaminated transformers is included in this project. This item also covers the standard installation charge for the new transformers (per FERC accounting).

Sustainability: All distribution transformers are economically evaluated including the life-cycle cost of electrical losses. This allows LES to purchase higher quality transformers with lower electrical losses (lower energy use and reduction of greenhouse gasses) while maintaining lowest overall cost for customers.

0082 U:Extensions

Description:

RESIDENTIAL EXTENSION: A projected 1,200 new residential customers per year will be served from proposed, new underground primary, secondary or service additions. Also covered by this budget item are about 300 existing customers that request overhead to underground conversions of their electric service or upgrades for increased load.

RESIDENTIAL DEVELOPMENT: This provides primary and secondary extensions to new residential developments and apartment complexes.

COMMERCIAL EXTENSION: About 150 new commercial and industrial customers per year will require new underground primary, secondary or service installations. Other commercial customers will expand their business and will require upgraded service conductors and transformer capacities.

COMMERCIAL DEVELOPMENT: Newly platted commercial and industrial developments, including small shopping centers and offices are covered in this budget item.

0083 U:Rebuilds

Description:

This item provides for replacement of existing underground facilities due to age, deterioration, or other operating problems. This budget item also includes replacing deteriorated overhead facilities with underground, when feasible. The identified projects are general system upgrades that will extend the life of existing underground facilities. LES has about 1,300 circuit miles of underground primary distribution conductor in service. We recognize that some of our underground cable and equipment is approaching the end of its useful life. We anticipate the increased need to replace deteriorating underground cable and obsolete equipment to maintain adequate reliability levels for our customers. Replacement will be done on an "as required" basis. We are also continuing a program to install duct (about 60 miles per year) along existing older cable to facilitate rapid installation in a future failure event.

0085 U:Relocations

Description:

This item provides for the relocation of existing underground distribution facilities. This item also includes the underground portion of an overhead-to-underground relocation project. Relocations are generally requested by federal, state, county, or city governmental agencies for road widening, sewer construction, etc. Other relocation work is requested by customers. An "aid-to-construction", based on non-betterment cost to LES, is usually required for these projects. Typically we will:

- Relocate 3 to 4 miles of existing overhead and underground lines and associated transformers and equipment for road widening projects and customer requests.
- Convert to underground about 1 mile of existing overhead lines and associated transformers and equipment in the discretionary overhead to underground conversion program.

0086 U:Major Circuits

Description:

FEEDER

This project provides for construction of new 12kV and 35kV feeders (main distribution lines) as needed to serve system growth areas. The installation of switchgears on existing feeders is also included in this budget item.

Sustainability: Distribution feeder conductors are economically evaluated including the life-cycle cost of electrical losses. This allows LES to install higher capacity lines with lower electrical losses (lower energy use and reduction of greenhouse gasses) while maintaining lowest overall cost for customers.

PADMOUNT CAPACITORS

This item provides for the installation of padmounted capacitor banks on the underground distribution system. Capacitors are used for power factor correction on the distribution system. These capacitors provide a more economic operation by reducing unmetered electric losses in the distribution and transmission system. They also provide needed voltage support at peak load conditions. We plan to install 2 - 1,200 KVAR, radio-controlled, padmounted capacitor banks per year.

0067 P:Laramie River Station

Description:

This item represents LES' share of anticipated annual capital expenditures for the Laramie River Station. The Laramie River facility consistently ranks among the lowest cost generating stations in the United States. This performance record is a result of efficient and effective design and the continued review and upgrade of facility systems. The Project's facilities are in good condition and in compliance with environmental and other regulatory requirements. However, after over twenty five years of operation the system is beginning to show its age. This fact, coupled with technological advances, is cause for additional investments in the Project. A number of significant plant improvements are scheduled for the 2017 through 2022 time frame, including upgrades which will improve plant efficiency, reliability as well as reduce environmental impacts. The single largest investment will be for new environmental systems to reduce NOx emissions.

0137 P:Walter Scott Energy Center #4

Description:

This item covers ongoing capital investments in LES' newest base load power plant. LES has a 100 MW share of the Walter Scott Energy Center output. WSEC #4 uses a high efficiency, super critical steam boiler design and extensive emissions controls which significantly reduces fuel consumption and air emissions compared to standard coal plant designs.

0156 P:Local Generation Capital Projects

Description:

This Budget item covers a variety of projects at the three local gas fired power plants: Rokeby Station, 8th & J Street Station and the Terry Bundy Generating Station. These plant improvements and upgrades are necessary to maintain the operating reliability as well as environmental and security requirements for these critical assets. Budget estimates are based on historical expenditures.

0157 P:Misc Env.,Safety,Security

Description:

The purpose of this budget item is to provide for unanticipated capital expenditures imposed by regulatory or operational requirements, unplanned equipment upgrades or to address critical safety issues. Based on operating experience in the SPP Integrated Market (IM), the local LES generation assets have reached a new level of required performance and availability. With requirements of the SAP Energy Market it will be critical to maintain these generating units at a high operational level. Changing environmental regulations and permitting mandates often require unanticipated unit modifications. It is also anticipated that site and system security upgrades could be dictated by any number of regulatory agencies (FERC, NERC, Homeland Security Agency, etc.).

0785 P:Rokeby 2 Combustion System Upgrades

Description:

This budget item represents the capital improvements that will be incorporated during Rokeby Unit 2 major inspection/refurbishment process. Improvements include replacing the following combustion system components with upgraded components including: Helmholtz damper volume bottles (for improved combustion control), spring loaded combustion chamber tile carrier and tiles, combustion liner collar and thermal coating, reconfigured combustion nozzles, modified combustor hot gas case panel (addition of cooling air holes and thermal coating) and vane carrier cooling modification. The proposed capital upgrades will improve unit performance and reliability

Capital Improvement Program

FY 2016/17
– 2021/22

Parks & Recreation

Parks & Recreation Department

0659 Jensen Park Development

Description:

As noted in the Comprehensive Plan (LPlan 2040), the future Jensen Park located on the southeast corner of S. 84th Street and Yankee Hill Road is envisioned to be developed as a Community Park. Given its relative large size and location along two arterial streets, the site is being developed as a joint or multi-use campus that includes an LPS middle school and a branch YMCA. Potential park improvements and amenities may include multiple play fields and/or play courts for organized sports, a playground, day use facilities such as picnic shelters and restrooms, multiple walking paths, off-street parking and areas of natural/native landscaping for more passive outdoor recreation. A multi-year phased development of these improvements is envisioned.

0104 ADA Compliance Improvements

Description:

The Americans with Disabilities Act (ADA) requires modifications to many of the existing facilities LPR is responsible for operating to provide improved accessibility to individuals with physical limitations. Current system deficiencies are continuously identified and prioritized as part of LPR's 10-Year Facilities Plan. Priority projects over the next several years will focus on improvements to pool facilities and restroom structures at Woods, Eden, Irving, Belmont, Air Park, Mahoney, Oak Lake and Densmore Parks. It is noted that this priority list is subject to change as immediate repair needs arise during the course of each year.

0105 Backflow Prevention Compliance Program

Description:

Lincoln Water Systems has identified below-grade backflow prevention equipment as a potential hazard to community health. LPR continuously encounters deficiencies in its current water distribution systems and uses funding from this program to make improvements in operation efficiencies, reduce maintenance concerns and comply with City standards. Work to be funded by this program over the next several years will include repair/replacement of the water service and metering at Holmes Lake and Pioneers Parks.

0107 Mech./Elec. Systems and Pool Pumps

Description:

Funding from this project is used for the ongoing repair and replacement of mechanical and electrical systems, including pool pumps/filter systems/controllers, in order to keep LPR facilities in safe and efficient operating conditions for both staff and patrons. These funds are also used to refinish pool basin surfaces and to purchase materials used by LPR's Mechanical Maintenance Section.

0108 Area Lighting

Description:

This program provides funding needed to repair and/or replace existing (aged) electrical service and area lighting located throughout the park system in an attempt to meet current electrical codes and to continue providing safe, comfortable and efficient operation. Priority projects are identified by staff in LPR's 10-Year Facilities Plan but are subject to change as more immediate needs arise during the course of each year. Where feasible/applicable, fixtures are updated with LED lighting.

0111 Tennis Facilities Improvements

Description:

Under the operating/lease agreement with the Friends of Woods Tennis, funds from this program are generated from user fees at the Woods Tennis Center facility and are used for the ongoing maintenance, periodic repairs and any upgrades needed to continue providing safe, operational tennis facilities. Funding is used for resurfacing needs for the outdoor asphalt courts, lighting repairs, fencing/screening improvements and repairs/renovations/replacements of the indoor court enclosures. Woods Tennis is in the planning stages for a replacement structure (permanent building) for the two existing air bubbles and is conducting a capital campaign to raise the funds needed to complete design and construction.

0112 Drainage Channel Stabilization/Erosion Control

Description:

Increased rainfall runoff (storm water) volume/intensity resulting from development and urbanization in and around many of the properties throughout the community LPR is responsible for maintaining has resulted in erosion increasing the depth and width of the drainage channels running through them. This funding is used in tandem with funding from Public Works & Utilities - Watershed Management to restore and to stabilize these channels against future degradation and loss of park land.

0585 Communications Towers

Description:

There are multiple communication towers accommodating 18 cell service provider's equipment that are currently located on City-owned property that LPR is responsible for maintaining. Funds from this program will be used to complete any needed repairs to the tower structures as they arise to assure that public safety is not compromised by the presence of these towers at park sites, ballfields and the municipal golf courses.

0587 Prairie in the Parks Seeding Program

Description:

LPR is responsible for maintaining over 6,000 acres of parkland and open space throughout the community. In an attempt to improve environmental stewardship, enhance the community's landscape diversity and to decrease routine O&M expenses, low traffic/passive use parkland, drainage way corridors and open spaces are being converted to more drought tolerant native prairie grasses. This type of landscaping requires less frequent mowing while increasing habitat diversity and stabilizing area soils from erosion associated with extreme weather conditions and storm water runoff. This program is used as a source of matching funds for potential environmental grant opportunities and to purchase seed/establishment materials in a continued effort to develop Prairie in the Parks areas on City-wide basis.

0699 Park Acquisition/Demolition/Development Projects

Description:

This project provides funding for various park-related maintenance activities that may include the acquisition of property parcels, demolition of park facilities deemed not feasible for repair or renovation, and development of new/replacement facilities. Projects identified in LPR's 10-Year Facilities Plan includes fence improvements at Schwartzkopf Park, renovation of an existing building (Octagon Bldg.) in Wilderness Park, demolition of the old restroom building in Van Dorn Park, selected demolition/regrading/rehabilitation in Near South Park and funding for the purchase of materials used by LPR's Carpentry/Heavy Equipment Section.

0787 Auld Pavilion Bldg. Renovations

Description:

The Auld Pavilion building located at 1650 Memorial Drive in Antelope Park is a Lincoln icon and hosts community events on nearly a daily basis. Renovation and preservation efforts are needed to ensure the continued safe and desirable use by LPR programs, community activities and rentals. Development of a restoration master plan is currently in progress that includes an inspection to document and verify existing conditions, evaluate and determine programmatic needs for the next 10-15 years, develop restoration/system recommendations and concept design solutions, and construction cost estimates.

0096 Playground Renovations

Description:

LPR is responsible for maintaining 84 playgrounds across the community. Much of the equipment in these playgrounds is in excess of 20 years old which represents the industry standard anticipated life span. Over the years, equipment which does not meet current guidelines for safety and/or ADA accessibility standards has been removed. With this funding, approximately two to four playgrounds will be redeveloped annually utilizing proto typical designs adapted to each individual park site with consideration of maintenance, accessibility and cost efficiency. The Parks & Recreation Advisory Board reviews the sites identified by staff as in need of renovation as part of LPR's 10-Year Facilities Plan and recommends prioritization of phased improvements. The highest priority project sites currently include the playgrounds at the Seacrest, Kahoa, Stuhr, Iron Horse, Highlands, Schwartzkopf, Irvingdale, Rudge, Filbert, Antelope South and Williamsburg Parks. Funds will also be used for play surfacing repairs/replacements at multiple playground locations.

0098 Hard Surfacing

Description:

Hard surfacing funds are regularly used to repair and/or replace concrete/asphalt/rock associated with the existing hiker/biker trails, parking lots, roads, park pathways and play courts. Many such facilities were constructed approximately 20 to 40 years ago and were not designed for the traffic loads they now experience. The community-wide system requires ongoing rehabilitation to provide for continued safe and comfortable usage and to meet ADA accessibility standards. LPR's 10-Year Facilities Plan identifies a large number of repair and replacement projects in all four quadrants of the City and priorities remain subject to change as immediate repair needs arise during the course of each year.

0099 Commuter/Recreation Trails

Description:

An ongoing program to rehabilitate the existing community-wide trail network is essential to maintaining a safe, operational commuter/recreational trail system. The current trail network consists primarily of concrete surfacing with some segments of asphalt and rock, all of which is exposed to extreme weather conditions. In addition, there are portions of older trail segments that do not meet today's ADA accessibility standards. Experience has shown that numerous 'immediate repair needs' will arise during the course of each year and thus the priority list remains subject to change. Each FY, funds from this program are used as matching funds to federal Recreational Trails Program (RTP) grants to complete large-scale repair/ replacement project. Funding from this program is also used to conduct regularly scheduled pedestrian bridge inspections to ensure the structural safety of the bridges and that appropriate inspections and maintenance activities are performed per EO No. 83372.

Projects for potential RTP support over the next several years include conversion of a portion of the Murdock Trail from crushed rock to concrete and renovation of the Billy Wolff Trail from A Street to 48th Street.

0103 Building/Structure Floor Coverings

Description:

LPR estimates that its building facilities include approximately 170,000 square feet of interior floor coverings of various types (i.e., carpet, tile, wood, etc.). The anticipated life span for these floor coverings is 25 years on the average and an ongoing program of repair/replacement is necessary to provide for continued safe, comfortable and appealing use.

Group:	Replace & Repair Parks Facilities
Program:	Building/Structure Floor Coverings

0102 Building/Structure Roofing

Description:

LPR is responsible for maintaining nearly 400,000 square feet of building roof area throughout the community. Funds from this program will be used to repair and/or replace the roofs of existing park and recreation structures, including community centers, support buildings, restroom facilities and shelter structures. These roofs include a multitude of types and composition with an average anticipated life span of 25 years. Where determined feasible, composition roofs and flat roofs will be replaced with pitched metal roofs to reduce ongoing maintenance costs. It is important to note that priority projects for this program will generally develop throughout the year as immediate repair needs arise, but at this time priority projects include the Auld Pavilion, Iron Horse Park Water Tower, Havelock Park Restroom and Bethany Park Picnic Shelter.

0100 Ballfield/Playcourt Lighting

Description:

Recreational lighting associated with ballfields and play courts has an anticipated life span of approximately 30 years. LPR's facilities inventory includes 24 lighted ballfields and 26 lighted play courts. To meet current electrical codes and outdoor lighting standards and to continue providing safe, comfortable and efficient operation, these funds are used to repair and/or replace existing electrical service and lighting components/fixtures located throughout the park system. Where feasible/applicable, fixtures are updated with LED lighting.

0097 Skatepark Renovations

Description:

LPR's facilities inventory currently includes two skateparks located at Peter Pan and Tierra Parks. Both of these facilities consist of modular pieces constructed of various material types. These materials are exposed to extreme elements and are among the most heavily used in the park system. As a result, they require a high level of continuous repair/replacement activity to provide for continued safe and desirable use. This funding is used to repair components as needed and to replace them when repair is no longer feasible.

0134 Park Area Alt. Irrigation Source Development

Description:

The use of potable water supplied by the Lincoln Water System places an economic strain on LPR's operations and maintenance budget. It also can create a significant demand on a limited supply of public drinking water. The installation of individual irrigation wells at various LPR sites will provide more cost-effective and environmentally preferred alternative water sources (i.e., non-potable) for landscape irrigation purposes. Priority sites for well installation currently consist of Antelope Park (Elks Ballfield, Veterans Memorial Garden, Legacy Tree Grove and the public use areas surrounding the Auld Recreation Center and band shelter); Sampson Park (Sherman Field and Midget Football Complex) and Peter Pan Park.

0440 Replacement of the Wilderness Park Bridges

Description:

The continuous hiking trail through Wilderness Park is designated as a National Hiking Trail includes multiple bridges along, or connecting to, the trail. These bridges will need renovation or replacement over time to keep them in safe, operable use. At this time, the priority bridge for replacement is the south/Salttillo pedestrian bridge. Other bridges that will need to be addressed in the future include (1) the arched bridge over Salt Creek just south of Calvert in the Epworth Park area that was removed several years ago, (2) the bridge over an unnamed tributary to Salt Creek near Highway 77 and Rokeby Road, (3) the bridge over the Horizon Tributary just south of the Rock Island corridor, and (4) the bridge accessing the Octagon Bldg. over an old creek channel.

0590 Air Park Recreation Center - Repl. Facility

Description:

The building housing the Air Park Recreation Center is a remnant of the former air base facilities and is in need of significant structural repairs and renovations. It is located on the east side of NW 48th, but serves a youth population that lives primarily on the west side of this major arterial. Given the fact that the building is in a dilapidated condition, generally dysfunctional for its current programming and poorly located for its service area, planning efforts were made with LPS during the design of the new Arnold Heights School to accommodate a future community recreation center attached to the school building that will jointly share gymnasium space. In response to this planning effort, construction of the Arnold Heights School included two adult-sized gyms funded in part by the City (previous LPR-CIP) for joint use as a community recreation facility. This project will provide funding needed to continue the design and construction of additional community recreation center space that will be attached to the new gym, school and library.

0611 Lincoln Cares Program

Description:

Lincoln Cares is a voluntary community donation program that offers customers of the Lincoln Electric System (LES) an opportunity to add one dollar each month to their bill payments to provide funding for LPR facilities and program improvements. The improvement projects selected for Lincoln Cares funding would not otherwise be possible within the constraints of the available City budget. Projects to be funded by the Lincoln Cares Program are determined annually by an Advisory Board. Since the start of the program in 2003, approximately \$50,000 have been applied to 3-5 projects on an annual basis.

0632 Cascade Fountain Rehabilitation

Description:

The Cascade Fountain, dedicated to Nebraska's retired teachers, is located at the intersection of 27th Street and Capitol Parkway in Antelope Park where it has served as a Lincoln icon for many years. As a result of continued operation, aging and weathering, the fountain basin/infrastructure and mechanical systems are in need of significant repairs and rehabilitation to keep the fountain in good working order. Rehabilitation will need to include the concrete basin and surrounding deck, the electrical service/lighting, and the mechanical pumps/piping.

0700 Dog Park/Dog Run

Description:

The community's two existing Dog Runs are located in the northwest (Oak Creek Dog Run) and southeast (Holmes Lake - Rickman's Run) quadrants of Lincoln. These dog runs are among the most consistently used LPR facilities and LPR's 10-Year Facility Plan identifies renovation needs at Rickman's Run and proposes additional dog use facilities to meet community growth/use. In February 2016, the Parks & Recreation Advisory Board endorsed a Dog Use Facilities Master Plan that suggests the development of additional dog runs in Mahoney Park for the northeast quadrant and Peterson Park for the southwest quadrant as well as a downtown facility, perhaps in the South Haymarket District.

0701 Roper Lake Cross Country/Mountain Bike Course

Description:

Pioneers Park currently serves as the community's primary cross country running course. The intense use of the course each fall by area middle/high schools, colleges/universities and running groups and organizations produces fairly significant wear and tear on the park that stresses both the vegetation and park maintenance needs. There has also been requests from various members of the community and interest groups over the last several years for development of a mountain biking course. This project proposes the development of an alternate multipurpose course in the area of the old N. 48th Street Landfill and former Roper Lake on the south side of Salt Creek, north of Superior Street.

0702 Standing Bear Park Renovations

Description:

The existing amenities at Standing Bear Park are aged, weathered and in need of significant rehabilitation/renovation efforts for the continued safe/desirable use as a community park offering multi-use play fields. Given this park's size, topography and its proximity to other complimentary facilities, renovations to the park are envisioned to improve the play field spaces, site circulation and accessibility and vehicular parking.

0788 Trago Park - Additional 22nd Street Parking

Description:

In conjunction with the Antelope Valley project, significant improvements have been made to Trago Park over the last 10 years. A new playground and sprayground have been very well received and served to increase park usage on a routine basis. Additional vehicular parking along the 22nd Street park frontage is desirable to accommodate park patrons.

0114 Street Tree Replacements

Description:

One of the hallmarks of Lincoln's quality of life is its community forest, which is a prominent feature of its landscape. The Street Tree Replacement program provides funding to maintain and preserve the community's existing street tree infrastructure. Funds are used to (a) replace public street trees systematically as they are removed due to damage, structural deficiency or disease, and (b) in-fill the current deficit of street trees in the estimated 12,000 "gaps" generally located in the community's older neighborhoods along public streets. Funding for this program is provided in-part by the 2-for-Trees Program.

0115 Park Landscape

Description:

. One of the hallmarks of Lincoln's quality of life is its community forest, which is a prominent feature of its landscape. The Park Landscape Program is an ongoing landscape planting, development and maintenance program that typically includes the addition of private donations/grants. This program assists in the establishment and preservation of multi-generational stands of trees, shrubs and other landscape vegetation within the park system to assure variety in age and species. Funds are used to replace landscape components lost to the natural aging process, extreme weather events, vandalism and disease.

0095 Wetlands/Open Space Acq., Easements, Restoration

Description:

The Comprehensive Plan discusses the importance of the community to acquire parkland, conserve open space areas and preserve saline/freshwater wetlands, prairies and other natural resources in cooperation with development and population growth. These funds are used for conservation and restoration projects, acquisition of land by title and/or easements, and as 'matching funds' with the Nebraska Environmental Trust and other funding sources/partners per interlocal agreement. Project activities conserve and restore natural resources in the Salt Creek watershed for the purpose of ecological preservation, protection, management and enhancement as well as flood water management.

0433 Neighborhood Park Land Acq. & Dev. - IF Zone 1

Description:

The City's Comprehensive Plan envisions the development of a neighborhood park within each square mile of residential development. Land for neighborhood parks will need to be acquired and development of park sites should coincide with an increase in operational funding for ongoing upkeep and maintenance of the park. It is anticipated that consistent with typical neighborhood park development, improvements may include a playground, hard-surface play court (i.e., half-court basketball court), picnic facilities, connecting sidewalks, seating, open lawn/play field space and landscaping. These neighborhood parks will be located in Impact Fee Zone 1.

0533 Neighborhood Park Land Acq. & Dev. - IF Zone 2

Description:

The City's Comprehensive Plan envisions the development of a neighborhood park within each square mile of residential development. Land for neighborhood parks will need to be acquired and development of park sites should coincide with an increase in operational funding for ongoing upkeep and maintenance of the park. It is anticipated that consistent with typical neighborhood park development, improvements may include a playground, hard-surface play court (i.e., half-court basketball court), picnic facilities, connecting sidewalks, seating, open lawn/play field space and landscaping. These neighborhood parks will be located in Impact Fee Zone 2.

0612 Waterford Development Trail - Zone 4

Description:

This segment of concrete trail will serve the Waterford Development and connect to the overall community-wide trails system to provide additional recreation/commuting opportunities to trail users. Located in Impact Fee Zone 4, the western terminus of the trail will be at the existing trail along 84th Street. The trail will extend east to 106th and Holdrege. A Federal Recreational Trail Program or Transportation Enhancement Grant is anticipated for this project.

0709 RI Trail Bridge (Densmore Park - Wilderness Park)

Description:

The proposed pedestrian trail bridge will serve to extend the Rock Island Trail from the southwestern end of Densmore Park to the Jamaica North Trail. The bridge will span two sets of railroad tracks and provide a vital link between two primary commuter/recreation trails and safe pedestrian access between Densmore Park and Wilderness Park. Per a preliminary design concept completed for cost estimating purposes in 2012, it is envisioned that the bridge will consist of three prefabricated trusses (90'-160'-90').

0140 Golf Course Hard Surfacing

Description:

Each of the municipal golf course has hard surfacing that includes cart paths, sidewalks, parking lots, etc. that are continuously exposed to extreme weather conditions. These hard surfaces require ongoing repair, rehabilitation and replacement to assure that the facilities are maintained in manner that is safe for public use and desirable to golfers. Currently, the priority project for use of these funds is the rehabilitation of the parking lots at the Pioneers and Mahoney Golf Courses; however, it often becomes necessary to revise priorities as more critical repair needs arise.

0141 Golf Course Clubhouse

Description:

In order to serve the large numbers of golfers that visit the municipal golf course clubhouses, funds are needed for both annual repairs and for major maintenance activities to assure the safe, comfortable, attractive and efficient usage of each of the golf course clubhouse facilities. While it is often necessary to revise priorities as repair needs arise, the priority projects for use of these funds includes replacement of the carpeting, HVAC system and drain/grease trap in the Highlands Golf Clubhouse and renovation of the Pioneers Golf Clubhouse.

0142 Golf Course Trees/Landscaping

Description:

One of the hallmarks of Lincoln's quality of life is its community forest, which is a prominent feature of its landscape. An ongoing tree replacement program is needed to maintain multi-generational stands of trees within the municipal golf course system. This program assures variety in age and species throughout each golf course and serves as a source of funds to replace mature trees lost to the natural aging process, sever weather, vandalism and disease.

0588 Golf Course irrigation Systems

Description:

Effective and efficient automated irrigation systems are vital to the daily and long-term operations of the municipal golf courses. Each course must be maintained in a healthy, inviting condition to continue attracting golfers. The existing irrigation systems at each of the courses require continuous maintenance and rehabilitation to assure that they are in working order and these funds are used to support both "in house" work as well as any contractual repair/replacement needs. At this time, the priority projects identified for use of this funding over the next several years include replacement of the south pump station at Holmes Golf Course, complete system replacements at Pioneers and Holmes Courses and eventually the Highlands Course.

0626 Golf Course Infrastructure

Description:

These funds are used to address critical repair/replacement needs related to the infrastructure for each of the municipal golf courses. Given the age and usage of much of the municipal golf course infrastructure, priority projects are continuously evaluated in an attempt to keep each of the golf courses in good working order. Priority projects identified for use of these funds include shoreline wall repairs at Highlands Golf Course and development of forward tees at various courses and renovation of Hole #15 at the Holmes Golf Course.

0582 LF&R Fire Station Modifications and Repairs

Description:

Most of our existing stations need some substantial modifications and/or repairs due to age. The average age of the fire station is 40 years. Limited major maintenance updates have been done to the stations in the recent past. The older facilities need to be updated with major repairs such as windows, roofs, heating/cooling and building structure additions. Fire Station 1, constructed in 1966, is unlike any of our other stations as it serves as our Administration Headquarters and is in need of significant repair. Physical resources for this building are large and numerous with replacement and repair costs estimated to be very substantial. Although they have an ever increasing need for better spaces to accommodate health, safety, and gender issues, stations 1, 2, 3, 4, 5, 6, 8, 9, and 13 will continue to serve portions of the city effectively. This can be accomplished by the addition of a second story or additions at grade level to each of these facilities. With these changes, these structures may be utilized for many years to come

0800 Replace 2 Aerial Ladders

Description:

LF&R has five aerial ladder trucks total. Three aerial ladder trucks are 20 years old. The remaining two aerial ladders trucks are 14 years old and five years old. These are the only vehicles of this type in Lancaster County, including the mutual aid fire departments. This is an area of approximately 839 square miles with a total population of 275,886 residents. LF&R has provided vehicles of this type to large scale incidents within the county when requested by the mutual aid system. Within the region is Omaha, Nebraska, 60 miles east of Lincoln. The City of Omaha, population 424,482, has nine aerial ladder trucks.

0801 New Fire Station 17

Description:

The rapid annexations and expansion of the City of Lincoln have affected emergency response time within the city. Our goal has always been to maintain a rapid response time average of 4 minutes or less to intervene as quickly as possible, minimizing loss of life and property damage, and to perform vital emergency medical services to our citizens. Fire protection, EMS services, and the ISO rating have presented a need to add additional fire stations in areas of the city that have experienced significant growth. Station 17 is proposed to be built at approximately 70th & Rokeby Road and would house one engine and one aerial. This would require 28 FTE to staff; four for each engine and truck, three additional FTE to fill in for leave and one personnel for support staff. This station will meet the needs of the community for all current and proposed growth in this area. As new fire stations are added to the city additional vehicles must be added to the fleet. One additional engine and an aerial.

0802 Replace 6 Pumpers

Description:

LF&R has 17 pumpers. The goal of LF&R is to replace pumpers when they are 10 years old. Currently, the fleet consists of an assortment of vehicles some of which will be more than 14 years old during this CIP period. In order to reduce maintenance costs and assure safety of employees assigned to these vehicles, 12 Pumpers should be replaced following National Replacement Guidelines by 2019. A dedicated annual funding source needs to be identified for annual apparatus replacement.

0805 New Fire Station 18

Description:

The rapid annexations and expansion of the City of Lincoln have affected emergency response time within the city. Our goal has always been to maintain a rapid response time average of 4 minutes or less to intervene as quickly as possible, minimizing loss of life and property damage, and to perform vital emergency medical services to our citizens. Fire protection, EMS services, and the ISO rating have presented a need to add additional fire stations in areas of the city that have experienced significant growth. Station 18 is proposed to be built at approximately 112th and A street and would house one engine, one aerial, and an ambulance. This would require 34 FTE to staff; four for each engine and truck (per shift), two for the ambulance (per shift) and three additional FTE to fill in for leave and one personnel for support staff. This station will meet the needs of the community of all current and proposed growth in this area. As new fire stations are added to the city additional vehicles must be added to the fleet. One additional engine, one aerial, and an ambulance are needed.

0807 Hazmat Response Vehicle

Description:

The current Haz/Mat response vehicle is a 1982 fire Engine chassis that was refurbished in 1995. The vehicle responds to a significant number of spills, and leaks caused by human error or vehicle accidents. In addition the Haz/Mat unit responds to other incidents that involve a wide range of hazardous products and chemicals that exist in our community. Due to the age of the original vehicle chassis, this unit must be replaced.

Police Department

0345 LPD Garage-Maintenance&Repair Facility;Ph II-V

Description:

Phase Two: Land Acquisition - If additional land acquisition becomes necessary to complete this project, it is anticipated this would occur during the fiscal year immediately following the development of the Master Plan.

Due to rising land values and the changing landscape near the existing facility, it maybe prudent to Acquire, exchange, or possibly enter into an Option-To-Purchase agreement with landowners or desirable land parcels.

Phase Three: The design process should include, but is not limited to:

- Site Plans
- Floor Plans
- Building Elevations
- Infrastructure Plans/Design
- Equipment Specifications
- Equipment Layout/Design
- Parking Specifications
- Parking Layout/Design
- Fueling Specifications
- Fueling Layout/Design
- Environmental Impact/Mediation

Group:	(None)
Program:	(None)
Budget Outcome:	Safety & Security
Budget Goal:	
Date Anticipated:	
Rating:	A
Status:	Continued
Comp Plan Conformity:	Generally Conforms with Plan

The design process is estimated to take between 8-10 months. The fees for this portion of the project are estimated between 8-10% of the total package costs. Therefore, it is estimated that this portion of the project would cost between \$480,000-600,000 based on a \$6,000,000 project.

Note: Funding for this Phase of the project would likely come from General Fund sources within the Police Department's operating budget or from Internal Service Funds within the Garage budget.

0726 Broadband Infrastructure Program

Description:

Dedicated funding for an upgrade (mulimode replacement) and expansion (new conduit) program in support of the Lincoln Technology Improvement System. The ongoing program will help implement a coordinated system of broadband infrastructure designed for use by public and private broadband service providers. Examples of broadband infrastructure projects to be funded by this program include new and updated backbone conduit, innerduct, manholes, handholes, fiber optic cables and other system equipment. The reason for zero funding for Year 1 is carry-over dollars are available from 2015/2016 funding.

Locations for 2016/17 may include: Pinnacle Bank to Military Tower. 48th & O to Health Dept., Military Tower to MSC, 27th & Holdrege to Water, S. 48th Normal to Calvert, 84th & Leighton to 48th & O, 84th & O to Pioneers

Locations for 2017/18 may include: 70th & Pioneers to Glynoaks, AV & N to 25th & N, 48th & Vine to 56th, 70th & Adams to 82nd, W. O St & Sun Valley to NW 48th, 9th St from H to South, 48th St from Adams to Franklin

0252 Leachate Management Facilities-Bluff Road Landfill

Description:

The project includes updating an existing leachate management report, and the design and construction of enhanced leachate management facilities. Updating historical information and revising predictions of future leachate generation quantities will allow for an assessment of current and future leachate management strategies. The leachate may at sometime in the future require on-site pre-treatment, particularly if piped to the wastewater collection system or trucked off-site to the wastewater treatment facilities. Future leachate management strategies may include: increasing on-site storage capacity, piping to wastewater collection system, or installing permanent infrastructure to allow for recirculation back into the landfill during all weather conditions. The project also includes installation of standby power to ensure the leachate system, as well as the ground water pumping system and the landfill gas system can be operational during power outages.

Group:	MSW Landfill
Program:	(None)
Budget Outcome:	Environmental Quality
Budget Goal:	Effectively manage wastewater and solid waste

0254 Permitting-Bluff Road Landfill

Description:

Nebraska Department of Environmental Quality regulations require the renewal of the Operating Permit for the Bluff Road Landfill every five years. The project provides for the engineering, environmental and operational review of the facility and the preparation of the required documents for a permit renewal application. The current Operating Permit will expire in May 2018. The NDEQ requires the permit application to be submitted approximately nine months prior to the expiration date of the existing permit, and requests topographical information to be no more than one year old at the date of permit renewal. The project also includes the efforts necessary to characterize the hydrology and geology of the property to the east of the existing landfill in order to permit additional disposal capacity. The amount budgeted in FY 2020-2021 would provide for the next five year renewal application.

0256 Facility Improvements-Bluff Road Landfill

Description:

The project ensures compliance with applicable State and Federal regulations when unanticipated events occur, provides for aesthetic improvements necessary for operating in close proximity to the community and provides for the enhancements and improvements to existing infrastructure such as buildings, roadways, and utilities. Other activities include semi-permanent litter fence construction, surface water drainage improvements, installation and abandonment of ground water and landfill gas monitoring wells, temporary and permanent seeding, tree plantings, and surveillance (camera) and security (fence) system upgrades.

The project provides on-going funding for improvements of the nearly two mile concrete access roadway, anticipated to be select panel replacement and crack sealing. Nearly one-half of the total roadway length is more than 25 years old.

A truck/wheel wash is also included in this project to address potential regulatory issues under the air quality permits, as well as potential issues related to dragging mud onto Bluff Road and Highway 77.

Construction of a non-potable water storage tank to establish fire-fighting capabilities and provide water supply for pressurized cleaning of leachate and landfill gas system equipment is included in this project.

Project Total: \$4,180.00

Prior Appropriations \$2,510.00

Costs Beyond: \$0.00

0646 Screening/Litter Control-Bluff Road Landfill

Description:

A requirement exists in regulation to provide adequate screening of the landfilling operation from passing traffic on Interstate 80 and the off/on ramps to Highway 77. It is also critical to have adequate permanent litter fencing in place to capture blowing litter from northerly winds to prevent the material from reaching the Interstate corridor. Screening of the operations from the passing traffic is expected to require tree plantings, an earthen screening berm, installation of a tall fence, or a combination of several screening strategies. Planted trees will need to reach significant heights before waste placement begins in the southernmost waste cell.

0850 Engineering Support - MSW Landfill Program

Description:

General support related to the existing waste disposal facility on Bluff Road and associated infrastructure, including but not limited to the buildings, roadways, and water, wastewater, electrical, lighting, and security (fencing) and surveillance (camera) systems. The project may also be used to provide surveying, material testing, and calibration services, as well as study/evaluation for optimization, capacity determination and safety reasons. Automation and controls support for the leachate management system, the landfill gas management system, and the groundwater pumping system and water supply system is considered in this project.

0263 Closure/End Use of North 48th Street Landfill

Description:

Nebraska Department of Environmental Quality regulations require specific actions to prevent future or mitigate existing impacts to ground water and surface water. The request for funding anticipates corrective actions will be necessary to address environmental impacts from wastes landfilled from the 1950's through the 1980's. The corrective actions relate to minimizing the impacts to the groundwater and surface water, and to preventing the migration of landfill gas beyond the property boundary. The project also provides for the purchase, placement and grading of additional cover soil, installation of structures to convey surface water away from the previously landfilled wastes, and the vegetation of areas on the closed landfill on a planned, phased basis. On-going improvements to existing stormwater conveyance systems, such as constructed ditches, culverts, and letdown structures are periodically necessary. The project also recognizes the opportunities available to use the property for passive recreational activities, and provides funding for establishing uses that are determined jointly with the Parks and Recreation Department.

0272 Permitting-Construction/Demolition Waste Landfill

Description:

Nebraska Department of Environmental Quality regulations require the renewal of the Operating Permit for the North 48th Street Construction and Demolition Waste Landfill every five years. The project provides for the engineering, environmental and operational review of the facility and the preparation of the required documents for a permit renewal application. The current Operating Permit will expire in July 2018. The permit application is to be submitted approximately nine months prior to the expiration date of the existing permit, and requires topographical information to be no more than one year old at the date of permit renewal. The project also includes the efforts necessary to permit additional disposal capacity for disposal of construction and demolition wastes. The amount requested in FY 2020-2021 would provide for the next five year renewal application.

0273 Air Emission Testing-North 48th Street Landfill

Description:

Site specific testing of emissions from the landfill is required every five years by Clean Air Act regulations. The North 48th Street Landfill is issued a Permit to Operate an Air Contaminant Source (Title V) by the Lincoln-Lancaster County Health Department.

0275 Recycling Drop-Off Sites - Improvements

Description:

Improvements to existing drop-off sites are critical to the operation of the sites. An aesthetically landscaped drop-off site creates a greater acceptance of the program by the site users and from nearby businesses and residential property owners. The project typically provides for asphalt or concrete surfacing, fence/sign installation, and landscaping.

0277 Compost Site-Improvements & Enhancements

Description:

The amount budgeted allows for permitting of the operation under Nebraska Department of Environmental Quality regulations. Permitting would be required if additional waste diversion efforts related to organic materials other than yard waste are considered. On-going improvements to the asphalt surface for the receiving and processing areas, as well as on-going improvements to the storm water detention basins used to manage surface water run-off are considered in this project. Other improvements may include the construction of a water well for fire protection and to establish a near-by water supply for maintaining adequate moisture levels in the compost materials to avoid odor issues, additional site security fencing and soil placement, grading and surfacing to expand finished material storage and load-out areas.

0593 Transfer Station & HHW/CESQG Collection

Description:

Funding will provide for improvements to existing infrastructure, including buildings and water, wastewater, electrical and lighting systems, roadways, security (fences) and surveillance (camera) systems. Building improvements may include the improving employee work spaces as well as replacing pedestal boom, walking floor, hydraulic system, fire protection system, and building fans. Additionally, replacement of failed building heating, air conditioning and ventilating systems are considered under this project. Also included in this project is a household hazardous waste / conditionally exempt small quantity generator collection facility. Grant funds will be pursued to assist in funding the construction of a facility.

0773 Solid Waste Management Plan/Updates-Implementation

Description:

The recommendations from the Solid Waste Management Plan Advisory Committee include a periodic review and update of the Plan. It is intended these updates generally coincide with the updates of the Comprehensive Plan (LPlan 2040). The LPlan 2040 was adopted in October 2011 after a two-year planning process. The project also includes funding to advance select recommendations from the Solid Waste Management Plan Advisory Committee. The Advisory Committee finalized recommendations in December 2013.

0776 Final Cover-Construction/Demolition Waste Landfill

Description:

The purchase and placement of soil is necessary for final cover construction at the North 48th Street Construction and Demolition Waste Landfill. The final cover must be designed and constructed in accordance with Nebraska Department of Environmental Quality regulations. The final cover is constructed and vegetated as areas of the landfill reach capacity.

0851 Engineering Support - Solid Waste Programs

Description:

General support related to the physical facilities at Bluff Road and North 48th Street, and specifically the non-MSW Landfill programs, such as the closed North 48th Street Landfill, the Landfill Gas Collection and Control System/Treatment System, the Transfer Station and ancillary operations, the Construction & Demolition Waste Landfill, the Composting operation, and the Recycling program. Activities may include engineering related to buildings, roadways, and water, wastewater, electrical, lighting and security (fencing) and surveillance (camera) systems. The project may also be used to provide surveying, material testing and calibration services, as well as study/evaluation for optimization, capacity determination, and safety reasons.

0852 Gas System Expansion and Improvements

Description:

The well field and process equipment associated with the landfill gas system require constant expansion and improvements in order to ensure regulatory requirements are met and the system is optimized for the production of electrical energy. Emissions from the landfill are regulated under the EPA Clean Air Act. The system is no longer an optional capital investment.

Included are the following types of activities:

--- extension and installation of vertical wells, horizontal pipe collectors and laterals connecting such to the gas header pipe, replacement of well heads, alignment changes and raising the elevation of sagging lateral pipes, and including also moving lateral pipes above the plastic component of the cap system during final cover construction

---process equipment improvements, replacement of components upon failure, software upgrades and controls engineering, and calibration of meters and gas analyzers

--- periodic updates and revisions to gas system master plan, gas generation estimates, operation, maintenance and monitoring plan, and piping and instrumentation diagrams

--- physical improvements to ensure the safety of employees and protect the process equipment, such as extending the building enclosure, installing a mechanical means for removing heavy components of the system for repair, replacement, servicing, or testing, and creating indoor storage for tools, cleaning equipment, and spare parts inventory

0118 Computer Hardware / Software

Description:

Funds are proposed in FY 2016/17, FY2017/18, and FY 2018/19 for continued routine upgrade/replacement of StarTran computer hardware and software. Such funding will afford the opportunity for maintaining effective computer services for StarTran administration, operators, and maintenance functions. Staff training courses utilizing computerized programs are integrated as part of the continuing StarTran training program. Funding in FY16-17 is to purchase computer hardware and software for handivan and fixed route scheduling software. FY17-18 and FY18-19 is to purchase replacement AVL equipment for all vehicles over a two year period.

0122 Transit Enhancements (Required by FTA)

Description:

Effective FY 2004-05, one percent of the FTA allocation to StarTran is required by FTA to fund transit enhancements. Such enhancements, in general, include bus shelters, signage, pedestrian, bicycle related equipment and landscaping. The priority of these funds will be directed towards 1) replacement or improvements of shelters at major boarding locations and 2) costs to implement designated bus stops(new signage, benches and shelters). Because of limited funds for transit enhancements, funding these projects will be phased over a period until projects are completed

0123 Security Enhancements (required by FTA)

Description:

Effective FY 2004-05, one percent of the FTA allocation to StarTran is required by FTA to fund security enhancements. Such enhancements, in general, include increased facility lighting, camera surveillance, and facility access. The priority of these funds will be directed towards 1) StarTran facility exterior security enhancements and 2) bus shelter lighting improvements. Facility security enhancements will be implemented based upon a comprehensive analysis conducted in 2013.

0124 Purchase Supervisor Vehicle

Description:

Funds are proposed in FY 2017-18 and 2018-19 to purchase two replacement vehicles used as supervisor vehicles. The vehicles to be replaced are a 2009 Equinox and a 2006 Van. Analyses are conducted evaluating the vehicle conditions and which will justify the need to replace the two subject vehicles. The SUV supervisor vehicles are meeting the unique needs of StarTran supervisors, transporting supplies and schedules, carrying patrons as necessary, and driving in inclement weather. Due to limited federal and local funds, replacement vehicles will be the lower life cycle cost of either gasoline or hybrid / alternative fuels. Propulsion type will be based upon the Alternate Fuel Vehicle Analysis.

0130 Building Renovations/Improvements

Description:

Funds are included in FY2016-17 for concrete replacement, and interior building upgrades for drywall, carpet, paint, etc. including a new training room with driving simulator equipment. In FY 2017-2018 funds needed to replace the roof located over dispatch and middle garage. The current roof was installed in 1997 with a 15 year warranty and will be 20 years old by 2017. The condition of this roof is showing signs of deterioration and minor leaking. Other projects include HVAC and restroom replacements. FY18-19 funds are for LED Lighting throughout the facility.

0781 Biogas Renewable Fuel - New Bus Fueling Station

Description:

This project involves the recovery, treatment and fuel station distribution of renewable natural gas (biogas) as the primary fuel source for the City of Lincoln / StarTran bus fleet as well as other City vehicles. Biogas is produced from the anaerobic digestion process at the Theresa Street WWTF and is considered to be an alternative sustainable source for vehicle fuel. Funding is requested in FY 2016-17 and 2017-18, for project costs including land acquisition, environmental study, design and construction. Site selection is in the preliminary analysis phase and is undetermined.

0838 Replacement of fuel site fill containment systems

Description:

The 29 product fill containment systems located at 6 fuel distribution locations were installed in the 1990's when sites were renovated due to more stringent EPA underground storage tank (UST) regulations. Since that time the fuel fill containment sumps have settled and both sump lids & fill pipe/caps have deteriorated to the point that during heavy rains water has the potential to enter the fuel tank. The system is intended to allow delivery personnel a method to manually return spilled product from the containment sump back to the tank are antiquated and in poor condition, increasing potential liability due to ground/water contamination. These renovations will have a useful life of 25+ years.

0839 Brine production facility at 3200 Baldwin Avenue

Description:

The City's existing brine production capability (at MSC) requires 34 hours of constant operation in order to produce enough brine for a single winter event response. In order to improve the City's responsiveness to unexpected and/or successive winter events, and to enhance public safety, this expansion of our brine production capability is a vital necessity.

Other Financing may include but not be limited to unexpended streets funds, collections of revenues over the estimated projections or other partnerships with public or private entities.

0768 West "A" Street from West City Limits to Folsom

Description:

This project would improve the capacity and safety of this area by programming city funds for the completion of design engineering, right-of-way, construction and construction engineering to construct two lanes of pavement along West "A" Street between Folsom and West City Limits. The project will construct left and right turn lanes as appropriate and may include intersection improvements at Folsom and Coddington. The project will improve safety and capacity.

Description:

The intent of this listing identifies example roadway segments where initial design and right-of-way acquisition can be completed prior to the roadway improvement. Initial construction may only provide two through lanes plus turn lanes. Priority of Roadway improvements will be determined as land development generates roadway capacity needs. These roadways are currently identified in the existing comprehensive plan. Construction schedules are contingent upon availability of Funding. Project such as :
 S. 98th St - "A" St to "O" St,
 Normal Blvd. - S. 58th St. to Van Dorn,
 US-34 ("O" St) - Wedgewood Drive to 98th St,

0175 Safety and Operation Improvement Program

Description:

Projects vary in location and scopes of improvements are tailored specific to the needs. Generally work will provide improvements at locations based upon the annual traffic monitoring and crash analysis programs traffic calming, minor intersection improvement and help provide subsidies for paving districts, bikeway/trails to improve bicycle/pedestrian movement used in conjunction with other improvement projects. Federal funds will be requested where applicable and matched with City funds to maximize the number of locations where enhancements can be made.

Helps meet LRTP goals supporting the Intersection Capacity Improvements, ITS, Safety Projects, Travel Demand Management, maintenance / rehabilitation and new capital expenditure for Pedestrian and Bicycle Facilities.

Locations may include: 14th & Cornhusker, Coddington and West Van Dorn, Highway 2 Corridor Study, 27th Street Adaptive Signal Project, 66th and Fremont

0181 Sidewalk Maintenance and Repair.

Description:

City funds are allocated for maintenance and repair of sidewalks
Helps meet LRTP goals supporting both the maintenance / rehabilitation and Capital expenditure for Pedestrian and Bicycle Facilities as existing infrastructure are improved / repaired and Capital expenditure when new amenities, such as curb ramps, are constructed. Rehabs and replaces existing infrastructure.

Additional funding is needed to more fully meet the needs of the Sidewalk Maintenance and Repair program. An unknown additional source of funding in the amount of \$2 million a year would better meet the identified needs of the sidewalk system as identified in the Comprehensive Plan.

0182 Roadway and Bridge Rehabilitation

Description:

Pavement management, resurfacing and repairing city-wide of all roadways and bridges to maintain their longevity and serviceability economically through resurfacing, reconstruction, help provide subsidies for paving districts, bikeway/trails to improve bicycle/pedestrian movement used in conjunction with other improvement projects, and drainage inlet top replacement. Work performed also includes the data gathering, analysis, and implementation for both the pavement management and bridge management programs.

Helps meet LRTP goals supporting both roadway and pedestrian maintenance / rehabilitation needs for existing infrastructure, Intersection Capacity Improvements, two plus center turn lane projects, safety projects, and Capital expenditure for Pedestrian Facilities as new curb ramps continue to be built as a part of projects. Rehabs and replaces existing infrastructure

0269 Traffic Optimization and Management Program

Description:

Projects vary and scope of work is customized to meet the needs of the specific location. Work could include elements of Intelligent Transportation System Infrastructure (ITS), annual traffic monitoring program (turning movement counts, mechanical counts, travel time, and delay studies) and improving traffic flow through signal timing changes. Other projects modify, replace or install traffic signal equipment (poles, controllers, detectors, communication links) at locations that have exceeded their useful life, or include additional new locations that will improve overall traffic flow and upgrades for left-turn phases and/or provide crossing protection.

Helps meet LRTP goals supporting the rehabilitation of existing signal/traffic flow infrastructure, provides Intersection Capacity Improvements, ITS, Safety Projects, Travel Demand Management, maintenance / rehabilitation and new capital expenditure for Pedestrian and Bicycle Facilities.

Locations may include: Cotner & Holdrege, Cotner & Starr, 48th & Hwy2, 17th at "A" Street-"D" Street and Washington, Regency Drive at "A" Street, 48th & Calvert - 56th & Calvert

Reduces greenhouse gas emissions by making traffic run more efficiently

0665 Pedestrian and Bicycle Capital Program

Description:

Dedicated funding for an ongoing pedestrian and bicycle capital program is identified as a priority in the 2040 Transportation Plan. The ongoing program will help implement a coordinated system of well connected pedestrian and bicycle facilities that serve both new and older neighborhoods and provide access to activity centers such as schools, parks, employment areas and shopping. Examples of high priority capital projects to be funded by this program include new and updated on-street bike route signs, pedestrian countdown signal heads at all signalized intersections, installation of priority sidewalk connections, sidewalk connections to trails, public bicycle parking, bicycle activated signals, and enhanced at grade pedestrian crossings.

0005 South Beltway

Description:

Design, right-of-way and construction of a four lane freeway between US 77 and Highway 2. City funding is responsible for a 20% match for the South Beltway Project. This is a State of Nebraska roadway project lead. Project length 9 miles. Construction is contingent upon available LB 84-Build Nebraska Act funding for the State. The local 20% match is expected to come from a variety of sources including RTSD, Wheel Tax, Federal Aid, and potentially an additional unknown funding source if the cost of the project increases. An agreement with the State is part of the strategy to meet the City's local match on the South Beltway by using available local Federal Aid.

0173 Wastewater cost of street construction (GSI)

Description:

Support of street construction projects. Wastewater collection system improvements completed during a street construction project

Group:	General System Improvements
Program:	(None)
Budget Outcome:	Environmental Quality
Budget Goal:	Effectively manage wastewater and solid waste
Date Anticipated:	
Rating:	A
Status:	Ongoing
Comp Plan Conformity:	Generally Conforms with Plan

Project Total:\$692.00

Prior Appropriations \$328.00

Costs Beyond: \$100.00

6 yr appropriations

0278 Facilities Plan Update (GSI)

Description:

Facilities Plan Update. Provides for updating the Comprehensive Facilities Master Plan for wastewater collection, pumping, and treatment facilities in accordance with the City's comprehensive planning efforts, to accommodate City growth and meet State and Federal regulatory operating requirements.

Group:	General System Improvements
Program:	(None)
Budget Outcome:	Environmental Quality
Budget Goal:	Effectively manage wastewater and solid waste
Date Anticipated:	
Rating:	B
Status:	Continued
Comp Plan Conformity:	Generally Conforms with Plan

Project Total:\$580.00

Prior Appropriations \$280.00

Costs Beyond: \$0.00

0808 Replace Laboratory Information Management System

Description:

Replacement of the current combination of a third party front end program and Microsoft Access laboratory database with a new laboratory information management system (LIMS). The current system was last modified in 2004 and can no longer be modified. The new system will provide a web based interface allowing mobile access, provides integration with the SCADA system, and more flexible reporting including DMRs.

Group:	General System Improvements
Program:	(None)
Budget Outcome:	Environmental Quality
Budget Goal:	Effectively manage wastewater and solid waste
Date Anticipated:	12/31/2016
Rating:	A
Status:	New
Comp Plan Conformity:	Generally Conforms with Plan

Project Total:\$100.00

Prior Appropriations \$0.00

Costs Beyond: \$0.00

6 yr appropriations

0815 WW Share of New Water Meters

Description:

Wastewater share of water meters to serve the growth of the community, in accordance with the Comp Plan. \$0.13-\$0.16 million is projected for new water meters associated with growth and development projects.

Group:	General System Improvements
Program:	(None)
Budget Outcome:	Environmental Quality
Budget Goal:	Effectively manage wastewater and solid waste
Date Anticipated:	
Rating:	A
Status:	Ongoing
Comp Plan Conformity:	Generally Conforms with Plan

Project Total:\$817.00

Prior Appropriations \$0.00

Costs Beyond: \$0.00

6 yr appropriations

<u>Funding Source</u>	<u>2016/2017</u>	<u>2017/2018</u>	<u>2018/2019</u>	<u>2019/2020</u>	<u>2020/2021</u>	<u>2021/2022</u>	<u>6 yr Total</u>
Utility Revenues	\$126.00	\$130.00	\$134.00	\$138.00	\$142.00	\$147.00	\$817.00

0281 Selected repair/repl of WW fac/collectors

Description:

Selected Replacement or Repair of Wastewater Facilities and/or Collectors. (700359) Provides for the replacement, reconstruction, and/or repair of wastewater equipment, facilities and/or collectors that have served their useful lives and are in poor condition. Included are repairs to treatment equipment, facilities, collectors and appurtenances. Equipment repairs or replacement will sustain the operation of the wastewater treatment systems. Repairs to the collection system will reduce infiltration and inflow into the system and reduce flows to the treatment facilities. Easements may be required.

Selected Treatment Facility Repairs:

- Repair of TSTP and NETP Structures
- Replacement/Repair of TSTP and NETP Treatment Process Equipment
- Replacement/Repair of Liftstation Structures and Equipment
- Replacement/Repair of Injection Site Equipment
- Replacement/Repair of Storm Water Pump Stations

Selected Collection System repairs:

- Replacement or repair of approximately 30 manholes throughout the system.
- Repair of approximately 45 point sections of sewers of various sizes and locations
- Replacement of sections of sewers of various sizes and locations, 1,800 feet of open trench
- Replacement of sections of sewers of various sizes and locations, 11,400 feet of sewer lining
- Replacement of sections of sewers of various sizes and locations, 1,800 feet of pipe bursting
- Repair of siphons at various locations as necessary

0619 Repair 48" Sewer Pioneers to "O" St (SV)

Description:

Repair 48" Smooth Flow Sewer Pipe from Pioneers Blvd. to O Street This pipe is corrugated steel with an asphalt lining. After 30 years of use this lining is starting to deteriorate and fall off of the steel pipe causing sewer back-ups and corrosion and failure of the steel carrier pipe. This pipe will have to be relined or replaced to provide continued service to the Salt Valley Basin. This is a multiphase project.

0818 Biogas to Vehicle Fuel Renewable Energy Project

Description:

To provide equipment and facilities for the collection, treatment and distribution of biogas to be used as vehicle fuel. Currently this gas is used to generate electricity through the operation of a cogeneration system consisting two engine generators and heat recovery equipment at the Theresa Street WWTF. This system has been in place for 25 years and has served the City well. This system has reached its useful life and many components are obsolete and no longer supported. The system has also reached its maximum capacity and additional gas production from community growth will result in waste by flaring. A Peer Review Committee was formed and several options were considered from a study completed by HDR Engineering which looked at current technologies, practices, economics and a return on investment (ROI) associated with each option.

0821 Odor Chemical Feed System Improvements - TSTP

Description:

Replacement of distribution piping and valves associated with the chemical wet scrubber system constructed in 2003. The piping has become brittle and prone to failure due to the aggressive nature of the chemicals involved in the process. Additionally the instrumentation is outdated and will also be replaced and updated.

0823 A3 Elevator Replacement Theresa Street WWTF

Description:

The passenger elevator is 44 years old, contains all original components, and has greatly exceeded useful life. At the present time this elevator does not comply with current code and has operational issues due to age. The elevator needs to be upgraded for dependability reasons and for code compliance.

0470 Emergency Generator Installation (NETP)

Description:

Installation of an Emergency Generator to provide power for critical loads during an electrical power outage. There is not current emergency generation available at the Northeast Treatment Facility. This unit would be a black start unit driven by a natural gas engine. This unit could also be used during peak loading conditions to reduce peak electrical demand charges imposed by the Lincoln Electric System.

0817 NE WWTF Solids Handling Improvements

Description:

To provide solids dewatering equipment and facilities to enhance the options for land application of biosolids as generated at the treatment facility. The improvements would allow for the dewatering of biosolids and would expand the existing land application program for beneficial reuse by area farm cooperators. Currently biosolids are land applied in liquid form to city owned farm ground and by contractor application to privately owned farm ground. Nutrient limitations and seasonal requirements with contract applications have become restrictive and the current methods cannot be sustained.

0566 Wastewater Construction Projects for New Growth

Description:

Construction of new trunk sewers and sub-basin collection systems to serve new areas or provide additional service capacity to existing areas. Design, easement/right-of-way, and construction costs are included. Construction of Treatment Plant growth related projects are included. Projects are determined on an as needed and fund availability basis. Rate increases will be required to support this construction.

\$0.25 million will be set aside each year for economic development projects.

Eligible projects include projects such as:

Extension of main from approx. 95th & O St to SW, \$500.0 - 2016
 Extension of sub basin main between Holdrege and O, 112th to 105th, \$250.0 - TBD
 Extension of sub basin main in Stevens Creek to 98th & Van Dorn, \$1,000 - 2018/19
 Extension of main from 84th & Rokeby Rd east, \$400.0 - TBD
 Extension of internal mains I-80 to W. Holdrege, NW 48th to NW 56th, \$322.0 - TBD
 N 84th to N 112th & Cornhusker HWY - Extend Trunk Sewer - \$6,980.0 - TBD
 Trunk Line Alignment Studies

Capital Improvement Program

FY 2016/17
– 2021/22

Public Works & Utilities

- Broadband Infrastructure
- Solid Waste Operations
- StarTran
- Street Maintenance Operations
- Streets & Highways
- Wastewater
- **Water Supply & Distribution**
- Watershed Management

Public Works/Utilities - Water

0797 Infrastructure - Water Structures

Description:

Projects to rehabilitate and replace existing assets associated with structures including roofs, exterior coatings and masonry, and HVAC systems.

Example projects include:

Repaint West Wash Water Reservoir: \$200k - 16/17

Operations center HVAC: \$400k - 16/17

Repaint Merrill Street Standpipe: \$150 - 18/19

Repaint Air Park Reservoir: \$1,000k - 20/21

Various building rehabilitation projects such as tuck pointing, roof replacements and interior repairs.

Group:	Structural Repair & Maintenance
Program:	(None)
Budget Outcome:	Environmental Quality
Budget Goal:	Provide safe and adequate water
Date Anticipated:	
Rating:	B
Status:	New
Comp Plan Conformity:	Generally Conforms with Plan

Project Total: \$1,600.00

Prior Appropriations \$0.00

Costs Beyond: \$0.00

0006 Water Security Upgrade

Description:

To provide the necessary improvements as recommended in the Vulnerability Assessment, including fencing, surveillance systems, & access control measures.

Example projects include:

Operations Center Security: \$700k - FY16/17

Pioneers PS, A Street PS and Yankee Hill Reservoir: \$330k - FY17/18

Cheney Reservoir: \$200k - FY19/20

0758 Water General System Improvements

Description:

Projects to improve reliability, redundancy, control, monitoring, water quality, and asset management.

Example projects include:

Asset management system: \$90k - FY16/17

Southeast PS PRV: \$167k - FY16/17

Pioneers Reservoir Valve: \$347k - FY19/20

51st Street Reservoir Valve Automation: \$380k - FY19/20

Reservoir mixing equipment for water quality: \$810k - FY20/21

Pressure monitoring stations: on-going

Arsenic treatment: \$1,000k - FY17/18

Group:	General System Improvements
Program:	(None)
Budget Outcome:	Environmental Quality
Budget Goal:	Provide safe and adequate water
Date Anticipated:

0798 New Water Pumping, Storage & Transmission

Description:

Projects include new pumping stations, water reservoirs and water transmission mains required for distribution of water in Lincoln to meet the projected growth demands. Projects are usually a result of the Water Master Plan and Comprehensive Plan growth projections.

Example projects include:

Yankee Hill Pump Station: \$5.0M - FY16/17

1-80 & 56th Pump Station (CIF funded): \$1.240M - FY18/19

NW 12th Pump Station: \$3.8M - FY19/20

98th Street Transmission Main, 54": \$11.7M - FY21/22. This funding is the first year of a total project amount estimated to be \$36M at time of construction in FY23/24.

Group:	General System Improvements
Program:	(None)
Budget Outcome:	Environmental Quality
Budget Goal:	Provide safe and adequate water
Date Anticipated:	
Rating:	A
Status:	Ongoing

0011 Infrastructure - Raw Water Supply

Description:

Projects to rehabilitate and replace existing assets associated with raw water supply such as wells, pumps and pipelines.

Example projects include:

Replace well pumps, 76 series and 54-10: \$900k - FY16/17

Replace VFDs, 90-1 and 90-2: \$300k - FY16/17

Rehab wells, 32-A, 37-A, 49-8A, 54-5A, 56-7 and 76-3: \$227k - FY16/17

Replace well pumps, 66 series: \$300k - FY17/18

Rehab wells, On-going wells TBD: \$1,915M - FY17/18-21/20

Replace PLCs, wellfield: \$470k - FY19/20

Group:	Water Supply - Wells, Treatment & Transmission

0756 New Source of Water Supply

Description:

Evaluate potential water supply sources independent from the current supply near the Platte River. Project includes site evaluations, site selection and purchase options for land associated with new source of supply. This project also establishes a reserve fund for the future development of a new source of supply estimated to be \$1.5 billion when constructed in approximately 2040 - 2050. This project sets aside \$1.0 million each year beginning in FY19/20.

Group:	Water Supply - Wells, Treatment & Transmission

0760 New Water Supply Wells

Description:

Project will provide for the completion of collector well #14-2 which was partially constructed in 2013 to take advantage of favorable costs and permitting efficiencies. This project includes a pipeline crossing of the Platte River to join this well with an existing raw water transmission main to the treatment plant. Future funding also includes river bank stabilization in various locations to better protect well #14-2 and future collector well locations with construction planned for 18/19.

Group:	Water Supply - Wells, Treatment & Transmission
Program:	(None)
Budget Outcome:	Environmental Quality
Budget Goal:	Provide safe and adequate water
Date Anticipated:	
Rating:	A
Status:	Continued
Comp Plan Conformity:	Generally Conforms with Plan

Project Total:\$10,500.00

0757 Infrastructure - Water Pumping, Storage & Trans.

Description:

Various projects to rehabilitate or replace existing assets in Lincoln used in pumping, storing and transmission of water within the Lincoln distribution system.

Example projects include:

- Decommission A Street Reservoirs 4&5: \$1,350k - FY16/17
- Replace various motors, drives and electrical at Vine Street: \$750k - FY17/18
- Decommission Cheney Booster PS: \$276k - FY18/19
- Replace Pump 6 East Vine: 2.5M - 19/20
- Decommission Fallbrook Booster PS: \$300k - FY20/21
- Decommission Merrill Street PS: \$300k - FY20/21
- Replace 90-30 PLCs in Lincoln Distribution Facilities: \$340 - FY20/21

Group:	Pump Stations
Program:	(None)
Budget Outcome:	Environmental Quality
Budget Goal:	Provide safe and adequate water
Date Anticipated:	
Rating:	A
Status:	Ongoing
Comp Plan Conformity:	Generally Conforms with Plan

Project Total:\$6,900.00

0565 Water Mains and Meters-Locations To Be Determined

Description:

Water distribution mains and meters to serve the growth of the community, in accordance with the Comp Plan. Mains to be constructed in Impact Fee Areas 1-7 - at locations - in pressure districts - in years to be determined. Eligible projects are to be considered from the "To Be Determined" listings of projects in Projects #0043, #0044, #0045, #0046, #0047, #0048, and #0049 - Water Distribution Mains - Areas 1-7.

\$0.25 million will be set aside each year for economic development projects.
\$0.13-\$0.16 million is projected for new water meters associated with growth and development projects.

Funding amounts shown are estimated to be available for growth related projects in all 7 Water Distribution Main Areas. Not all projects listed as "To Be Determined" can be funded with estimated funding amounts.

Priority will be given to Opportunity Projects - Opportunities to extend water mains through an area where permanent paving will be placed, opportunities for economic development, and necessary looping to provide reliable service to growth areas.

Project Total: \$22,885.00

Prior Appropriations \$4,500.00

Costs Beyond: \$0.00

0799 Water Distribution System Improvements

Description:

Projects to improve capacity and reliability in the existing distribution system. Some projects are a result of hydraulic modeling performed as part of the Water Master Plan. Example projects include:

Various water mains for looping and fire flow

Water main loop for reliability to Innovation Campus: \$1.8M - FY19/20

Water main loop for Belmont zone, Coddington, A - O: \$1.1M - FY20/21

Group:	Distribution Mains
Program:	(None)
Budget Outcome:	Environmental Quality
Budget Goal:	Provide safe and adequate water
Date Anticipated:	
Rating:	B
Status:	Ongoing
Comp Plan Conformity:	Generally Conforms with Plan

0031 Infrastructure - Water Mains and Meters

Description:

Projects to replace existing water mains and meters that have served their useful life.

Water main replacement selection is based on frequency of broken mains, history of interruption of traffic and commercial or industrial customers, and/or opportunities to time construction with other improvements such as roadways. Funding goal for Water Main Replacement should be \$6.8 to \$9.0 million per year, which corresponds to a replacement rate of approximately 7 miles per year. This is considered an initial rate of water main replacement required to maintain the annual water main breaks below 14 per 100 miles of water main.

Water meter replacement is generally based on a battery life estimated to be 18 - 22 years for earlier models installed in the late 1990s.

Group:	Select Replace/Repair/Const Wastewater Facilities
Program:	(None)

0054 Floodplain/Floodprone Area Engineering/Projects

Description:

This project provides funding for floodplain management projects including the purchase of easements or fee title for floodplain/floodprone areas to conserve flood storage and other floodplain functions. Also provides funding for preliminary engineering, construction, potential land acquisitions and other measures related to flood reduction projects along Salt Creek and other water ways.

LPSNRD assists in the funding of these projects. These projects are funded by general obligation bonds, which must be approved by voters of the City of Lincoln. Specific locations have not yet been identified.

0057 Stream Rehabilitation on Parks Property

Description:

This project is for storm drainage projects on Parks and Recreation Department property, that are typically channel rehabilitation, scour protection, and/or water quality projects. Projects typically include grade stabilization, composite revetments, re-vegetation, modular walls, plunge pools, and similar stream stability practices in parks.

Projects are selected in close coordination with the Parks and Recreation Department. Projects are funded by general obligation bonds, which must be approved by City of Lincoln voters.

0063 Water Quality Projects

Description:

Water Quality projects are Best Management Practice (BMP) Projects that improve or manage water quality and quantity. Projects include cooperative projects with Parking, Parks, NDEQ, developers, and others.

LPSNRD assists in the funding of this project. The City of Lincoln continues to seek funding from NDEQ and other state and federal agencies for assistance with water quality projects. The City share of these projects are funded by general obligation bonds, which must be approved by voters of the City of Lincoln. Specific locations have not been identified.

0064 Urban Storm Drainage Projects

Description:

Urban drainage design and/or construction projects are projects at various urban locations where no system exists or to replace or improve deficient open and closed drainage systems. It also includes funding for preliminary engineering, easements and right-of-way. Many of the areas being targeted are those identified in the Preliminary Engineering and Prioritization of Urban Drainage System Deficiencies studies funded in previous CIPs. The prioritization of these deficiencies is the basis for those targeted projects identified with this project. Miscellaneous repairs and rehabilitations are typically projects to address areas of deficiencies or repairs identified by the Maintenance Division and others.

Projects are funded by general obligation bonds, which must be approved by voters of the City of Lincoln.

0714 Street Drainage Projects

Description:

Street drainage design and/or construction projects are projects at various urban locations to pay for the urban drainage and/or water quality portion of street projects. It also includes funding for preliminary engineering, easements and right-of-way as necessary. These projects and their specific locations are coordinated with the Engineering Services Division of Public Works.

Projects are funded by general obligation bonds, which must be approved by voters of the City of Lincoln.

0061 Comprehensive Watershed Master Plans

Description:

This project is for Preliminary engineering for Watershed Master Plans such as the Comprehensive City-Wide Drainage Master Plan and Urban Drainage Deficiency Studies. These plans are a tool to identify capital projects, manage drainage quantity and quality, meet Clean Water Act requirements, update floodplain maps, and prioritize future stormwater expenditures in drainage basins within the City and surrounding area.

LPSNRD may assist in providing funds for this project. These plans or studies are funded by general obligation bonds, which must be approved by voters of the City of Lincoln.

0062 Implementation of Watershed MasterPlan Projects

Description:

Projects to implement Watershed Master Plans, Basin Management Plans and Conservation Plans to include channel improvements, basin stability measures, water quality features, conservation practices, engineering, land acquisitions and easements, FEMA map updates, floodplain preservation, grade checks, storage facilities, flood reduction projects and other identified projects.

LPSNRD assists in the funding of these projects. These projects are funded by general obligation bonds, which must be approved by voters of the City of Lincoln. Projects to be implemented are included in the following Plans:

- a) Haines Branch Watershed Management Plan and Conservation Plan
- b) Beal Slough Watershed Master Plan
- c) Southeast Upper Salt Creek Watershed Master Plan
- d) Stevens Creek Watershed Master Plan
- e) Cardwell Branch Watershed Master Plan
- f) Deadmans Run Watershed Master Plan

0865 Historic Haymarket Street and Streetscape

Description:

The construction of the sidewalk and curb improvements will correspond to the mill and overlay project being planned for Historic Haymarket during the 2018 construction season. The greatest need for improvements will be at the intersections of 8th and P and 8th and Q, as well as an area with a temporary bollard configuration for a stop sign at 7th and Q. Pavers in the street on 7th and P Streets, south of Q, will generally remain. Other street and sidewalk improvements may be made to correct conditions. Improvements to street and pedestrian lights may be made, as well as replacements of damaged and deteriorating garbage cans, planters, bike bollards, and benches, if funds are available.
