MISCELLANEOUS 03013 - AMENDING CHAPTER 3.75 OF THE LINCOLN DESIGN STANDARDS TO
BE CONSISTENT WITH THE AMENDMENT TO LINCOLN MUNICIPAL CODE TITLE 27 REQUIRING
APPLICATIONS FOR BUILDING PERMITS FOR NEW CONSTRUCTION OF PRINCIPAL BUILDINGS
LOCATED ON LAND WITHIN THE R-1 THROUGH R-8 RESIDENTIAL DISTRICTS TO COMPLY
WITH THE NEIGHBORHOOD DESIGN STANDARDS - CLERK read the following resolution,
introduced by Terry Werner, who moved its adoption:
A-82591
WHEREAS, the City of Lincoln has previously adopted the City of Lincoln
Design Standards by Resolution No. A-80518; and
WHEREAS, Chapter 3.75, Neighborhood Design Standards, needs to be
amended to be consistent with the amendments to Lincoln Municipal Code Title
27 to require applications for building permits for new construction of
principal buildings located on land within the R-1 through R-8 Residential
Districts to comply with the Neighborhood Design Standards, provided such land
was annexed and made a part of the City prior to December 31, 1949.
NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of
Lincoln, Nebraska:
That Chapter 3.75 of the City of Lincoln Design Standards, adopted by the
City Council on November 6, 2000 by Resolution No. A-80518, be and the
same is hereby amended as follows:

1. Section 1, Introduction, is amended to read as follows:
Section 1. INTRODUCTION
Certain areas of Lincoln within the well-established neighborhoods have
evolved into relatively dense residential sections typically zoned R-1, R-2,
R-3, R-4, R-5, R-6, R-7, or R-8. Portions of these areas, despite their higher density use,
which retain much of the traditional physical character of their original
lower density development. These are areas of the City that were annexed
prior to December 31, 1949, and are potentially eligible for the National
Register of Historic Places. The purpose of the Neighborhood Design Standards
is to encourage rehabilitation of existing housing in such areas, while
allowing necessary new construction that is compatible with the surrounding
development.
The standards focus on a limited number of basic design elements which have
significant effect on compatibility, such as orientation of windows and
entrances toward the street, height and massing, and location of parking. The
written standards are accompanied by a sketchbook which both illustrates the
basic requirements and makes suggestions of additional means and ideas to
achieve greater compatibility of multi-family construction. Together, the
design standards and the sketchbook are intended to encourage neighborhood
associations, developers, and builders to look closely at the existing
features of older areas and to think about the effect new building design has
in those neighborhoods. These standards and suggestions cannot guarantee good
design - only the talents and efforts of owners, designers, and builders do
that - but they hopefully will eliminate certain design features that most
negatively impact the character of older neighborhoods.

2. Section 2, Work Requiring Review, is amended to read as follows:
Section 2. WORK REQUIRING REVIEW
The design standards apply to new construction of principal buildings
within the R-1, R-2, R-3, R-4, R-5, R-6, R-7, and R-8 districts and subsequent
modifications to those buildings, provided such land was annexed and made part
of the City prior to December 31, 1949.
The following categories of work do not require review under the Neighborhood
Design Standards (although other building and zoning codes may apply):
1. Alterations to buildings existing at the date of enactment of these standards (date);
2. Landscape changes to existing developed sites;
3. Construction of accessory buildings on existing developed lots;
4. Any interior aspects of new or existing construction.

Section 3, Application and Review Process, is amended to read as follows:

Section 3. APPLICATION AND REVIEW PROCESS
The review process in the R-1, R-2, R-3, R-4, R-5, R-6, R-7 and R-8 districts is designed to parallel the current building permit review process. That is, review for compliance with the Neighborhood Design Standards will take place at the same time that other components of the building permit are examined. In doing so, all attempts are made to avoid increased time for review and approval. To facilitate this administrative review process, the applicant will be requested to submit certain additional items with the normal building permit application. Those items are as follows:

1. At least one black or blue line print showing the principal street facade, the side facades, and the site plan of the proposed building.
2. A photograph or photographs showing the site and adjacent buildings.

Section 4. Section 4.1, Building Elements is amended to read as follows:

4.1 Building Elements
1. New buildings shall utilize a roof type and pitch commonly found within the same and facing block front. Hipped or gable roofs with pitch of at least 22.5 degrees (6/12 pitch) are acceptable in any district. Roofs of lower pitch and other types may be compatible in specific districts, and can be proposed and approved on an individual basis. In such cases, the applicant should cite specific examples within the district comparable to the proposed building in height and to the proposed roof in type and pitch.
2. Older existing residential structures within established neighborhoods typically share similar design features, such as a common orientation to the street, seen in the location of entrances, windows, and porches. New buildings shall provide windows oriented to the street and shall provide an entrance to a dwelling unit or to a hallway leading to a dwelling unit. Use of front porches is strongly encouraged on new construction. Garage doors for not more than two stalls are permitted on a portion of the main building facing a front lot line, provided such doors shall not occupy more than 40% of the length of the principal street facade.
3. Height of new buildings should be similar to that of older existing residences on the same and facing block fronts. New buildings shall be acceptable that are not taller than the tallest residential structure, nor shorter than the shortest residential structure, built prior to December 31, 1949 on the contiguous blockface, provided that:
   a. the maximum allowable height shall not be reduced to less than twenty-eight (28) feet, and
   b. if the height permitted under this section would exceed that permitted in the underlying district, the new building shall be no taller than an existing, adjacent building. Taller structures may be approved on a case-by-case basis, when a steeper roof would increase compatibility between the new building and adjacent older residences.
4. In order to encourage variation of the front elevation, up to twenty-five percent (25%) of the length of the principal street facade may be constructed up to two feet (2') into the required front yard. Use of this provision, however, cannot increase the extension of porches into a required front yard beyond that otherwise allowed in Sections 27.71.100 and 27.71.110 of the Zoning Ordinance.
5. The rhythm of 30'-40' wide similar width houses on 50' similar width lots does much to establish the character of Lincoln's older established residential areas. Large new buildings disrupt this character, unless design measures are employed to reduce their
apparent scale. New buildings over fifty feet (50') in length on the principal street facade should be designed to maintain the rhythm of the \textit{existing} adjacent buildings. Designs will be bound to meet this standard which offset the principal street facade and roof at intervals of fifty feet (50') or less. These offsets shall be at least six feet (6') in depth, and the portions of the facade offset shall equal at least 10% of the length of the facade.
