March 17, 2006

Mr. Barnie Blum  
Traffic Engineering  
City of Lincoln, Nebraska

Dear Barnie,

Please accept this letter as a request that my office be able to place an "outside warning" siren on city right of way on South 27<sup>th</sup>, south of Whispering Wind Street.

This siren will be placed on top of a power pole measuring 2 feet in diameter and being 47 feet above ground level.

I have a contract with Schmader Electric to install this warning system and will provide a "one call" for site location.

These warning systems are in place throughout the City of Lincoln and Lancaster County. I have attached a diagram of the site we plan to use for the placement of this power pole.

Thank you for all your assistance.

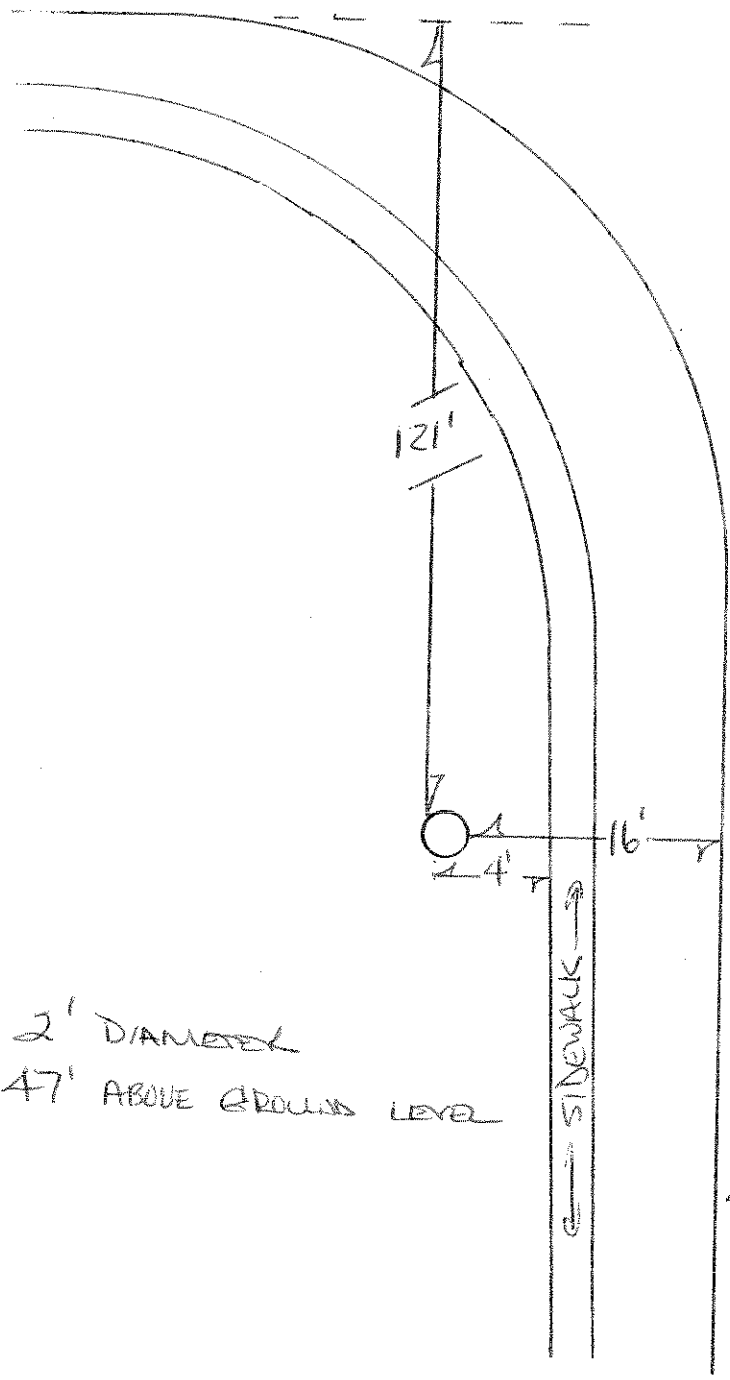

Sincerely,

A handwritten signature in black ink, appearing to read "Doug Ahlberg", written over a horizontal line.

Doug Ahlberg, Director  
Lincoln Lancaster County Emergency Management
