U. Viet Hao Redevelopment Project

1. Project Description

The Viet Hao Project is located at 2353 O Street (parking lot), 2365 O Street and 2373 O Street. The project consists of the rehabilitation of the 2365 O Street building and the demolition and construction of a new building at 2373 O Street. The project includes a new retail store and office space. It is located at mid-block between 23rd and 24th Street (south side), with O Street on the north and N Street on the south. See Project Area & Context, left.

The project site is approximately 16,600 square feet and is currently comprised of two vacant and dilapidated buildings. Included in the project site is a small parking lot adjacent to the west. Surrounding land uses include retail to the north, south, east and a health clinic to the west. (See Existing Land Use, next page).

The site is zoned B-3. As illustrated in Existing Zoning on the following page, other districts adjacent to the site include B-4 to the west, and P Public Use to the south and southwest encompassing Elliot School and the Antelope Valley waterway.
The Viet Hao Market project will be a grocery store specializing in foods from Southeast Asia. This new market will replace the existing business located at 2420 O Street and will double the total area of the existing market. The north half of this building is a two-story structure with structural problems and will be demolished. A geotechnical report concluded that the site is not suitable for typical footings and foundations due to a tunnel structure that was built on top of the underground channel for Antelope Creek. The tunnel is approximately 15 feet wide and the existing building was constructed on top of the tunnel. The structurally sound south half of the building will be remodeled and incorporated into the new building. The 2365 O Street building will also be remodeled to tie the redevelopment together.

The building at 2373 O Street has 16,800 square feet and when finished will have 7,100 square feet. The 2365 O Street building has 4,200 square feet and when remodeled will have 2,600 square feet. Façade and window treatments will be incorporated on the front of the building facing O Street. See Proposed Preliminary Site Plan (right, above) and a Preliminary View of the North Façade on the following page.
The project area boundaries are defined in the Project Area Context & Boundaries map. Project area public improvements may include energy and façade enhancements, site preparation, demolition and landscaping. The project area is not in a flood plain; however, there is a large underground tunnel under the building.

2. Statutory Elements

Property Acquisition, Demolition, and Disposal: No public acquisition of private property, relocation of families or businesses, or the sale of property is necessary to accomplish this Project. The north half of the 2373 O Street existing building will be demolished and reconstructed and the south half of the building will undergo extensive internal demolition and remodeling. The 2365 O Street building will undergo extensive internal renovation.

- **Population Density**: The proposed development at the Project site contains no residential units and no residential units are envisioned. The Project consists of renovated retail redevelopment, which will not affect population density in the Project area.

- **Land Coverage**: Land coverage and building density will not be altered with construction of the Project. Future Land Use is shown on the following page.

- **Traffic Flow, Street Layouts, and Street Grades**: The City’s Public Works and Utilities Department has indicated that the Project is not likely to result in a significant increase in traffic. Access points will be reduced and no turn lanes are required.

- **Parking**: An existing, 15 stall at grade surface parking lot is part of the project.

- **Zoning, Building Code, and Ordinances**: Current zoning is B-3 with no re-zoning required. Applicable building codes and design standards will be met.

3. Financing and Cost Benefit Analysis

As required by Nebraska Community Development Law (Neb.Rev.Stat. §18-2113), the City has analyzed the costs and benefits of the proposed Project including:

- **Tax Revenues**: Upon completion of the Project, the assessed value of the property will increase by an estimated $1,033,800.00. This will result in an estimated $128,200.00 in Tax Increment Financing (TIF) over 15 years for public improvements. The public investment of the approximately $128,200.00 will leverage the private investment of approximately $1,538,460.00 resulting in more than $12.00 of private investment for every City TIF dollar spent.

- **Public Infrastructure and Community Public Service Needs Impacts**: It is not anticipated that the Project will have an adverse impact on existing public infrastructure or City services.

- **Employment Within & Outside the Redevelopment Project Area**: The Project will not have any adverse impact on employment within or outside the redevelopment project area.

- **Other Impacts**: The Viet Hao Project will assist in the elimination of Blight and Substandard conditions at this project site and will improve the area. This project continues the revitalization of the area, begun with the Health 360 project immediately to the west of this project. The project will also benefit the community through increased tax revenue.
