Subject: RE: Residential street policy

Mr. Rediger,

Thank you for reaching out.

I am currently reviewing our winter operations and asking questions of our Transportation and Utilities department to get a better understanding of how they decide when to treat, how to treat, and what to treat when it comes to a snow event. You are not alone in your frustration. Thank you for being in touch and getting your voice heard. It helps me get a sense of where the biggest risk areas are at in our city. I am going through each e-mail, voicemail, and text message and taking notes on suggestions and biggest areas of concern. I am responding to everyone individually who has taken the time to reach out.

Subject: Residential street policy

Hello,

Thank you for serving the city. I'd like to recommend a change (asap) in city policy to increase the application of sand/gravel (whatever material) for traction on city residential streets. Leaving these side streets untreated is continually a dangerous safety hazard. I live on the corner of S 27th Street and O'Reilly drive. Our street has a downward slope onto 27th street and make for an extremely dangerous situation. I literally have to ride my right front tire along the curb EVERY TIME I leave my house to keep my vehicle from sliding onto 27th street. This is simply unacceptable. It happens with EVERY snowstorm no matter how many inches of snow we have. Whatever it is, it gets snow packed within a days time and creates an icy slide into 27th street. Many other streets in the Country Club neighborhood have the same issue.

Let's please address this immediately and do a better job on our residential streets. Thank you and do feel free to contact me with any comments or questions.

Sincerely,

Scott T. Rediger, CPA
