

**Mike Holle**  
**Commissioners' Award of Excellence**  
**June 2017**

Mike Holle has been selected as the Commissioners' Award of Excellence winner for June 2017. Mike works as an Engineering Technician II and began working for the County on September 27, 2007. He was nominated by Brendan Lilley, Civil Engineer, in the category of Productivity.

In his nomination, Mr. Lilley states, "Mike Holle has been with the Lancaster County Engineering Department for almost ten years. Throughout that time, he has made quite a positive impact on the people around him. Mike shows initiative and is always ready to take on new tasks. Besides being an efficient and precise draftsman/designer, he is always ready to throw on his boots and help out with surveys when he is needed in that capacity. In addition to all his work, he has volunteered when needed, including participation in the Employee Advisory Team and the Wellness Committee."

Mr. Lilley continues, "Mike always does his work without a complaint. When asked to take over a new task, he does so with grace and ambition, and when faced with a task he is not familiar with, he is not averse to asking for help. Most often he ends up taking the task and running with it, doing a great job in the process. Recently, Mike completed all of the CADD drafting/design for the 2016 New

Asphalt Paving project, which included almost \$4 million of new paving in various locations around the County. At the same time, he completed survey processing for the survey group and legal tract descriptions and drawings for the right-of-way group. As if this weren't enough to fill a person's schedule, Mike has been completing most of the drafting/design for the miscellaneous smaller maintenance projects that are repaired or built by County maintenance forces."

In conclusion, Mr. Lilley states, "An Engineer would be hard pressed to find a draftsman/designer that can do a better job than Mike."

For these reasons, we are pleased to award Mike Holle with the Commissioners' Award of Excellence for the month of June 2017.
