Economic Review

- Economic growth accelerated during the second quarter, both in the U.S. and the global economy. Compared with growth of only 1.4% in the first quarter, U.S. real GDP expanded at an estimated annual rate of 3% in second quarter. World GDP expanded at an estimated 3.2% annual rate, the fastest pace in many years. Growth in U.S. real GDP was led by a solid recovery in sectors that had been notable laggards in recent quarters: consumer spending rose at a 3% annual rate, while residential construction and business capital investment increased at annual rates in excess of 5%.
- The global economy is approaching a “sweet spot” in the current world economic expansion: both GDP and corporate profit growth are accelerating in most countries; business confidence remains elevated; manufacturing indexes are in a solid uptrend globally; labor market trends are favorable; central bank policies are highly expansionary; inflation remains under excellent control at historically low levels; and bond yields remain near historic lows.
- The average inflation rate within the major economies was only 1% during the second quarter, slightly lower than the first quarter, and slightly below the 1.5% rate in the U.S.
- Corporate profits increased sharply in all major economies, with non-U.S. earnings rising at a faster pace relative to those in the U.S. Corporate profits increased at an estimated 12% annual rate in the U.S. on a 6% rise in revenues.
- The Federal Open Market Committee (FOMC) raised the target range for the Federal Funds Rate by 25 bps to 1.00% to 1.25% in June’s meeting, a move that was widely expected by the market. In addition to the fourth rate hike since December 2015, the Federal Reserve also announced they will begin to unwind its \$4 trillion-plus balance sheet.
- U.S. common stocks continue to maintain their long-term advantage over U.S. fixed-income assets. The S&P 500 Index has dramatically outperformed investment-grade bonds over the past five years with a compound annual return of 14.5%, compared to only 2.2% for the BBC Aggregate Bond Index.

Financial Market Returns

- World equity markets continued to rally in the second quarter as several developed market indices approached all-time highs. International developed and emerging market equities outpaced U.S. equities, benefitting from strengthening currencies, improving fundamentals and stronger economic growth.
- The S&P 500 Index delivered its strongest first half since 2013, supported by better-than-expected corporate earnings and investors' expectations for improving economic growth.
- Investment-grade bonds, as measured by the BBC Aggregate Bond Index, advanced in the second quarter, returning 1.45%. The best-performing segment of the domestic fixed-income market was the BBC U.S. Credit Index, with a total return of 2.35%.

- Large-cap stocks continued to outperform small- and mid-cap stocks, although small-cap stocks rallied in June.
- Growth stocks outperformed Value stocks across the market cap spectrum by a wide margin. Large-cap Growth was the strongest performing segment for the second straight quarter, benefiting from the top-performing Health Care sector.
- Growth indices benefitted from strong performance in the Information Technology and Health Care sectors, while Value indices were held back by poor performance from Energy stocks as oil prices continue to decline.

S&P 500 Sector Performance

- Investor demand for the higher growth sectors of the market, such as Health Care and Information Technology, continued to contribute significantly to the S&P 500's return.
- Financials also performed strongly in the quarter, staging a comeback in June as stock leadership generally rotated from Growth to Value after the Federal Reserve announced a plan to unwind its balance sheet. Financials finished the quarter up 4.3% and outperformed all other sectors over the trailing one year with a 35.4% return.
- Energy and Telecom Services were the only two negative performing sectors for the quarter. Energy stocks suffered another quarter of falling oil prices due to oversupply issues, while Telecom Services stocks were driven down by falling prices for wireless plans, as competition has increased among the large carriers.

International Index Returns

- International developed market equities had another strong quarter, as the MSCI EAFE Index returned 6.1%. Europe was the strongest performing region returning 8.4%, benefitting from positive economic data, easing of political worries and improved corporate earnings.
- The MSCI Emerging Market Index continued to rally, climbing 6.3% for the second quarter and 18.4% year-to-date. Emerging Market stocks benefited from a supportive global backdrop, monetary easing by major central banks and a weaker U.S. dollar.
- Japanese equities registered another positive quarter with the Nikkei index near a multi-decade high. Equities advanced amid stronger corporate earnings and Bank of Japan's upbeat assessment on the health of the economy.

Fixed Income Returns

- All major fixed income segments posted gains in the second quarter, with the BBC U.S. Credit Index the best performing segment. Investment grade corporate issues benefitted from credit spreads tightening, demand for risk assets and low default risk due to strong corporate earnings.
- The BBC High-Yield Corporate Bond Index continues to provide positive returns, returning 2.2% for the quarter. High yield outpaced all other sectors for the first half of 2017 as default risk remains low and credit spreads tightened.
- The BBC TIPS (Treasury Inflation Protected Securities) Index returns were negative for the quarter as inflation expectations declined from earlier in the year.

Data Source: Russell/Mellon Analytical Services

U.S. Treasury Yield Curve

- The Federal Open Market Committee (FOMC) raised the target range for the Federal Funds rate by 25 bps to 1.00% to 1.25% in June’s meeting, a move that was widely expected by the market. In addition to the fourth rate hike since December 2015, the Federal Reserve also announced they will begin to unwind its \$4 trillion-plus balance sheet.
- Short-term yields shifted upward, flattening the yield curve, as the U.S. Federal Reserve raised rates in June and reaffirmed guidance for one more hike this year. In response to low inflation and investor appetite for longer dated Treasuries, the 10-year finished the quarter with a 2.29% yield after bottoming at 2.12% in June, its low point for the year.

Economic & Market Outlook

- The global economy has finally entered a cyclical expansion phase that appears sustainable through 2018. The combination of low inflation, highly expansionary central bank policies, a cyclical recovery in manufacturing and employment, and a rebound in world trade support respectable economic growth worldwide. World GDP should expand at an average annual rate of 3.5% through 2018.
- U.S. GDP could expand at a 3% annual rate over the next four quarters, decelerating to 2% later next year and 1% in 2019. Inflation should remain in the vicinity of 2% over the next year, accelerating to 2.5% by the end of 2018. Currently at 4.3%, the U.S. unemployment rate could approach 4% later this year and 3.7% during 2018, the lowest level in decades.
- The outlook for corporate profits is favorable for both U.S. and non-U.S. companies. Domestic earnings should benefit from both top-line revenue growth and profit margin expansion. Corporate profit margins for companies in the S&P 500 are in a distinct rising trend and approaching the all-time record highs reached in 2014. U.S. corporate profits should expand at a 12% annual rate over the year while non-U.S. earnings should expand at a 15% annual rate, led by Europe and Japan.
- The most important variable in the outlook for financial markets is the timing of the next recession. The two most notable areas of risk to the expansion are labor market bottlenecks and rapidly rising debt within the nonfinancial corporate sector. At nearly full employment, the U.S. economy is vulnerable to rising labor costs, which could trigger a wage-price spiral.
- The outlook for global financial markets is mixed. World equity markets should continue to grind higher over the next 12 months, while global bonds remain at risk as a consequence of adverse economic and policy factors along with extremely overvalued bond markets.

Plan Summary

The performance quoted represents past performance. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance data quoted. For performance information current to the most recent month end, please call 1-877-778-2100 or visit our website at www.prudential.com. While past performance is never an indication of future results, short periods of performance may be particularly unrepresentative of long-term performance.

† Performance is based on adjusted historical returns of the oldest share class of this fund, which has been adjusted to reflect the fees of the expenses of this share class

Plan Summary Footnotes

EXPLANATION OF PERFORMANCE INFORMATION

The following tables provide fund performance information, and other relevant performance and supplementary information concerning Institutional Sub-Advised, Institutional Select, Alliance Mutual Funds and Proprietary Funds if applicable. For Institutional Sub-Advised and Institutional Select Funds, the PRIAC Separate Accounts hold the investment securities. Prudential Retirement Insurance and Annuity Company (PRIAC) assumes no responsibility for monitoring performance of the investment manager of any Institutional Select Fund. PERFORMANCE: When such funds have fewer than five years of performance history, three types of performance information are provided to assist you in choosing your plan's investment options. "Fund Performance" represents the actual performance of the fund for all periods since the inception date of the fund (which is shown in this line). "Manager's Composite" represents the composite return of multiple portfolios advised by the Manager since the inception date. These portfolios have an investment style and approach similar to the investment style of the fund. "Blended" represents a combination of the actual Fund performance and the current Manager's Composite performance. Actual Fund performance is used for periods after the fund was managed by the current Manager. For periods before the current Manager's assumption of Fund management, the Manager's Composite return is used. Therefore, when no Actual Fund performance with the current manager exists, the Blended performance line will equal the Manager Composite line. The inception date associated with this line is the inception date of the Manager's Composite. "Since Inception" returns are only provided when the inception date is less than 10 years ago. All performance is net of the expense ratio shown for that line.

Our pricing for your plan sometimes includes contract charges. If included, the contract charges would reduce the performance shown below. Any contract charges are disclosed to you. Regarding your members, the expense ratio shown in their statements and in the performance shown on their statements will reflect any contract charges imposed. The management fees, fund fees and contract charges compensate us for the distribution and servicing associated with your plan. Other plan investment options may generate more or less revenue for us than the fees associated with the fund you select. If the aggregate revenue from your plan exceeds our associated costs, we earn a profit. Otherwise, we incur a loss. Other plans investing in the Fund may have lower fees, but these are not available to your plan in order to compensate us for distribution and plan servicing.

For more information, please contact your Prudential Retirement Representative at 1-877-778-2100.

Shares of the registered mutual funds are offered through Prudential Investment Management Services LLC (PIMS), Newark, NJ. PIMS is a Prudential Financial company.

Investors should consider the fund's investment objectives, risks, charges and expenses before investing. The prospectus, and if available the summary prospectus, contain complete information about the investment options available through your plan. Please call 1-877-778-2100 for a free prospectus and if available, a summary prospectus that contain this and other information about our mutual funds. You should read the prospectus and the summary prospectus, if available carefully before investing. It is possible to lose money when investing in securities.

- ⊗ Small and mid sized companies may present greater opportunities for capital appreciation, but may also involve greater risks than larger companies. As a result, the value of stocks issued by these companies may fluctuate more than stocks of larger issuers.
- ⊕ Investing in foreign securities presents certain unique risks not associated with domestic investments, such as currency fluctuation and political and economic changes. This may result in greater share price volatility.
- ⊗ **The target date is the approximate date when investors plan to start withdrawing their money. The asset allocation of target date funds will become more conservative as the target date approaches by lessening your equity exposure and increasing your exposure in fixed income type investments. The principal value of an investment in a target date fund is not guaranteed at any time; including the target date.**
- * Fixed Income investment (bond) funds are subject to interest rate risk; their value will decline as interest rates rise.

Investing in securities involves risk, including the possible loss of principal. Unforeseen market conditions have the potential to maximize losses. Investors are urged to carefully consider their personal risk tolerance, retirement time horizon, and willingness to weather severe market downturns before making investment decisions.

Indexes are unmanaged and cannot be invested in directly.

Keep in mind that application of asset allocation and diversification concepts does not assure a profit or protect against loss in a declining market. **It is possible to lose money by investing in securities.**

For Manager of Managers Institutional Sub-Advised funds and Institutional Select Funds, ACTUAL PERFORMANCE MAY BE AFFECTED BY THE MANAGER NOT BEING ABLE TO INVEST DIRECTLY IN A COUNTRY PRIOR TO SATISFACTION OF THAT COUNTRY'S LEGAL REQUIREMENTS.

#Prudential Retirement's group variable annuity contracts are issued by Prudential Retirement Insurance and Annuity Company (PRIAC), Hartford, CT, a Prudential Financial company.

The Gibraltar Guaranteed Fund is a group annuity product issued by Prudential Retirement Insurance and Annuity Company (PRIAC), Hartford, CT 06103. Amounts contributed to the contract are deposited in PRIAC's general account. Payment obligations and the fulfillment of any guarantees specified in the group annuity contract are insurance claims supported by the full faith and credit of PRIAC. PRIAC periodically resets the interest rate credited on contract balances, subject to a minimum rate specified in the group annuity contract. Past interest rates are not indicative of future rates. This product is neither a mutual fund nor a bank product. The obligations of PRIAC are not insured by the FDIC or any other federal governmental agency.

Prudential Retirement is compensated in connection with this product when general account investment returns exceed the interest credited on contract balances. Prudential Retirement may earn fee revenue in addition to the foregoing compensation if your plan has agreed to pay contract charges, which are sometimes paid in respect of plan and participant recordkeeping and distribution services. For some plans, Prudential Retirement uses a portion of its aggregate compensation to satisfy the plan's request for allowances and for payments to defray plan expenses. If Prudential Retirement's aggregate compensation from this product and from other plan investment products exceeds the costs of servicing your plan, Prudential Retirement earns a profit; otherwise we incur a loss.

Frequent exchanging between plan investment options may harm long-term investors. Your plan or the plan's investment funds may have provisions to deter exchanges that may be abusive. These policies may require us to modify, restrict or suspend purchase or exchange privileges and/or impose redemption fees.

At times Prudential Retirement solicits and/or receives financial support for certain of its conferences from investment advisory firms. Please contact your Prudential Retirement representative for more information.

Return rank within category is the percentile ranking of an investment option's returns relative to the other investment options in its category. The highest ranking a fund can receive is 1. The lowest is 100.

The target date is the approximate date when investors plan to start withdrawing their money. The asset allocation of target date funds will become more conservative as the target date approaches by lessening your equity exposure and increasing your exposure in fixed income type investments. The principal value of an investment in a target date fund is not guaranteed at any time, including the target date.

In providing this information Prudential Retirement is not undertaking to provide impartial investment advice, or to give advice in a fiduciary capacity.

Prudential Retirement may benefit from advisory and other fees paid to it or its affiliates for managing, selling, or settling of the Prudential mutual funds and other investment products or securities offered by Prudential Retirement or its affiliates. Investment vehicles sponsored or managed by a Prudential Retirement affiliate generate more revenue for the Prudential enterprise than non-proprietary investment vehicles. Prudential Retirement's sales personnel generally receive greater compensation if plan assets are invested in proprietary investment vehicles. Prudential Retirement may benefit directly from the difference between investment earnings of Prudential Retirement's stable value funds and the amount credited to deposits in those funds. Prudential Retirement may also benefit from broker-dealer or other entities' co-sponsorship of Prudential conferences.

A market index is an unmanaged portfolio of securities such as stocks and bonds. An index is often used as a comparative benchmark for managed portfolios such as mutual funds. These indices are presented to help you evaluate the performance of the broad market which they represent, and provide you with an understanding of that market's historic long-term performance. They are an unmanaged weighted index providing a broad indicator of price movement. Individual investors cannot invest directly in an index/average. Past performance is not indicative of future results.

Bloomberg Barclays Agency Index : Bloomberg Barclays U.S. Agency Index accounts for roughly 35% of the Government Index and includes publicly issued debt of U.S. government agencies, quasi-federal corporations, and corporate or foreign debt guaranteed by the U.S. government.

Bloomberg Barclays Aggregate Bond Index : Bloomberg Barclays US Aggregate Bond Index measures the performance of investment grade, U.S. dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-through's), ABS, and CMBS. It rolls up into other Bloomberg Barclays flagship indices, such as the multi-currency Global Aggregate Index and the U.S. Universal Index, which includes high yield and emerging markets debt.

Bloomberg Barclays Asset-Backed Securities Index : Bloomberg Barclays U.S. Asset Backed Securities Index is a component of the U.S. Aggregate index. The Asset-Backed Securities (ABS) Index has five subsectors: (1) Credit and charge cards, (2) Autos, (3) Home equity loans, (4) Utility, and (5) Manufactured Housing. The index includes pass-through, bullet, and controlled amortization structures. The ABS Index includes only the senior class of each ABS issue and the ERISA-eligible B and C tranche.

Bloomberg Barclays Corporate High Yield Index : Bloomberg Barclays U.S. High Yield Index covers the universe of fixed rate, non-investment grade debt (having a maximum quality rating of Ba1), a minimum outstanding amount of \$150 million and at least one year to maturity.

Bloomberg Barclays Government Bond Index : The Bloomberg Barclays U.S. Government Index: measures the performance of the U.S. Treasury and U.S. Agency Indices, including Treasuries and U.S. agency debentures. It is a component of the U.S. Government/Credit Index and the U.S. Aggregate Index.

Bloomberg Barclays Mortgage-Backed Securities Index : Bloomberg Barclays U.S. Mortgage Backed Securities measures the performance of the agency mortgage-backed pass-through securities (both fixed-rate and hybrid ARM) issued by Ginnie Mae (GNMA), Fannie Mae (FNMA), and Freddie Mac (FHLMC).

Bloomberg Barclays Treasury Bond Index : Bloomberg Barclays U.S. Treasury Index accounts for nearly 65% of the Government Index and includes public obligations of the U.S. Treasury that have remaining maturities of more than one year.

Bloomberg Barclays U.S. Credit Index : The Bloomberg Barclays US Credit Index measures the performance of the US Corporate and a non-corporate component that includes foreign agencies, sovereigns, supranationals and local authorities. It is a subset of the US Government/Credit Index and the US Aggregate Index.

Bloomberg Barclays US Treasury: US TIPS Index : This index includes all publicly issued United States Treasury inflation-protected securities that have at least one year remaining until maturity, are rated investment grade, and have \$250 million or more of outstanding face value. In addition, the securities must be denominated in U.S. dollars, and must be fixed-rate and non-convertible securities. The index is a market capitalization-weighted index. Inflation notes were included in the broader Bloomberg Barclays U.S. Treasury Index in March 1997 and removed from that index on January 1, 1998.

Important Information about Investment Product Performance

Prudential Retirement constructs Asset Class Categories using MPI Stylus, a product of Markov Processes International LLC, and data provided by Morningstar™, Inc. Categories are constructed by using the appropriate Morningstar™, Inc. category and then removing duplicate share classes from the universe. Duplicate share classes are identified in a database field, and in general the share class with the longest history is used for category construction. Category medians and fund percentile rankings are then calculated using MPI Stylus and therefore may differ from those provided directly by Morningstar™, Inc.

Fund Specific Footnotes

Core Plus Bond / PGIM Fund - The Separate Account was established 7/18/2002. All performance results are net of the management fee for this Fund of 0.38%. Actual Fund performance is also net of other Fund operating expenses of 0.03% for the prior calendar year. Such Fund operating expenses may reflect the benefit of a commission recapture program. Fee waivers of 0.00% are in place for this Fund. Actual performance shown reflects the imposition of the foregoing expenses and the benefit of any fee waivers and commission recaptures. Effective 12/15/2014, PGIM, Inc. (formerly known as Prudential Investment Management, Inc or "PIM") replaced Pacific Investment Management Company, LLC as sub-advisor of the Separate Account. Performance prior to 12/15/2014 reflects that of Pacific Investment Management Company, LLC.

Glossary

Alpha

A measure of value added by a manager as compared to a passive portfolio with the same market sensitivity or beta. Alpha is a measure of return for residual, or non-market, risk, and is used to measure a manager's contribution to performance due to security or sector selection.

DDA

The Due Diligence Advisor Program employs a disciplined process to select, evaluate, and monitor the institutional sub-advised and mutual fund-based investment offerings. This Program helps to ensure that investments offered by Prudential Retirement are highly competitive and meet the varied investment requirements of retirement plan sponsors and their employees, as well as retirement plan consultants. The "Due Diligence Quartile Rank" provides an overall rank for each manager within the relevant style universe (e.g. Large Cap Stock – Growth). Each Fund is assessed on the basis of nominal risk-adjusted returns, and downside risk (versus and appropriate benchmark). These metrics are weighted based on 1-, 3-, and 5-year results with greatest emphasis place on long-term timeframes. Criteria are then used to generate an overall rating that determines a quartile distribution for the Fund within its peer group on a quarterly basis.

Expense Ratio

Investment returns are reduced by various fees and expenses. For each plan investment option, the column shows these charges as an annual percentage. Depending on the type of investment, these charges are paid to Prudential or to unaffiliated mutual fund complexes or bank collective trusts. If the plan has mutual fund investment options, the Expense Ratio is not reduced by any fee or expense waivers from the fund complex, and therefore the actual Expense Ratio may be lower. For other investment options, the benefit of any waivers is reflected in the Expense Ratio shown.

Some mutual funds and bank collective trusts, or their affiliates, compensate Prudential for selling their shares and servicing the retirement plan, as detailed in the Fact Sheet for that investment option. For other investment options, the charges reflected in the Expense Ratio are typically deducted by Prudential in return for investment and recordkeeping services, and product distribution. For some plans, the charges also enable Prudential to satisfy the plan's request for allowances to defray plan expenses. The retirement plan may not include investment options with lower fee structures or lower cost share classes in order to compensate Prudential, in the aggregate, for servicing the retirement plan.

Growth Stocks

Investors employing a growth investment strategy buy stocks of companies with a recent history of increasing earnings, in anticipation that earnings momentum will continue. Growth stocks are often characterized by high valuation ratios (e.g., price-to-earnings ratios). See also: value stocks.

Risk

This statistic measures the volatility of a stream of data compared to its average value. Applied to investment performance, standard deviation measures how "choppy" the monthly returns are over a period of time. 66% of all monthly values would fall within one standard deviation of the average, while 95% of all values would fall within two standard deviations of the average.

Sharpe Ratio

This statistic measures the quality of the returns for an investment on a risk-adjusted basis over a given period. It is defined as the excess returns of an investment divided by the standard deviation of returns. Excess returns are the returns of the investment minus the risk-free rate of return offered in the market, typically measured by short-term government instruments such as 3-month T-Bills. For two funds to have the same Sharpe Ratio, the fund with greater volatility must also deliver greater returns. (Sharpe Ratio = Excess Returns/Risk = (Returns on the Investment - Returns on T-Bills) / Standard Deviation)

Glossary

Value Stocks

Investors employing a value investment strategy buy stocks of companies they believe are under-priced based on their fundamental ability to generate earnings, in anticipation that the price performance of the stock will reverse. Value stocks are often characterized by low valuation ratios (e.g., price-to-earnings ratios). See also: growth stocks.

Risk-Return Charts

Investors who choose to take on additional risk do so in anticipation of higher returns. The risk-return charts are often used to compare investment performance to a benchmark on a risk-adjusted basis. A benchmark (typically an index or market average) is plotted on the chart along with a risk-free rate of return.

See also: Sharpe Ratio

Fund Rank Charts

In order to measure a fund's performance relative to a style specific benchmark and peer group or universe, funds and benchmarks are plotted relative to where they would rank within a given fund category. For example, the top line of the bar indicates the top 5th percentile return of the category. The 25th percentile return of the category is indicated by the second line. The median or 50th percentile return of the category is indicated by the third line. The 75th percentile return of the category is indicated by the fourth line. The bottom line of the bar indicates the 95th percentile return of the category.

Defined Contribution Fund Performance as of June 30, 2017 with July 31, 2017 update

The performance quoted represents past performance. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. Past performance does not guarantee future results. Current performance may be lower or higher than the performance data quoted. For performance information current to the most recent month end, please call 1-877-778-2100 or visit our website at www.prudential.com.

In providing this information Prudential Retirement is not undertaking to provide impartial investment advice, or to give advice in a fiduciary capacity.

†Performance is based on adjusted historical returns of the oldest share class of this fund, which has been adjusted to reflect the fees of the expenses of this share class

The following grid provides fund performance information, and other relevant performance and supplementary information concerning Institutional Select Funds, Sub-Advised Funds, and Proprietary Funds. Please see the EXPLANATION OF PERFORMANCE INFORMATION in the footnote section for more information on the performance shown.

EXPLANATION OF PERFORMANCE INFORMATION

The following tables provide fund performance information, and other relevant performance and supplementary information concerning Institutional Sub-Advised, Institutional Select and Proprietary Funds if applicable. For Institutional Sub-Advised and Institutional Select Funds, the PRIAC Separate Accounts hold the investment securities. Prudential Retirement Insurance and Annuity Company (PRIAC) assumes no responsibility for monitoring performance of the investment manager of any Institutional Select Fund. PERFORMANCE: When such funds have fewer than five years of performance history, three types of performance information are provided to assist you in choosing your plan's investment options. "Fund Performance" represents the actual performance of the fund for all periods since the inception date of the fund (which is shown in this line). "Manager's Composite" represents the composite return of multiple portfolios advised by the Manager since the inception date.

These portfolios have an investment style and approach similar to the investment style of the fund. "Blended" represents a combination of the actual Fund performance and the current Manager's Composite performance. Actual Fund performance is used for periods after the fund was managed by the current Manager. For periods before the current Manager's assumption of Fund management, the Manager's Composite return is used. Therefore, when no Actual Fund performance with the current manager exists, the Blended performance line will equal the Manager Composite line. The inception date associated with this line is the inception date of the Manager's Composite. "Since Inception" returns are only provided when the inception date is less than 10 years ago. All performance is net of the expense ratio shown for that line.

Our pricing for your plan sometimes includes contract charges. If included, the contract charges would reduce the performance shown below. Any contract charges are disclosed to you. Regarding your members, the expense ratio shown in their statements and in the performance shown on their statements will reflect any contract charges imposed. The management fees, fund fees and contract charges compensate us for the distribution and servicing associated with your plan. Other plan investment options may generate more or less revenue for us than the fees associated with the fund you select. If the aggregate revenue from your plan exceeds our associated costs, we earn a profit. Otherwise, we incur a loss. Other plans investing in the Fund may have lower fees, but these are not available to your plan in order to compensate us for distribution and plan servicing.

Footnotes

Your current funds are highlighted in yellow.

Funds represented in green text are closed and are no longer available as a new fund option to Plan Sponsors.

Outside Fund information offered through other firms was provided by the fund's custodian or from publicly available sources.

Prudential Retirement may benefit from advisory and other fees paid to it or its affiliates for managing, selling, or settling of the Prudential mutual funds and other investment products or securities offered by Prudential Retirement or its affiliates. Investment vehicles sponsored or managed by a Prudential Retirement affiliate generate more revenue for the Prudential enterprise than non-proprietary investment vehicles. Prudential Retirement's sales personnel generally receive greater compensation if plan assets are invested in proprietary investment vehicles. Prudential Retirement may benefit directly from the difference between investment earnings of Prudential Retirement's stable value funds and the amount credited to deposits in those funds. Prudential Retirement may also benefit from broker-dealer or other entities' co-sponsorship of Prudential conferences.

While past performance is never an indication of future results, short periods of performance may be particularly unrepresentative of long-term performance.

Funds offered by Prudential may be closed to new investors or new contributions at any time without prior notice.

Keep in mind that application of asset allocation and diversification concepts does not assure a profit or protect against loss in a declining market. **It is possible to lose money by investing in securities.**

For Manager of Managers Institutional Sub-Advised funds and Institutional Select Funds, ACTUAL PERFORMANCE MAY BE AFFECTED BY THE MANAGER NOT BEING ABLE TO INVEST DIRECTLY IN A COUNTRY PRIOR TO SATISFACTION OF THAT COUNTRY'S LEGAL REQUIREMENTS.

All returns are net of the management fees charged for the separate account and net of other operational expenses and are before any contract charges, if any, unless noted otherwise. Historical returns reflect actual account performance and the investment manager's composite, which may consist of one account. Performance is representative of each separate account's investment management discipline. All returns are deemed accurate at the time of reporting but are subject to change. For more information, please contact your Prudential Retirement Representative at 1-877-778-2100.

At times Prudential Retirement solicits and/or receives financial support for certain of its conferences from investment advisory firms. Please contact your Prudential Retirement representative for more information.

Gibraltar Guaranteed Fund - The Gibraltar Guaranteed Fund is a group annuity product issued by Prudential Retirement Insurance and Annuity Company (PRIAC), Hartford, CT 06103. Amounts contributed to the contract are deposited in PRIAC's general account. Payment obligations and the fulfillment of any guarantees specified in the group annuity contract are insurance claims supported by the full faith and credit of PRIAC. PRIAC periodically resets the interest rate credited on contract balances, subject to a minimum rate specified in the group annuity contract. Past interest rates are not indicative of future rates. This product is neither a mutual fund nor a bank product. The obligations of PRIAC are not insured by the FDIC or any other federal governmental agency.

Prudential Retirement is compensated in connection with this product when general account investment returns exceed the interest credited on contract balances. Prudential Retirement may earn fee revenue in addition to the foregoing compensation if your plan has agreed to pay contract charges, which are sometimes paid in respect of plan and participant recordkeeping and distribution services. For some plans, Prudential Retirement uses a portion of its aggregate compensation to satisfy the plan's request for allowances and for payments to defray plan expenses. If Prudential Retirement's aggregate compensation from this product and from other plan investment products exceeds the costs of servicing your plan, Prudential Retirement earns a profit; otherwise we incur a loss.

Frequent exchanging between plan investment options may harm long-term investors. Your plan or the plan's investment funds may have provisions to deter exchanges that may be abusive. These policies may require us to modify, restrict or suspend purchase or exchange privileges and/or impose redemption fees.

Prudential Day One® 2010 Fund - Performance shown beginning 02/15/2013 represents the actual performance track record of the Day One 2010 Fund. DDA Rank - The DDA Rank represents the quartile ranking assigned to the fund in the latest Due Diligence Advisor Program Report. Each separate account is assessed on the basis of nominal and risk adjusted returns, and downside and relative risk (versus an appropriate benchmark). These metrics are weighted based on 1-, 3- and 5-year results, with greatest emphasis placed on long term timeframes. Due Diligence Quartile Ranks shown are based on the last available Due Diligence Analysis (as of June 30, 2017), among the following peer group universe totals. ***Please note new process has Institutional Sub-Advised and RBSA funds utilize gross performance peer groups while Alliance funds utilize net performance peer groups.***

Prudential Retirement constructs Asset Class Categories using MPI Stylus, a product of Markov Processes International LLC, and data provided by Morningstar™, Inc. Categories are constructed by using the appropriate Morningstar™, Inc. category and then removing duplicate share classes from the universe. Duplicate share classes are identified in a database field, and in general the share class with the longest history is used for category construction. Category medians and fund percentile rankings are then calculated using MPI Stylus and therefore may differ from those provided directly by Morningstar™, Inc.

Alpha - A measure of value added by a manager as compared to a passive portfolio with the same market sensitivity or beta. Alpha is a measure of return for residual, or non-market, risk, and is used to measure a manager's contribution to performance due to security or sector selection.

Expense Ratio - Expense Ratio includes management fee charges by the fund's Investment Manager against the fund's assets for managing the portfolio as well as for such services as shareholder relations or investment-related administration (fund analysis and research, etc.), 12(b)-1 fee [Mutual funds may charge this fee against the fund's assets to cover distribution expenses incurred by the fund], if applicable, "Other Expenses" [Charges by the fund's sponsor against the fund's assets for additional operating expenses. For example: related legal fees, auditing expenses, compliance with governmental regulations, mailing or postage costs, etc. The amount included for Prudential Institutional Sub-Advised and Proprietary Funds is actual for the prior calendar year end]. The benefit of any "Fee Waivers" would be reflected in the Expense Ratio. Expense Ratio is prior to any contract-related charges.

Risk - This statistic measures the volatility of a stream of data compared to its average value. Applied to investment performance, standard deviation measures how "choppy" the monthly returns are over a period of time. 66% of all monthly values would fall within one standard deviation of the average, while 95% of all values would fall within two standard deviations of the average.

Sharpe Ratio - This statistic measures the quality of the returns for an investment on a risk-adjusted basis over a given period. It is defined as the excess returns of an investment divided by the standard deviation of returns. Excess returns are the returns of the investment minus the risk-free rate of return offered in the market, typically measured by short-term government instruments such as 3-month T-Bills. For two funds to have the same Sharpe Ratio, the fund with greater volatility must also deliver greater returns.

Sharpe Ratio = Excess Returns/Risk = (Returns on the Investment - Returns on T-Bills) / Standard Deviation

S&P 500® Growth Index

S&P 500® Growth Index: Standard & Poor's and Citigroup cooperate to employ a value calculation, whereby the market capitalization of the S&P 500 Index uses a multi-factor methodology to calculate growth and value in separate dimensions. Style scores are calculated taking standardized measures of 3 growth factors and 4 value factors for each constituent.

S&P 500® Index

S&P 500® Index (registered trademark of The McGraw-Hill Companies, Inc.) is an unmanaged index with over US \$5.58 trillion benchmarked (index assets comprising approximately US \$1.31 trillion of this total) that includes 500 leading companies in leading industries of the U.S. economy, capturing 75% coverage of U.S. equities.

S&P 500® Value Index

For the S&P 500/Citigroup Value Index, Standard & Poor's and Citigroup cooperate to employ a value calculation, whereby the market capitalization of the S&P 500 Index is divided equally between growth and value. The value component recognizes undervalued companies within the S&P 500 Index, which have lower price/book value ratios. The index is re-balanced semi-annually.

S&P Composite 1500® Index

The S&P Composite 1500® Index measures the performance of widely available, liquid stocks in US equity market. It combines three leading indices - S&P 500, S&P MidCap 400, and S&P SmallCap 600, to cover approximately 90% of the US market capitalization.

S&P Mid Cap 400® Index

The S&P Mid Cap 400® Index includes 400 companies, and represents about 7% of the U.S. equities market. To be eligible for addition to the index, companies must have a market capitalization between US \$1 billion and US \$4.4 billion.

The calculated returns shown above are the weighted average returns of the underlying funds for the GoalMaker portfolios based on model allocations prior to **06/30/2017**. Returns are net of product expenses and fees and before any contract charges, with the exception of any fees the sponsor may have directed to be deducted from participant accounts. **Past performance does not guarantee future results.** The performance shown for the GoalMaker portfolios is for illustrative purposes only and does not reflect the actual experience of any individual participant in the program. This performance was calculated with the retroactive application of a model with the benefit of hindsight. **The performance shown above 1) was rebalanced on a (Quarterly) basis as per your plan 2) assumes no changes to the asset allocation percentages or to the investment options for the relevant periods 3) assumes that an individual was enrolled in GoalMaker for the entire relevant time period and 4) assumes an initial investment but does not include the effect of periodic contributions or withdrawals.**

²⁴⁸The Guaranteed Income Fund (GIF) is a group annuity product issued by Prudential Retirement Insurance and Annuity Company (PRIAC), Hartford, CT 06103. Amounts contributed to the contract are deposited in PRIAC's general account. Payment obligations and the fulfillment of any guarantees specified in the group annuity contract are insurance claims supported by the full faith and credit of PRIAC. However, if you are a participant in a nonqualified deferred compensation plan, GIF may be only a reference account that is used to determine the plan's liability to you, and may not represent an actual investment in the group annuity. PRIAC periodically resets the interest rate credited on contract balances, subject to a minimum rate specified in the group annuity contract. Past interest rates are not indicative of future rates. This product is neither a mutual fund nor a bank product. The obligations of PRIAC are not insured by the FDIC or any other federal governmental agency. Prudential Retirement is compensated in connection with this product when general account investment returns exceed the interest credited on contract balances. Prudential Retirement may earn fee revenue in addition to the foregoing compensation if your plan has agreed to pay contract charges, which are sometimes paid in respect of plan and participant recordkeeping and distribution services. For some plans, Prudential Retirement uses a portion of its aggregate compensation to satisfy the plan's request for allowances and for payments to defray plan expenses. If Prudential Retirement's aggregate compensation from this product and from other plan investment products exceeds the costs of servicing your plan, Prudential Retirement earns a profit; otherwise we incur a loss. Frequent exchanging between plan investment options may harm long-term investors. Your plan or the plan's investment funds may have provisions to deter exchanges that may be abusive. These policies may require us to modify, restrict or suspend purchase or exchange privileges and/or impose redemption fees.

In providing this information Prudential Retirement is not undertaking to provide impartial investment advice, or to give advice in a fiduciary capacity. Prudential Retirement may benefit from advisory and other fees paid to it or its affiliates for managing, selling, or settling of the Prudential mutual funds and other investment products or securities offered by Prudential Retirement or its affiliates. Investment vehicles sponsored or managed by a Prudential Retirement affiliate generate more revenue for the Prudential enterprise than non-proprietary investment vehicles. Prudential Retirement's sales personnel generally receive greater compensation if plan assets are invested in proprietary investment vehicles. Prudential Retirement may benefit directly from the difference between investment earnings of Prudential Retirement's stable value funds and the amount credited to deposits in those funds. Prudential Retirement may also benefit from broker-dealer or other entities' co-sponsorship of Prudential conferences.

These model portfolios are provided as samples and not as investment recommendations. The model portfolios are based on generally accepted investment practices and take into account the principles of modern portfolio theory, in which allocations are adjusted in an effort to achieve maximum returns for a given level of risk. Participants using GoalMaker should consider other assets, income, and investments (e.g. equity in a home, Social Security benefits, individual retirement plan investments, etc.) in addition to the interest in the plan, to the extent those items are not taken into account in the model before applying these models to their individual situation. **Past performance of investments or asset classes does not guarantee future results.**

¹⁸²⁴Performance shown beginning 09/22/2009 represents the actual performance track record of the Prudential Day One IncomeFlex Target Balanced Fund. Performance prior to 09/22/2009 represents simulated performance based on the historical track record of the underlying funds in the fund-of-funds structure, weighted in accordance with the asset allocation of each underlying fund as specified by the Prudential Day One IncomeFlex Target Balanced Fund's glidepath, beginning with the Glidepath Inception Date of June 30, 2009 ("Glidepath Performance").

¹⁸⁸⁰Effective 9/30/13, the Prudential Incomeflex Target EasyPath funds will change their name to Prudential Day One Incomeflex Target funds.

¹⁸⁹⁴Glidepath Performance is adjusted to reflect the fees and expenses of the Fund, and reflects daily rebalancing and annual ratcheting along the Fund's glidepath. Glidepath Performance is based on hypothetical performance results. Unlike the results shown in the actual performance track record of the Funds, as applicable, Glidepath Performance results do not represent actual trading and may not reflect the impact of material economic and market factors, such as lack of liquidity.

¹⁹⁰⁶The performance in this report is based, in part, on adjusted historical returns of the oldest share class of the fund, which has been adjusted to reflect the fees and expenses of this share class.

¹⁹⁷⁷Effective January 4, 2016, Prudential Investment Management (PIM) rebranded itself as PGIM. As a result, the Core Plus Bond / PIM Fund is now known as the Core Plus Bond / PGIM Fund.

In providing this information Prudential Retirement is not undertaking to provide impartial investment advice, or to give advice in a fiduciary capacity. Prudential Retirement may benefit from advisory and other fees paid to it or its affiliates for managing, selling, or settling of the Prudential mutual funds and other investment products or securities offered by Prudential Retirement or its affiliates. Investment vehicles sponsored or managed by a Prudential Retirement affiliate generate more revenue for the Prudential enterprise than non-proprietary investment vehicles. Prudential Retirement's sales personnel generally receive greater compensation if plan assets are invested in proprietary investment vehicles. Prudential Retirement may benefit directly from the difference between investment earnings of Prudential Retirement's stable value funds and the amount credited to deposits in those funds. Prudential Retirement may also benefit from broker-dealer or other entities' co-sponsorship of Prudential conferences.

These model portfolios are provided as samples and not as investment recommendations. The model portfolios are based on generally accepted investment practices and take into account the principles of modern portfolio theory, in which allocations are adjusted in an effort to achieve maximum returns for a given level of risk. Participants using GoalMaker should consider other assets, income, and investments (e.g. equity in a home, Social Security benefits, individual retirement plan investments, etc.) in addition to the interest in the plan, to the extent those items are not taken into account in the model before applying these models to their individual situation. **Past performance of investments or asset classes does not guarantee future results.**

Termination - A withdrawal that is taken when the participant is active and terminating from employment or is already in a 'Terminated' status.

Installment Payment - An Installment distribution is a payment option that disburses funds over time (i.e. monthly, quarterly, yearly).

Death Distribution - Distribution taken by a beneficiary. This could include required minimum distributions, installment payments, etc.

QDRO - Distribution taken by the recipient of a QDRO. This could include required minimum distributions, installment payments, etc.

Required Minimum Distribution - Minimum amounts that a participant must withdraw annually upon reaching a certain age or retirement. This would exclude any beneficiary or QDRO accounts.

Small Balance Cashout - Distribution of a participant's account when they fall below the cash out threshold set by the plan.

Gross Adjustment - The total of all adjustments made to an account or plan in absolute terms, regardless of whether or not the adjustments were positive or negative.

In-Service Withdrawal - A distribution that is taken while the participant is still active, before termination from employment.

Total Retirement Income Calculator Completions - Number of RIC completions for the given time period. If a single participant completed the RIC multiple times within the given time period, they would be counted multiple times.

Unique Completions: Total number of unique active/eligibles that completed the retirement income calculator during the reporting period

Contribution Rate Increases: Total number of active/eligibles that completed the retirement income calculator and increased their contribution rate.

Average Balance RIC Participant - For participants who have a balance greater than \$0 that have previously completed the RIC - The total balance of active participants divided by the total count of active participants

Average Balance Non-RIC Participant - For participants who have a balance greater than \$0 that have NOT previously completed the RIC - The total balance of active participants divided by the total count of active participants

Average Contribution Rate RIC Participant - For participants who have completed the RIC - The total of all contribution rates (%) for active participants who have completed the RIC divided by the number of active participants that have completed the RIC who have non-zero contribution rates.

Average Contribution Rate Non RIC Participant - For participants who have NOT completed the RIC - The total of all contribution rates (%) for active participants who have completed the RIC divided by the number of active participants that have completed the RIC who have non-zero contribution rates.

Average Income Replacement, RIC Participant - Calculated by summing the income replacement percentages of all active, eligible & suspended participants who have completed the RIC divided by the total count of all those active, eligible & suspended participants that have completed the RIC. Individuals not enrolled in the plan are excluded from the calculation.

Average Income Replacement, Non- RIC Participant - Calculated by summing the income replacement percentages of all active, eligible & suspended participants who have not completed the RIC divided by the total count of all those active, eligible & suspended participants that have completed the RIC. Individuals not enrolled in the plan are excluded from the calculation.

Participant - An individual who has enrolled in the plan and has a non-zero account balance.

Termination - A withdrawal that is taken when the participant is active and terminating from employment or is already in a 'Terminated' status.

Installment Payment - An Installment distribution is a payment option that disburses funds over time (i.e. monthly, quarterly, yearly).

Required Minimum Distribution - Minimum amounts that a participant must withdraw annually upon reaching a certain age or retirement. This would exclude any beneficiary or QDRO accounts.

In-Service Withdrawal - A distribution that is taken while the participant is still active, before termination from employment.

Death Distribution - Distribution taken by a beneficiary. This could include required minimum distributions, installment payments, etc.

Hardship Withdrawal - A distribution which is requested by a participant because of an immediate and heavy financial need that cannot be satisfied from other resources.
