- a) The application shall be accompanied by the following information:
 - 1) A plot plan showing the location, orientation and the general size of runways, taxiways, aprons, clear zones, approach zones and proposed accessory structures and uses including fuel storage, as well as dimensions to property lines and section lines, roadways, railroads and above ground structures including poles, towers, wires and appurtenances thereto;
 - 2) The planned type and use of aircraft for which the facility is intended;
 - i. The estimated number of aircraft for which the facility is intended;
 - ii. The estimated frequency of flights and hours of operation;
 - iii. Diagram of the flight pattern to be used in and out of the landing area;
 - iv. Drainage and grading plan of the site;
 - v. Length, width, surface and lighting facilities of the airfield;
 - vii. Location and height of any obstructions that could obstruct or penetrate the normal 20:1 approach slopes to the runway threshold or end;
 - vii. The distance and difference in elevation between the end of the runway and any public roadways, railroads and all utility transmission and distribution facilities and towers that are located in the approach and clear zones;
- b) The site shall be located in such a manner so as not to compromise the safety of or create excessive noise for the existing schools, hospitals, theaters and nursing homes. However, nothing in this provision shall deny essential air service to hospitals and nursing homes, if needed, provided that landing and takeoff facilities for emergency aircraft are provided in accordance with applicable State and Federal regulations;
- c) The operation shall not result in air pollution and noise generation exceeding appropriate local, State and Federal standards;

d) No structures shall be located within approach and clear zones if such structures encroach upon the airspace required for the safe operation of aircraft for which the airfield is intended;

e) No use of the airfield permitted nor the immediately adjacent property shall create electrical interference with aerial navigational signals or radio communication or aircraft overflying the airfield, result in glare in the eyes of pilots using or overflying the airfield, or otherwise in any way endanger or interfere with landing, takeoff, or maneuvering of aircraft using or flying in the vicinity of the airfield;

f) Measures may be required to mitigate adverse impacts associated with the flight operations. Uses within the approach zone may be required to be under the control of the applicant through restrictive easements or ownership of the property;

g) Lighting devices such as flood lights and spot lights shall be so designed or shielded as not to cast illumination in an upward direction above an imaginary line extended from the light source parallel to the ground. This provision shall not prohibit the installation of runway and taxiway lighting systems designed for the safe operation of aircraft or other safety enhancements such as visual approach slope indicator (VASI) or precision approach path indicator (PAPI) lighting systems;

h) No permit shall be granted for an airfield that would conflict with the traffic patterns, approach zones or reserved air space of an existing airport or airfield;

i) The design of an airfield shall meet the applicable State and Federal regulations and the following requirements:

1) The effective runway length for a paved runway shall be at least 1,400 feet plus 25% of the elevation of the site measured in North American Vertical Datum (NAVD 88). The effective length for a turfed runway or landing area shall be 1,800 feet, plus the 25% correction of the elevation. Notwithstanding the above, documents submitted before March 1, 2000 may be submitted in either NAVD 1988 or in elevations measured in relation to mean sea level.

2) The approach surface to each end of each turfed runway extends outward from the runway, and shall be unobstructed along a 20:1 vertical slope for a horizontal distance of 1,000 feet. The width of the approach slope is to be 250 feet at the beginning and widens out to a width of 450 feet at a distance of 1,000 feet from the beginning of the approach slope. The approach slope shall begin at a point 200 feet outward from the runway threshold, or at the turfed runway threshold (normally at the end of the turfed runway), or at a marked displaced threshold.

3) The runway (the paved surface) shall be 40 feet or more in width, and the turfed runway shall be 100 feet or more in width. There shall be a primary surface (unobstructed area) 250 feet in width, 125 feet on each side of the runway or the turfed runway centerline. The primary surface shall extend the full length of the turfed runway. All structures beyond the primary surface and the approach slope shall clear a 7:1 transitional or lateral slope as measured from the outside edge of the primary surface or approach slope.

4) The aircraft parking apron area, all buildings, structures, fences, and vehicle parking areas shall be located outside the primary surface and clear the 7:1 lateral slopes along the surface.

5) All farm crops (except hay) are considered as structures. The height of such structures shall be considered the height of the crops when fully grown, regardless of the crops actual height at any specific time.

6) Roads and railroads are considered to be structures or obstructions 15 feet

and 23 feet high respectively above their traveled surface when determining obstructions. An interstate highway shall be cleared by 17 feet above the closest edge of a paved surface.

7) The effective length of a paved runway or turfed runway is determined as the total distance between thresholds, plus the length of the shortest overrun area, when both thresholds are displaced.

8) The threshold of a turfed runway is considered to be that point on the runway end, properly marked, from which a clear 20:1 approach slope is available. The threshold of a paved runway is 200 feet inside the threshold of the turfed runway.

9) The approach must provide a 150 feet clear height over any residential zoned area, 100 feet over any agriculture residential zoned area and safe and reasonable clearances over utility lines, poles, towers and appurtenances, which may be located in the path of any runway.

j) The design of a family airfield shall meet the following:

1) The approach must provide a 150 feet clear height over any residential zoned area, 100 feet over any agriculture residential zoned area and safe and reasonable clearances over utility lines, poles, towers and appurtenances, which may be located in the path of any runway.

2) The minimum effective length of a paved runway shall be 300 feet. The turfed-runway shall be 200 feet longer than the paved runway (100 feet on each end). The turfed runway is required, but the paved runway is optional.

3) The paved runway shall be 25 feet or more in width, and the turfed runway shall be at least 50 feet wide. There shall be a primary surface (unobstructed area) along the full length of the turfed runway. All structures beyond the primary surface and the approach slope shall clear a 7:1 transitional or lateral slope as measured from the outside edge of the primary surface or approach slope.

4) The approach surface to each end of each paved or turfed runway extends outward along the runway centerline and shall be unobstructed along a 10:1 vertical slope for a horizontal distance of 500 feet. The approach slope shall begin at the turfed runway threshold or at a properly marked displaced threshold. The width of the approach slope shall be 50 feet at the beginning and widen out to 150 feet at a distance of 500 from the beginning. The surface area beneath the approach zone shall be controlled by ownership, fee title or easement.

5) The runway centerline extended shall not cross any existing building within 1/4 mile of the end of the runway.

6) The runway shall be set back 50' from all lot lines.

6) Runway lighting shall be limited to 45 watts in power. No more than 36" above grade and producing no more than 1/2 footcandle of illumination as measured at the property line.

7) A "bubble" of clearance of 200' over and around all buildings shall be maintained.

8) Flight operations shall be prohibited from 10 PM to 5 AM.

9) Abutting property/families may use the same runway provided there are no more than four (4) properties, each of which has at least 150' of frontage on the runway.

The current condition NPL noise levels shall be established by conducting noise monitoring at the closest residence(s) in outside areas that will likely be actively used for the enjoyment of their property.

- 1) Noise samples shall be acquired continuously for one hour using a one second sampling rate.
- 2) The sound level meter shall be set to the "A" weighting and "fast" mode.

Such sound mitigation strategies shall be signed by an accredited engineer with specialty or advanced knowledge in acoustics. The noise mitigation plan shall be submitted to the Health Department for review and recommendation for approval or denial. The Health Department shall take no action to recommend approval or denial of the plan within **thirty (30)** days of receipt.

9) Prior to operation, the race track, drag strip or motor sports facility shall install an approved continuous noise monitoring device at a location to be determined by the Health Department. Data collected from this monitor shall be made available to the Health Department. The Health Department shall be provided access to the race track, drag strip or motor sports facility at any reasonable time to inspect, investigate complaints or conduct noise monitoring.

j) The operation of a race track, drag strip or motor sports facility may exceed the noise sound level set forth in Section 13.016(d) for a certain number of events each calendar year upon approval by the Planning Commission. At the time of application for the special permit, the applicant shall request the number of events it proposes to exceed the noise level set forth in Section 13.016(d) each calendar year. In the event the applicant wishes to amend the number of event exceptions in any given year, the applicant must request an amendment to the special permit. The Planning Commission shall act on such request after holding a public hearing. (Resolution No. R-11-0023, March 29, 2011)

The County Board may amend any of the above conditions of the special permit, or impose additional conditions, upon a showing that such conditions are reasonably related to the interest of public health, safety, ~~morals~~, and the general welfare. (Resolution No. R-07-0061; July 24, 2007)

13.048. Commercial Wind Energy Conversion System (CWECS).

A Commercial Wind Energy Conversion System (CWECS) may be allowed in the AG District by special permit under the conditions listed below:

a) In cases where CWECS wind turbines are part of a unified plan, parcels which are separated from one another only by the presence of public right-of-way may be combined into one special permit application. When a special permit covers multiple premises, the lease or easement holder may sign the application rather than the lot owner.

b) Turbines shall meet all FAA requirements, including but not limited to lighting and radar interference issues. Strobe lighting shall be avoided if alternative lighting is allowed. Color and finish shall be white, gray or another non-obtrusive, non-reflective finish. There shall be no advertising, logo, or other symbols painted on the turbine other than those required by the FAA or other governing body. Each turbine shall have onsite a name plate which is clearly legible from the public right-of-way and contains contact information of the operator of the wind facility.

c) Each application shall have a decommissioning plan outlining the means, procedures and cost of removing the turbine(s) and all related supporting infrastructure and a bond or equivalent enforceable resource to guarantee removal and restoration upon discontinuance, decommissioning or abandonment. Each tower shall be removed within one year of decommissioning or revocation of the special permit. Upon removal of the tower, there shall be four feet of soil between the ground level and former tower's cement base.

d) Any proposed turbine which is within half mile of any non-participating dwelling shall provide shadow flicker modeling data showing the expected effect of shadow flicker on

non-participating properties. Shadow flicker shall not fall upon any non-participating dwelling, or other building which is occupied by humans, for more than a total of 30 hours per any calendar year. If shadow flicker exceeds these limits, measures shall be taken to reduce the effects of shadow flicker on buildings, which may include shutting the turbine down during periods of shadow flicker. If a turbine violates this standard on a non-participating dwelling unit, constructed after the turbine is approved, then the turbine becomes a non-conforming use.

e) Construction and operation shall not adversely impact identified State or Federal threatened or endangered species such as saline wetlands, or rare natural resources such as native prairie and grasslands.

f) No turbine shall obstruct or impair an identified view corridor or scenic vista of public value, as mapped on the Capitol View Corridors map in the Lincoln/ Lancaster County Comprehensive Plan. The views from prominent environmental areas, such as Nine Mile Prairie and Spring Creek Prairie, shall also be protected from adverse visual or noise impacts. Any application which, upon initial review, poses a possible impact to these views will be required to be relocated or provide view shed mapping, and visual simulations from key observation points for review.

g) Setbacks to the turbine base:

- 1) For the purposes of this section, "turbine height" shall be equal to hub height plus the rotor radius.
- 2) For a non-participating lot, the setback shall be 2 times the turbine height measured to the property line, or 3 ½ times the turbine height, measured to the closest exterior wall of the dwelling unit, whichever is greater, but at a minimum 1,000 feet to the property line.
- 3) For participating dwelling units, the setback shall be 2 times the turbine height measured to the closest exterior wall of the dwelling.
- 4) The setback to any public right-of-way or private roadway shall be no less than the turbine height.
- 5) Setbacks to the external boundary of the special permit area shall be no less than as stated above, except that the owner of the adjacent property may sign an agreement allowing that setback to be reduced to the rotor radius plus the setback of the zoning district.

h) The turbine(s) shall not impact a non-participating lot, (vacant or occupied; of any size), to the extent that, because of the location of turbine(s), the lot owner is left with less than three (3) acres of land outside of the CWECS setbacks and of the noise impact area in Section (i) below, unless they are part of an agreement with the CWECS owner/operator.

i) Noise: No CWECS or combination of CWECS turbine(s) shall be located as to cause an exceedance of the following as measured at the closest exterior wall of any dwelling located on the property. If a turbine violates a noise standard on a dwelling unit, constructed after the turbine is approved, then the turbine becomes a non-conforming use. For both participating and nonparticipating properties:

- 1) From the hours of 7 am to 10 pm:
 - i. Forty (40) dBA maximum 10 minute Leq or;
 - ii. Three (3) dBA maximum 10 minute Leq above background level as determined by a pre-construction noise study. The background level shall be a Leq measured over a representative 15 hour period.
- 2) From the hours of 10 pm to 7 am:
 - i. Thirty-seven (37) dBA maximum 10 minute Leq or;
 - ii. Three (3) dBA maximum 10 minute Leq above background level as determined by a pre-construction noise study. The background level shall be a Leq measured over a representative 9 hour period.

- j) A professional pre-construction noise study shall be conducted which includes all property within one mile of a tower support base. The protocol and methodology for such studies shall be submitted to the Lincoln-Lancaster County Health Department for review and approval. Such studies shall include noise modeling for all four seasons and include typical and worst case scenarios for noise propagation. The complete results and full study report shall be submitted to the Lincoln-Lancaster County Health Department for review.
- k) Prior to the commencement of construction of any turbine, pre-construction noise monitoring may be conducted to determine ambient sound levels in accordance with procedures acceptable to the Lincoln-Lancaster County Health Department.
- l) Prior to the commencement of construction of any turbine, the applicant shall enter into an agreement with the County Engineer regarding use of County roads during construction.
- m) At the discretion of the County Board, post-construction noise level measurements may be required to be performed in accordance with procedures acceptable to the Lincoln-Lancaster County Health Department.
- n) All noise complaints regarding the operation of any CW ECS shall be referred to the County Board. The County Board shall determine if noise monitoring shall be required to determine whether a violation has occurred. (Resolution No. R-15-0061, November 24, 2015; Resolution No. R-11-0022, March 29, 2011)

24.120 Designation of Landmarks and Landmark Districts.

A site, structure, or area may be designated as a landmark or landmark district if it is of historical, cultural, architectural, or archeological importance as evidenced by meeting one or more of the following standards for designation:

- (a) Associated with events, person, or persons who have made a significant contribution to the history, heritage, or culture of the County of Lancaster, the State of Nebraska, or the United States;
- (b) Represents a distinctive architectural style or innovation, or is the work of a craftsman whose individual work is significant in the development of the County of Lancaster, the State of Nebraska, or the United States; or
- (c) Represents archeological value in that it yields or may be likely to yield information pertaining to prehistory or history.

Any person, group of persons, or association may request the designation of a landmark or landmark district by submitting a petition for such designation to the Planning Department upon a form furnished by the Planning Department. The Preservation Commission, in addition, may on its own motion submit a petition for designation. The Planning Director shall transmit all petitions to the Preservation Commission.

Each petition forwarded to the Preservation Commission by the Planning Director shall be considered by the Preservation Commission at a public hearing with a public record kept. Notice of the time, place, and purpose of such public hearing shall be published by the Planning Department in a daily newspaper having general circulation in Lancaster County and shall be mailed to the owners of all property included in the proposed designation not less than eight (8) days prior to the date of the hearing, using for this purpose the name and addresses of the last known owners as indicated by the real property tax records of Lancaster County. The Preservation Commission may also give such other notice as may be deemed desirable and practicable.

Whenever possible, the Preservation Commission shall secure the written consent of the owner or owners before proceeding to secure designation as a landmark. The Preservation Commission shall apply the "standards for designation" in its decision.

Within ninety (90) days of the receipt of the petition by the Planning Department, the Preservation Commission shall approve, disapprove, or modify the petition and shall notify the petitioner of its action. Petitions which are approved or approved as modified shall then be transmitted to the Planning Commission. Along with the petition, the Preservation Commission

shall include a justification for the designation as a landmark or landmark district and its recommendations for guidelines for preservation of the landmark or landmark district.

The Planning Commission shall consider the petition at a public hearing with a public record kept. Notice of the hearing including posting of property shall be made according to County Zoning regulations Article 22.005. Such posting shall include the property contained in the original petition and the modified petition, if any, unless the applicant and the Preservation Commission agree otherwise. The Planning Commission shall consider the petition in light of the "standards for designation" and the degree of conformity with the Lincoln/Lancaster County comprehensive plan. Within sixty (60) days, the Planning Commission shall recommend approval, disapproval, modification, or continuance of the petition and shall notify the petitioner of its actions. All petitions for property within the County's zoning jurisdiction except for those held for continued consideration shall then be transmitted to the County Board.

Upon receipt of a petition, the County Board may designate a landmark or landmark district by ordinance. The County Board shall consider the "standards for designation" as well as the recommendations of the Planning Director, the Preservation Commission, and Planning Commission, and shall further give consideration to the economic consequences to the county and to the affected owners. The designation shall be by majority vote, except that if any owner of property to be designated as a landmark does not consent to such designation, the vote shall be by two-thirds of the board members. A landmark district shall not be designated if written protests are made by owners of at least fifty-one percent of the included property, excluding public right-of-way, at or prior to public hearing on the designating ordinance. The sufficiency of such protests shall be determined by the County Board.

Each designating ordinance shall include a description and statement of the significance of the landmark or landmark district to justify its designation and a description of the particular features that should be preserved, a guideline for preservation of the landmark or landmark district including particular restrictions as to construction, alteration, repair, or demolition of the landmark or property within the landmark district, and the legal description of the landmark or landmark district.

Within ten (10) days after the effective date of the ordinance designating property as a landmark or a landmark district, the Planning Director shall send to the owner of record of such property so designated or each property within the designated landmark district, by registered or certified mail, a copy of the designating ordinance and a letter outlining the basis for such designation and the obligations and restrictions which result from such designation. Immediately after the effective date of the ordinance designating property as a landmark or landmark district, the County Clerk shall file certified copies of the designating ordinance with the Register of Deeds and with the Department of Building and Safety.

24.130 Requirement of Certificate for Certain Work.

No person shall carry out or cause to be carried out on a landmark or in a landmark district any change in the appearance of a landmark or landmark district for which a building permit or demolition permit is required, or any change restricted by the particular designating ordinance without a certificate issued by the Preservation Commission or the Planning Director as described below. Ordinary maintenance and repair not otherwise subject to a building permit regulation or restricted by the designating ordinance may be carried out without a certificate issued by the Preservation Commission.

24.140 Procedure for Certificate.

The application for such certificate shall be filed with the Planning Department and shall be accompanied by plans for the proposed work to be done and such other information as the Director of Planning shall require. The application and plans shall be referred to the Department of Building and Safety to review the application and plans for compliance with the existing building code ordinances and regulations.

The Planning Director may issue a certificate of "no material effect" if the application is for work which is not restricted by the designating ordinance and if the work contemplated in the application will have no effect on any architectural features of the landmark or landmark district as detailed in the particular designating ordinance and will be in harmony therewith.

Other applications shall be transmitted by the Planning Department to the Preservation Commission along with any recommendations by the Department of Building and Safety and the Planning Department. Within sixty (60) days of receipt of the application by the Department of Planning, the Preservation Commission shall hold a public hearing on the applications received by the Preservation Commission. Notice of the time, place, and purpose of such hearing shall be published by the Planning Department in a daily newspaper having a general circulation in Lancaster County and shall be mailed to the certificate applicant not less than eight (8) days prior to the date of hearing. The Preservation Commission may also give such other notice as may be deemed desirable and necessary, including posting of the property affected.

During the public hearing, the Preservation Commission shall review the application and plans in light of the guideline for preservation of the property contained in the particular preservation designation ordinance for that landmark or landmark district.

24.150 Certificate Approval or Denial.

Within forty-five (45) days of the hearing, the Preservation Commission shall approve or deny the application for the certificate for certain work on the landmark or in a landmark district.

The Preservation Commission:

- (a) May issue a certificate of "appropriateness" if, after focusing upon aesthetic, historical, and architectural values, it finds that the proposed work would not unduly hinder the protection, enhancement, perpetuation, and use of the landmark or landmark district;
- (b) May issue a certificate of "exception on the ground of insufficient return or hardship" if it finds that the landmark or property within the landmark district cannot yield a reasonable return if the proposed work is not permitted, that the plight of the applicant is due to unique circumstances, and that the hardship is the result of the application of the ordinance and is not the result of any act or omission by the applicant; or
- (c) May refuse to issue a certificate, if it finds that the application does not meet any of the above criteria.

The Preservation Commission's decision must be accompanied by written findings of fact. No change shall be made in the application for any building permit after issuance of a certificate by the Preservation Commission or the Planning Director without resubmittal to the Preservation Commission or the Planning Director and approval in the same manner as provided above.

24.160 Procedure Following Certificate Denial.

If no certificate is issued, the applicant and the Preservation Commission shall enter into negotiations to develop a plan whereby modifications in the application would enable the Preservation Commission to issue a certificate under the criteria listed above and compatible with the guideline for preservation in the particular designation ordinance. If the proposed work involves demolition of all or a significant portion of a landmark or property within a landmark district or involves construction upon open areas of a landmark or within a landmark district and no acceptable plan is negotiated and approved by the applicant within three months of the Preservation Commission's decision not to issue a certificate, the county may proceed by eminent domain proceedings to acquire the landmark or the affected property within the landmark district, but if the county does not initiate proceedings within ninety (90) days, the Planning Director shall issue a certificate of "allowance," permitting the applicant to proceed with the work as proposed in the application. If the proposed work on a landmark or in a landmark district is other than the above and no acceptable plan is negotiated and approved by the applicant within three months of the Preservation Commission's decision not to issue a certificate, the Planning Director shall issue a certificate of "allowance," permitting the applicant to proceed with the work as proposed

in the application.

24.170 Hazardous Structures.

The Planning Director shall issue a certificate of "allowance on the ground of hazardous conditions" for razing a structure or other work if the Building & Safety Director has determined that the landmark or structure within the landmark district poses an immediate hazard to human health and safety. However, no owner shall by deliberate acts or deliberate neglect allow a landmark or property within a landmark district to become hazardous to human health and safety with the intent of then obtaining such permit.

24.180 Appeal.

Any County Board member or any person aggrieved by any order, approval, disapproval, or other decision issued by the Preservation Commission, the Planning Director, or the Planning Commission may appeal such order, approval, disapproval, or other decision to the County Board by filing a written appeal with the County Clerk within thirty (30) days of such order. Such appeal shall fully state the order, approval, disapproval, or other decision appealed from, the date thereof, and the facts of the matter.

The County Clerk shall refer the appeal to the County Board, which shall fix within thirty (30) days a reasonable time for the hearing. Notice of the time, place, and purpose of such hearing shall be published in a daily newspaper having a general circulation in Lancaster County by the County Clerk and shall be mailed by certified or registered mail to the appealing party not less than eight (8) days prior to the date of hearing. In exercising its appellate jurisdiction, the order approval, disapproval or other decision appealed from shall be deemed advisory and the County Board may in conformance with the provisions of this title make such decision as ought to be made. In making a determination, the County Board may request information and recommendations from any department of Lancaster County.
