TO WHOM IT MAY CONCERN,

This letter identifies Cellebrite as only provider and deliverer of the Cellebrite UFED Premium Service, including UFED Premium bulk actions purchases and UFED Premium software renewal support. No resellers are authorized to sell or distribute the UFED Premium Service.

Cellebrite Inc., established in 1999 and based in Parsippany, NJ, is incorporated in the state of Delaware. Cellebrite Inc. supports customers and users in the US, Canada and Mexico.

The UFED is a mobile forensics extraction, decoding, and analysis tool that extracts logical, file system, and physical data from mobile devices (i.e., smartphones, cell phones, tablets, GPS units, SIM cards, memory cards, and USB devices), including live and deleted data, contacts, phone numbers, call logs, text messages, SMS messages, app data (social network and other), location data, pictures, videos, and voice messages.

UFED technology provides digital forensic lab examiners, investigators, field personnel, and first responders with the capability to collect, protect and act decisively on mobile device data with the speed and accuracy a situation demands. Our competitive advantages include:

- **Large, Established User Community.** Since 2007, Cellebrite has deployed more than 40,000 UFEDs in 100+ countries to support law enforcement, intelligence services, border patrols, military forces, public safety agencies and commercial organizations.
- **Industry's Broadest Device & App Support.** Cellebrite has established collaborative business relationships with original equipment manufacturers (OEMs) and wireless carriers worldwide. These global partners send us more than 100 new handsets per month - most prior to actual consumer market release. This allows Cellebrite Mobile Forensics to develop mobile forensics support for new devices prior to our competition. We retain more than 8,000 mobile phones at our company headquarters for ongoing innovation and support.
- **Forensically Sound Evidence Every Time.** Unlike competitors' "black box" third-party boot loaders, UFED uses custom-designed, read-only boot loaders, which ensure forensically sound file system and physical extractions
- **Technology and Research and Development (R&D) Leadership.** Cellebrite provides the mobile forensic industry's most comprehensive Android, Apple iOS, Blackberry, and Windows Mobile support. Cellebrite has a staff of 250+ engineers—the most of any mobile forensics solution provider. We are committed to investing in the ongoing R&D to innovate around customer and market needs.
- **Best-in Class Training Ensures a Repeatable, Reproducible Mobile Forensics Process.** Open to all user levels, from beginners to advanced, Cellebrite certification training provides hands-on experience with Cellebrite products and applications, delivering the tools and knowledge required for evidence collection data analysis, searching, and reporting.
- **Physical Extraction Using Bootloader Method with Lock Bypass.** Cellebrite supports physical extraction while bypassing passwords, passcodes, and pattern locks from more than 4,500 different device types, including Android (900+ devices from HTC, Huawei, LG, Motorola, and Samsung); Apple iOS; and Windows Phone (Nokia and Lumia).

Sincerely,

Gregg Weinberger
