SUBLETTING OR ASSIGNMENT OF THE CONTRACT

The Contractor's attention is directed to Section 108.01 of the Standard Specifications, Sections 108.01 Paragraphs 7 and 8 will be considered null and void.

All other portions of Section 108.01 will be considered part of the contract agreement.

LIST OF SUBCONTRACTORS

The Contractor will furnish and submit to the County a list of Subcontractors he proposes to use on the project. The list will also indicate the items of work which each Subcontractor is expected to complete. This list will be submitted at the pre-construction conference.

INDEPENDENT CONTRACTOR

It is the express intent of the parties that this Agreement shall not create an employer-employee relationship, and the Contractor, or any employees or other persons acting on behalf of the Contractor in the performance of this Agreement, shall be deemed to be independent contractor(s) during the entire term of this Agreement or any renewals thereof. It is agreed between the parties that the designated staff shall at all times continue to be employees of the Contractor for the duration of the Agreement. The Contractor shall be responsible for all salary and benefits payable under this Agreement and the Contractor's employees shall not be entitled to any salary from the County or to any benefits made to County Employees, including, but not limited to, overtime, vacation, retirement benefits, workers' compensation, sick leave or injury leave. The Contractor will furnish and submit to the County a list of suppliers of construction products he proposes to use on the project. (i.e. ready mixed concrete, pre-cast concrete products, culverts, asphalt products, etc...)

The Contractor need NOT specify where he plans to obtain incidental items as they must be selected from the current State of Nebraska Department of Roads pre-approved products list. Said list will be submitted at the pre-construction conference.

UTILITIES

GENERAL NOTES

The location of all aerial and underground utility facilities may not be indicated in these plans. Underground utilities whether indicated or not, will be located and flagged by the utilities at the request of the contractor. No excavation will be permitted in the area of underground utility facilities until such facilities have been located and identified to the satisfaction of all parties and then only with extreme care to avoid any possibility of damage to the utility facility.

The Contractor should request a utility status update at the project pre-construction conference, and/or prior to starting work. Any utility adjustments or interruption of service for the convenience of the Contractor shall be the sole responsibility of the Contractor.

All utility rehabilitation will be accomplished prior to or concurrent with construction.

To arrange for utilities to locate and flag their underground facilities, contact Diggers Hotline of Nebraska at 1-800-331-5666 or dial 811.

The Contractor's attention is directed to Paragraph 1, subsection 201.1 of the NDOT 2017 Standard Specifications for Highway Construction relative to the removal of poles to or beyond the Right of Way line and the lines indicating the limits of construction. If the Contractor desires the further removal of poles beyond the Right of Way lines to the limits of construction and their replacement to facilitate construction operations the entire expense for this movement and replacement shall be borne by the Contractor alone. An estimate of cost for the work described above may be obtained at the office of the Chief Engineer of the utility involved.

CONSTRUCTION SITE CONTROL

GENERAL

To the extent permitted by law, the County relinquishes control of the construction site to the Contractor and its Subcontractors during the period of construction. The construction, placement of barricades, and posting of warning signs in the area of construction will be the responsibility of the Contractor. This shall include the placement of construction equipment and any obstacles which are created as a result of the construction project. The placement of barricades and warning signs shall be in compliance with the current edition of the Manual on Uniform Traffic Control Devices and the 2017 Edition of the Standard Specifications of Highway Construction of the State of Nebraska. The placement of such barricades and signs shall be reviewed by the County Engineer's Office prior to commencement of the project to ensure compliance. To the extent permitted by law, the Contractor expressly accepts control of the construction site, such control shall include, but not be limited to, barricades, signs, road crossing, construction equipment and any obstacles created during construction of the project.

The Contractor will be required to give the Project Engineer forty-eight (48) hour notice prior to commencing work at any site on the Contract.

All barricades, construction signs and non-standard signs required by the Barricade Plan, Detour Plan, or Lane Closure Plan will be properly erected prior to commencing work at a particular site.

The Contractor may, upon giving the proper notice, close the road or traffic lane and begin work on the Contract. Once work has begun at a particular site, the work will be pursued vigorously to completion. The Contractor will maintain an adequately sized work force supported by the necessary equipment every working day until all work at the site is completed and the road or traffic lane re-opened to traffic.

The Contractor will not be permitted to have more than two site(s) milled at a time without the consent of the Project Engineer. Paving operations must be started prior to starting milling at a third site.

USE OF EASEMENT AND RIGHT-OF-ENTRY DURING THE WORK

The Contractor shall have the right to enter the property shown on the plans to accomplish the work in this Contract. It is the intent of this specification to limit the Contractor's use of the existing and new right-of-way, temporary and permanent easements, or right-of-entry areas to those portions actually required to perform the work under this Contract as directed by the Project Engineer. The Contractor will not be permitted to disturb those areas which are not directly related to work required under the Contract. The Project Engineer will have the sole authority to determine what portions of the property may be disturbed.

TRAFFIC CONTROL

Section 104.04 (3.) of the Standard Specification is null and void and is replaced by the following:

The Contractor will barricade and sign the project and detour in accordance with the Plans included in these Special Provisions. The Contractor will maintain both the barricades and construction signs throughout the duration of the project.

PROVISIONS FOR TRAFFIC

The Contractor will at all times, to the extent practicable, provide facilities for continuous uninterrupted egress and ingress to and from the nearest intersecting public roads or streets for local traffic which has its origin or destination within the limits of the project.

In the instances where road closure is not permitted (lane closure only) the Contractor will conduct all construction operations such that the warning signs and traffic control devices may be removed or laid down allowing the traffic lane to be safely re-opened to traffic each evening.

Temporary approaches and/or crossings shall be provided and maintained in a safe condition by the Contractor. This work will not be paid for directly, it will be considered subsidiary to items of work for which direct payment is made.

BARRICADES

All barricades and sign supports furnished under this specification will be compliant with the National Cooperative Highway Research Program (NCHRP) Report #350 (Test Level -3) and the Manual on Uniform Traffic Control Devices.

The barricades will be provided by the Contractor in accordance with the Barricade Plan for each site as indicated in the plans for the project or as directed by the Project Engineer. All barricades furnished shall be Type II or Type III and will be equipped with Type "A" flashing lights.

All barricades required by the Barricade Plan or the Detour Plan will be properly erected prior to any work beginning at the construction site. Maintenance of and payment for barricades will be in accordance with *Subsection 422.04* of the *Standard Specifications*.

Once work on the project site(s) has been completed, the Project Engineer will direct the Contractor to pick up and remove the barricades, construction signs and the appurtenances thereto. The Contractor or his subcontractor will perform the removal work within five (5) calendar days. If in the event the removal is not done within the time period specified, Lancaster County forces will remove and store, at the nearest maintenance facility, the items described above. A fee of \$50.00/hour for each hour will be charged for the removal expense incurred by County forces. The expense will be reduced from any payments due the Contractor.

CONSTRUCTION SIGNS

All construction signs furnished under this specification will be compliant with the National Cooperative Highway Research Program (NCHRP) Report #350 (Test Level - 3).

The construction signs will be provided by the Contractor in accordance with the "Barricade Plan," the "Detour Plan," or as directed by the Project Engineer. Each construction site will be barricaded; however, not all sites will have a designated detour route or a detour plan.

The work will include furnishing each sign regardless of size or message. All signs furnished shall be reflectorized with a material that has a smooth, sealed outer surface which will display approximately the same size, shape, and color both day and night.

All signs furnished for use in work areas or on detour routes designated for the project shall meet all applicable standards and specifications prescribed in Parts II and V and Part VI of the latest edition of the *Manual On Uniform Traffic Control Devices* (M.U.T.C.D.). See the "Detour Plans" attached to *Special Provisions*.

It is the intent of this specification that the construction signs specified herein be fastened to the Type III barricades or 4" x 4" wooden posts of adequate length as shown on the plans or called for in the *Special Provisions*. If in the opinion of the Project Engineer this method of erection proves unsatisfactory, the Contractor will be required to provide the necessary sign supports and fasteners at no additional cost. All construction signs and non-standard signs required by the barricade plan or the detour plan will be erected prior to any work beginning at the construction site.

Payment for construction signs will be measured by the number of calendar days each sign remains in use on the project regardless of the size, type, mounting method, or message appearing on the sign. The unit for this work shall be known as a "Sign Day". This price shall be full and complete compensation for furnishing all labor, material, equipment, and other incidentals necessary to provide, erect, maintain, repair, and remove construction signs.

The County will supply non-standard signs to be attached to posts, Type II or Type III barricades by the Contractor to aid in the control of traffic during the work. The Contractor shall remove and return the signs to the County upon completion of the work. The installation, maintenance, and removal of non-standard signs will not be paid for directly but will be subsidiary to the items for which direct payment is made.

FLAGGER

The Contractor will furnish the services of a flagger if directed to do so by the project engineer. Flagging services will be provided in accordance with *Section 422.03 Paragraph 12 of the Standard Specifications*. The Contractor will be compensated in accordance with *Section 422.04 Paragraph 3 of the Standard Specifications*. The Contractor will be compensated at the contract unit price per half day or day as specified in the Proposal, regardless of the site to which the flagger is deployed.

HOT IN-PLACE RECYCLING
 (E-1-0915)

DESCRIPTION

This work shall consist of constructing a Hot In-Place base course to a depth of two inches. Produce this base course by uniformly heating and milling the existing bituminous pavement, then mixing the reclaimed bituminous pavement material, rejuvenator oil with emulsified asphalt. Spread and compact the mixture in accordance with these specifications, as shown on the plans or directed by the Engineer.

MATERIALS

The milled bituminous material shall meet the following gradation requirements:

Sieve Size Percent Passing 1.0 inch (25.0 mm) 100

The Emulsified Asphalt to be used shall be a polymer modified Asphalt Rejuvenating Agent (ARA) with the base asphalt binder modified with a minimum of 3.0 percent styrene-butadiene styrene polymer by weight of base binder. ARA shall not contain any used oils that have not been re-refined or reprocessed. ARA emulsified asphalt shall meet the requirements listed in the table below.

^b AASHTO T 59 shall be modified to maintain a 350° F ± 5° F maximum temperature for 20 minutes.

MIX DESIGN

The Contractor shall core the existing roadway to obtain existing bituminous for mix design. The Contractor shall contact the Engineer prior to collecting the RAP samples so that LCED personnel may be present when doing this work.

Approximately 1.00 percent asphalt emulsion, based on the mass of dry RAP, shall be added to the mixture. Actual percent used on the project will be established by the approved mix design.

The Contractor shall have a mix design performed by a testing laboratory familiar with this type of recycling and shall be verified by the LCED. A copy of the mix design shall be submitted to the LCED for approval 14 days prior to construction.

The mix design report shall provide a minimum of three points with different percentages of emulsified asphalt contents which provides the following criteria for each point:

Property	**Test Method	Limits
Air Voids at 30 gyrations, (%)	AASHTO T166, T209 & T312	Report
Tensile Strength, (psi min)	AASHTO T283	75
<i>Retained Strength based on cured stability, (% min)</i>	AASHTO T283	70
<i>Rut Resistance, (mm max)</i>	AASHTO TP-63	Report
<i>Density (pcf)</i>	AASHTO T166	Report

**The RAP representing the depth of the surface recycling will be broken down to a maximum top size particle of 1 inch (25 mm). The compaction temperature range for AASHTO T312 is 200°F to 250°F (93°C to 121°C). Perform all tests on specimens that are compacted to 30 gyrations, thus the air void criteria stated in AASHTO T283 is waived.

EQUIPMENT

Hot In-Place Recycling equipment shall consist of a unit or a combination of units, which will satisfactorily perform the following requirements:

The Contractor shall be required to demonstrate that the equipment can meet the rate, depth and recycling operations prior to full operations.

The equipment shall uniformly heat the existing surface to a temperature high enough to remove excess moisture and allow dislodging of material to a depth of 2.0 inches, without breaking the aggregate particles. Heating shall be accomplished without burning or charring the existing pavement, without producing undesirable pollutants or damaging adjacent vegetation.

The milling units shall be capable of milling the asphalt pavement to a depth shown in the plans and 12 feet (3.66 meters) wide, unless otherwise specified. It shall have automatic controls capable of maintaining uniform grade and cross-slope and process the RAP to meet the specified gradation.

The emulsified asphalt shall be applied to the heated/milled material at a uniform rate as described in the approved mix design or as directed by the Engineer. Emulsified asphalt shall not vary more than 0.02 gallon per square yard from the mix design. The storage unit shall be able to maintain the emulsified asphalt within the temperature range specified by the supplier prior to mixing with the heated/milled material.

Positive means shall be provided for calibration of the weighing and metering devices.

CONSTRUCTION REQUIREMENTS

The Contractor shall ensure that a technical representative from the bituminous material supplier is on the job site at the beginning of the project to ensure proper asphalt emulsion performance. The Contractor shall also ensure that the technical representative is available to check on the project and make adjustments to the asphalt emulsion formulation as needed.

The existing pavement surface to be recycled shall be cleaned of all dirt, fabric, oils or any other objectionable materials before beginning the hot in-place surface repaving. Hot In-Place Recycling shall not take place when the roadway surface is wet, frozen or if the weather conditions prevent proper handling, finishing and compacting of the bituminous mixture. The recycling process shall not take place until the minimum ambient air temperature is 50°F and the minimum surface temperature is 55°F. The above requirements may be waived, but only in writing by the Engineer.

The existing pavement surface shall be evenly heated, milled and reworked to a minimum depth of 2.0 inches from the lowest point in the pavement surface, and to the width shown on the plans. The surface temperature of the existing pavement shall not exceed 475°F, and the recycled mix temperature shall not be less than 190°F. The heating operation shall extend at least 2.0 inches beyond the width of scarification on both sides. On the second pass, the recycling shall overlap the previously recycled mat by at least 2.0 inches. Transverse temperature readings shall be periodically taken at 2 foot intervals measured transversely across the recycled area. These measurements shall fall within 30°F of each other, if the difference in readings is greater than 30°F, the Contractor shall suspend operations and make necessary adjustments prior to proceeding.

The recycled mix shall be placed with an asphalt paving machine equipped with a pickup attachment. The asphalt paver and pickup machine shall operate separately and not be connected to the heating and milling units. The Contractor shall maintain a constant speed on the lay down operation. The recycled material shall be spread and finished true to crown and grade, in one lift with a bituminous paver meeting the requirements of Section 503 or other equipment approved by the Engineer.

The surface will be checked with a 10 foot straight edge (provided by the Contractor). The maximum allowable surface variation is 1/8" in 10 foot. The Engineer may evaluate any surface irregularities caused by workmanship with a 10-foot (3 m) straight edge. The maximum allowable deviation will be 1/8 inch (3 mm) in 10 feet (3 m) measured longitudinally. If the deviation exceeds 1/8 inch (3 mm) in 10 feet (3 m), then the area shall be corrected by grinding with a machine equipped with diamond blades with spacers until the deviation is less than 1/8 inch (3 mm) in 10 feet (3 m) or the Engineer may authorize a \$500.00 deduction for each irregularity.

The LCED will check the thickness of the recycling process immediately behind the paver with a maximum of one test per lane/station. The Engineer shall determine the location of the testing not to exceed the one test per lane/station. The Contractor shall provide the Engineer with a probe to measure the thickness of the mat. The probe will be of such a design and length to facilitate the Engineer the ability to check the mat thickness behind the paver without walking on the mat. The moving average of 3 consecutive tests shall equal or exceed the contract depth.

Any three consecutive tests can be considered a moving average. If the 3-point moving average is less than the contract depth, LCED will assess a price reduction using the Equation- 1

The price reduction will correspond to those segments within the 3-point moving average that were deficient in depth. If the State determines that recycling to the contract depth would be detrimental to the project the unit price will be negotiated for the reduced depth before proceeding with the project.

Equation 1: $P = X (S) [1-M/T]$

Where: P is the Penalty

S is the number of Stations M is the measured depth

T is the Plan Depth

X is the unit bid price for Hot-In-Place Recycling plus the design emulsified asphalt cost per station of roadway (52.8 stations per mile/24 ft wide).

Note: The Contractor is being penalized for the full 24 ft width of roadway when out of specification.

If the next two depth checks are below the plan thickness after a failing moving average, the Contractor shall stop production and evaluate the process with the Engineer. Adjustments to the process shall be made to the satisfaction of the Engineer before production resumes.

COMPACTION AND DENSITY REQUIREMENTS

Contractor personnel shall monitor the processed base density with non-destructive density gauge. The density gauge and testing method will be approved by the engineer. As a minimum, one density determination will be taken every 0.5 miles (0.8 kilometers).

Contractor will cut correlation density cores every density determination at location designated by the Engineer.

Compaction and density requirements for this project shall be a minimum of 97 percent of the target density obtained on a test strip compacted under the following conditions: At least two test strips shall be completed to determine the target density and optimum sequence of rollers. These test strips will remain in place as part of the completed work. The depth of the lift shall be representative of the project.

Target density shall be the highest density achieved on the test strip using the rolling procedure approved by the Engineer. The rolling procedure, used on the test strip, shall have a minimum of six roller coverages. The Contractor will use a non-destructive density gauge data to establish a density growth curve for each procedure. Rolling shall be discontinued when four consecutive coverages of the rollers fail to increase the density 1 pound per cubic foot (16 kg per cubic meter). Maximum density shall be achieved before the mat temperature drops below 160°F. The Contractor shall stop operations any time the density is not being achieved and take corrective action.

The Contractor shall have, as a minimum, the following self-propelled rollers for use on the project: a double drum vibratory steel roller. The vibratory roller shall meet the requirements of Subsection 503 of the Standard Specifications and also have a minimum operating weight of 18,000 pounds (8165 kg) and a drum width of not less than 66 inches (1.68 meters). The vibratory roller may be used in the static mode. The rollers shall have watering systems to keep drums wetted as required to prevent mixture pickup.

When there is a significant change in mix proportions, weather conditions or other controlling factors, the Engineer may require construction of another test strip(s) to check target density.

CORRELATION TESTING

All correlation testing of the quality control program will be performed by an independent testing lab selected by the County. The County will bear the cost of all correlation testing. The Contractor will not be paid directly for the work described above. This work will be considered subsidiary to items of work for which direct payment is made.

CHIP SEAL

SPECIFICATIONS

Chip Seal to be placed on a prepared surface. Contractor shall insure surface is properly prepared before Chip Seal application.

The contractor will apply CRS-2P Oil at the rate of 0.30 to 0.36 gallon per-square yard.

The Contractor will apply expanded shale chip seal aggregate at the rate of 9-12 lbs. per-square yard.

The Contractor will use Nebraska Department of Transportation State approved procedures, equipment, and materials for this project.

CHIP SEAL TEMPORARY PAVEMENT MARKING

Paragraph 3a. of Subsection 424 (3a) in the Standard Specifications is void and superseded by the following:

To provide for the safety of the traveling public, the Contractor will be required to place temporary yellow reflectorized traffic centerline delineation on two-lane, two-way roads. On multi-lane roads, when traffic is proceeding in the same direction on both sides of the line, the centerline shall be white. The reflectorized material used for the centerline delineation shall be chip seal markers similar to those supplied by Renco, Inc. or Dapco (Davidson Plastics Co.). The temporary lane markers shall be applied on the approximate centerline at 40-foot intervals on the straightaway and at 20-foot intervals on curves. The markers shall be applied to a clean dry road surface before any asphalt materials are applied. The markers shall be applied as directed by the manufacturer. After the chip seal is applied on the initial lane, the plastic cap shall be removed on every other marker. The plastic cap shall be removed on the remaining markers after the chip seal is applied on the adjacent lane.

Temporary pavement marking shall be measured by the station from the beginning to the end of the work and shall be paid for at the contract unit price per Station for the item "Temporary Broken Lines". This price shall be full compensation for furnishing and installing the chip seal.

SPECIAL PROSECUTION AND PROGRESS

(Contaminated Work, Internal Liquidated Damage)

Any pavement surface that is contaminated by the Contractor with petroleum products, solvents, or other deleterious materials may be subject to repair at no cost to the Department. Any bituminous mixture that is contaminated by the Contractor with petroleum products, solvents, or other deleterious materials may be rejected. If the bituminous mixture is already incorporated in the work, it shall be removed and replaced by the Contractor at no additional cost to the Department. In addition, for each occurrence, the Contractor will be:

ARMOR COAT AND CHIP SEALS
(E-12-711)

CHIP SEAL

The chip seal emulsion shall be CRS-2P and shall meet the requirements shown in 2017 NDOT Standard Specifications for Highway Construction.

The Chip Seal aggregate shall be expanded shale.

The expanded shale aggregate application rate will be 12 pounds per square yard. The emulsified asphalt application rate will be from 0.30 to 0.36 gallons per square yard. The Engineer may adjust these rates as a result of the test strip or field results.

The Contractor will also provide traffic cones (minimum 18" tall) at centerline of road spaced approximately 50' apart to protect the work zone.

ACCOMMODATION OF TRAFFIC FOR CHIP SEAL

The Contractor shall limit the chip seal work performed on this project to one traffic lane per worksite, with the other lane used for the accommodation of traffic through the worksite.

The traffic movements through the worksite(s) will be controlled in accordance with the *Traffic Control Plan* included in the specifications. The Contractor may restrict the traveling public to one-way traffic at the worksite(s). During all of the time traffic is restricted to one lane, at least one flagger shall be provided by the Contractor at each end of the worksite to direct the orderly movement of the traffic.

The Contractor will also provide traffic cones (minimum 18" tall) at centerline of road spaced approximately 50' apart to protect the work zone. No direct payment will be made for furnishing and installing traffic cones but shall be subsidiary to items for which direct payment is made.

The maximum length of a worksite shall be one mile. In the event that the Contractor elects to utilize more than one worksite simultaneously, the worksites must be in the same traffic lanes and a minimum, of one mile separation between worksites shall prevail.

Any changes or exceptions to the control of traffic outlined in these Special Provisions will need to be approved by the Engineer.

Instructions

Who May Issue a Resale Certificate. Purchasers are to give the seller a properly completed Form 13, Section A, when making purchases of property or taxable services that will subsequently be resold in the purchaser's normal course of business. The property or services must be resold in the same form or condition as when purchased, or as an ingredient or component part of other property that will be resold.

Who May Issue an Exempt Sale Certificate. Form 13, Section B, may be completed and issued by governmental units or organizations that are exempt from paying Nebraska sales and use taxes. See this list in the [Nebraska Sales Tax Exemptions Chart](#). Most nonprofit organizations are **not** exempt from paying sales and use tax. Enter the appropriate number from "Exemption Categories" (listed below) that properly reflects the basis for your exemption.

For additional information about proper issuance and use of this certificate, please review [Reg-1-013. Sale for Resale – Resale Certificate](#), and [Reg-1-014. Exempt Sale Certificate](#).

Contractors. Contractors complete Form 13, Section C, part 1 or part 2 based on the option elected on the [Contractor Registration Database](#).

To make tax-exempt purchases of building materials and fixtures, Option 1 or Option 3 contractors must complete Form 13, Section C, Part 1. To make tax-exempt purchases of building materials and fixtures pursuant to a construction project for an exempt governmental unit or an exempt nonprofit organization, Option 2 contractors must complete Form 13, Section C, Part 2. The contractor must also attach a copy of a properly completed [Purchasing Agent Appointment and Delegation of Authority for Sales and Use Tax, Form 17](#), to the Form 13, and both documents must be given to the supplier when purchasing building materials. See the [contractor information guides](#) and [Reg-1-017. Contractors](#), for additional information. Also, see the Important Note under "Exemption Categories" number 3.

When and Where to Issue. The Form 13 must be given to the seller at the time of the purchase to document why sales tax does not apply to the purchase. The Form 13 must be kept with the seller's records for audit purposes.

Sales Tax Number. A purchaser who is engaged in business as a wholesaler or manufacturer is not required to provide an ID number when completing Section A. Out-of-state purchasers may provide their home state sales tax number. Section B does not require a Nebraska ID number when exemption category 1, 2, or 5 is indicated.

Fully Completed Resale or Exempt Sale Certificate. A fully completed resale or exempt sale certificate is proof for the retailer that the sale was for resale or is exempt. For a resale certificate to be fully completed, it must include: (1) identification of the purchaser and seller, type of business engaged in by the purchaser; (2) sales tax permit number; (3) signature of an authorized person; and (4) the date of issuance.

For an exempt sale certificate to be fully completed, it must include: (1) identification of purchaser and seller; (2) a statement that the certificate is for a single purchase or is a blanket certificate covering future sales; (3) a statement of the basis for exemption, including the type of activity engaged in by the purchaser; (4) signature of an authorized person; and (5) the date of issuance.

Penalties. Any purchaser who gives a Form 13 to a seller for any purchase which is other than for resale, lease, or rental in the **normal** course of the purchaser's business, or is not otherwise exempted from sales and use tax under the Nebraska Revenue Act, is subject to a penalty of \$100 or ten times the tax, whichever is greater, for each instance of presentation and misuse. In addition, any purchaser, or their agent, who fraudulently signs a Form 13 may be found guilty of a Class IV misdemeanor.

Exemption Categories

(Insert appropriate number from the list below in Section B)

1. Governmental units, identified in [Reg-1-072. United States Government and Federal Corporations](#); and [Reg-1-093. Governmental Units](#). Governmental units are not assigned exemption numbers.

Sales to the U.S. government, its agencies, instrumentalities, and corporations wholly owned by the U.S. government are exempt from sales tax. However, sales to institutions chartered or created under federal authority, but which are not directly operated and controlled by the U.S. government for the benefit of the public, generally are taxable.

Purchases by governmental units that are **not** exempt from Nebraska sales and use taxes include, but are not limited to: governmental units of other states; sanitary and improvement districts; rural water districts; railroad transportation safety districts; and county historical societies.

2. Purchases when the intended use renders it exempt. See [Nebraska Sales Tax Exemption Chart](#).
3. Purchases made by organizations that have been issued a [Nebraska Exempt Organization Certificate of Exemption](#) (Certificate of Exemption). [Reg-1-090. Nonprofit Organizations](#); [Reg-1-091. Religious Organizations](#); and [Reg-1-092. Educational Institutions](#), identify these organizations. These organizations are issued a Certificate of Exemption with a state ID number which must be entered in Section B of Form 13.

Important Note: Nonprofit educational institutions must be accredited regionally or nationally and have their primary campus in Nebraska to be exempt from sales and use tax. Also nonprofit organizations providing any of the types of health care or services that qualify to be exempt must be licensed or certified by the Nebraska Department of Health and Human Services (DHHS) to be exempt from sales and use taxes. There is no sales and use tax exemption prior to these entities being accredited, licensed, or certified. They CANNOT issue either a [Resale or Exempt Sale Certificate, Form 13](#), or a [Purchasing Agent Appointment, Form 17](#), to any retailer or contractor relating to purchases of building materials for construction or repair projects performed prior to being accredited, licensed, or certified. After an entity becomes accredited, licensed, or certified upon completion of the construction project, it may submit a [Form 4](#).

Nonprofit **health care organizations** that hold a Certificate of Exemption are exempt for purchases for use at their facility, or portion of the facility, covered by the license issued under the Nebraska Health Care Facility Licensure Act. Only specific types of health care facilities and activities are exempt. Purchases of items for use at facilities that are not covered under the license, or for any other activities that are not specifically exempt, are taxable. The exemption is not for the entire organization that offers different levels of health care or other activities, but is limited to the specific type of health care that is exempt. Purchases for non-exempt types of health care are taxable.

4. Purchases of motor vehicles, trailers, semitrailers watercraft, and aircraft used predominately as common or contract carrier vehicles; accessories that physically become part of the common or contract carrier vehicle; and repair and replacement parts for these vehicles. The exemption ID number must be entered in Section B of the Form 13. An individual or business that has been issued a common or contract carrier certificate of exemption may only use it to purchase those items described above prior to the expiration date on the certificate. The certificate of exemption expires every 5 years. (See [Nebraska Common or Contract Carrier Information Guide](#)).
5. Purchases of manufacturing machinery and equipment made by a person engaged in the business of manufacturing, including repair and replacement parts or accessories, for use in manufacturing. (See [Reg-1-107. Manufacturing Machinery and Equipment Exemption](#)).
6. Occasional sales of used business or farm machinery or equipment productively used by the seller as a depreciable capital asset for more than one year in his or her business. The seller must have previously paid tax on the item being sold. The seller must complete, sign, and give the Exempt Sale Certificate to the purchaser. (See [Reg-1-022. Occasional Sales](#)). The Form 13 must be kept with the purchaser's records for audit purposes.

WHO MUST FILE. Any governmental unit or organization that is **exempt** from sales and use tax may appoint as its agent a prime contractor to purchase building materials and/or fixtures that will be annexed to property that belongs to or will belong to the governmental unit or exempt organization pursuant to a construction contract with the governmental unit or exempt organization. The appointment of the prime contractor as its agent is completed by issuing a Purchasing Agent Appointment and Delegation of Authority for Sales and Use Tax, Form 17, to the prime contractor. The Form 17 is required to be given to the contractor **BEFORE** he or she annexes building materials. The governmental unit or exempt organization must identify the project (e.g., east wing, chapel construction, or new school auditorium). Most

nonprofit organizations are **NOT** exempt from sales tax in Nebraska. In addition, not all governmental units are exempt from Nebraska sales tax. Refer to Contractor Information on our Web site for additional information on exempt entities. A contractor can confirm the exempt status of a governmental unit or exempt organization by contacting the Nebraska Department of Revenue.

The exemption from the payment of the Nebraska and local option sales and use taxes only applies if the governmental unit or exempt organization directly, or through its contractor, pays for the building materials. **IMPORTANT NOTE:** When an organization that requires licensure in order to be exempt (i.e., nonprofit hospitals), but is not licensed at the time of the construction project, the exempt organization **CANNOT**

issue either a purchasing agent appointment or an exemption certificate. If the exempt organization becomes licensed upon completion of the project, it may apply for a refund of the tax paid or collected by the contractors.

WHEN TO FILE. A prime contractor engaging in a construction project with a governmental unit or exempt organization must receive a properly completed and signed Form 17 **BEFORE** any building materials are annexed. If Form 17 is not issued, the contractor must pay the sales and use taxes and the governmental unit or exempt organization may obtain a refund of the taxes paid by the contractor.

WHERE TO FILE. A copy of the completed form should be retained by the governmental unit or exempt organization issuing the Form 17. The original is to be retained by the prime contractor. Copies of this form must be made by the prime contractor for delegation purposes to any subcontractors working on the project identified on this form.

APPOINTMENT INFORMATION. Enter the dates the purchasing agent appointment will become effective and when it will expire. This appointment will not allow any purchases without payment of the tax by the prime contractor or subcontractor before the effective date or after the expiration date. The dates the delegation becomes effective and the expiration dates must be completed. The phrase "upon completion" or similar phrase is not acceptable as an expiration date. The governmental unit or exempt organization may need to issue another Form 17 if the project is not completed within the prior "effective" and "expiration" dates. Exempt organizations must enter their Nebraska Sales and Use Tax Exemption number.

DELEGATION OF PRIME CONTRACTOR'S AUTHORITY. The prime contractor may delegate his or her authority to act as the purchasing agent of the governmental unit or exempt organization to a subcontractor. The prime contractor must complete his or her copy of Form 17 for each subcontractor who is delegated authority to act as a purchasing agent. Reproductions of this delegation must be provided to the subcontractor, who must retain a copy for his or her records, and to the governmental unit or exempt organization.

Enter the dates the delegation of the subcontractor will become effective, when it will expire, and the portion of the project delegated. This delegation will not allow any purchases without payment of the tax by the subcontractor before the delegation date or after the expiration date. Any further delegation from a subcontractor to additional subcontractors must be delegated by providing a copy of the Form 17 that they received from the prime contractor and attaching it to a separate Form 17 with any further delegation to other subcontractors. The purchasing agent appointment is limited to the contractor's purchase of building materials and/or fixtures for the specific project and is only valid during the appointment dates shown on the Form 17.

EXEMPT SALE CERTIFICATE. A prime contractor who has been appointed to act as a purchasing agent by a governmental unit or exempt organization, and who hires a subcontractor operating as an Option 1 contractor, must provide to that subcontractor a completed copy of Form 17 and a Nebraska Resale or Exempt Sale Certificate, Form 13, with Section C,

Part 2, completed. The subcontractor will retain these forms in his or her records, and will not charge the contractor sales tax on any portion of the invoice involving the annexation of materials to the specific project identified on the Form 17. If these forms are not provided to the subcontractor operating under Option 1, the subcontractor must collect and remit sales tax on the charge for the separately stated building materials portion of the invoice. If the Option 1 subcontractor does not separately state the charge for the building materials from contractor labor, then the entire charge is taxable to the prime contractor.

Contractors operating under Option 2 (maintaining a tax-paid inventory) who have been issued a Form 17 from a governmental unit or an exempt organization, must furnish each vendor a copy of the Form 17 and a Form 13, completing Section C, Part 2, when purchasing building materials that will be annexed to real estate. Forms 13 and 17 must be retained with the vendor's and contractor's records for audit purposes. A contractor or subcontractor may reproduce copies of these documents which will be furnished to the vendors for each invoice or order made by them.

Invoices from vendors for the purchase of building materials by the contractor as purchasing agent, or the authorized subcontractor, must clearly identify that such purchase is for the specific Form 17 project.

CREDIT/REFUND OF SALES AND USE TAX. A contractor or subcontractor who has been appointed as a purchasing agent before any materials are annexed, may withdraw sales or use tax-paid materials from inventory that will be annexed to real estate or used to repair property annexed to real estate and receive a credit for the sales or use tax amount previously paid on those materials.

The contractor or subcontractor may take a credit either against his or her current tax liability, or file a Claim for Overpayment of Sales and Use Tax, Form 7, and receive a refund of the sales or use tax paid on those materials.

TOOLS, EQUIPMENT, AND SUPPLIES. The purchase, rental, or lease of tools, supplies, or equipment (i.e., scaffolding, barricades, machinery, etc.) by a contractor for use in the completion of an exempt project CANNOT be purchased tax free, even if the contractor has been issued a Form 17. These items do not become annexed to the real estate.

OPTION 1 CONTRACTOR ONLY. If an Option 1 contractor is the **only** contractor involved in performing work for a governmental unit or exempt organization, a Form 17 is NOT required. The Option 1 contractor must only obtain a Form 13, Section B, from the exempt project owner.

PENALTY. Any person who signs this document with the intent to evade payment of tax is liable for the sales and use tax, interest, and penalty, and may be found guilty of a misdemeanor.

AUTHORIZED SIGNATURE. The purchasing agent appointment must be signed by an officer of the exempt organization or proper government official. The delegation of prime contractor's authority must be signed by the owner, partner, corporate officer, or other individual authorized to sign by a power of attorney on file with the Nebraska Department of Revenue.

LANCASTER COUNTY

EMPLOYER CLASSIFICATION ACT INSTRUCTIONS

WHEREAS, there is concern over the inappropriate competitive advantages in the public bidding process for local publicly funded construction and delivery service contracts resulting from the misclassification of individuals performing construction labor services as "independent contractors" rather than "employees"; such "independent contractors" are commonly referred to as "1099 workers" due to the IRS form they receive rather than a W-4 which an employee receives;

WHEREAS, this mis-classification of such individuals as "independent contractors" rather than as "employees" eliminates any obligation to pay these individuals legally required minimum or overtime wages, to provide legally required workers' compensation insurance, to make unemployment insurance payments, to pay legally required employment and payroll taxes, and to provide any other health, pension, or benefit such individuals would typically receive if properly classified as employees;

WHEREAS, this mis-classification of individuals performing construction labor services for the contractor as "independent contractors" rather than "employees" is a violation of federal and state law, but is difficult to enforce once public construction or delivery service contracts have been bid, awarded, and entered into;

WHEREAS, the use of public funds to compensate contractors who unlawfully avoid their obligation to pay legally required minimum or overtime wages, to provide legally required workers' compensation insurance, to make unemployment insurance payments, to pay legally required employment and payroll taxes, and to provide any other health, pension, or benefit is not in the public interest; and

WHEREAS, the Employee Classification Act, *Neb. Rev. Stat. §§ 48-2901 to 48-2912* (effective July 15, 2010) provides that any contract entered into between a political subdivision and a contractor shall require that each contractor who performs construction or delivery service pursuant to the contract submit to the political subdivision an affidavit attesting that (1) each individual performing services for such contractor is properly classified under the Employee Classification Act, (2) such contractor has completed a federal I-9 immigration form and has such form on file for each employee performing service, (3) such contractor has complied with *Neb. Rev. Stat. § 4-114* requirements that the contractor register and use a federal immigration employment verification system to determine the work eligibility status of new employees physically performing services in the State of Nebraska, (4) such contractor has no reasonable basis to believe that any individual performing services for such contractor is an undocumented worker, and (5) as of the time of the contract, such contractor is not barred from contracting with the state or any political subdivision pursuant to *§ 48-2912 of the Employee Classification Act*.

NOW, THEREFORE, Lancaster County adopts the following policy as to the bid and award of contracts to contractors for construction and delivery services with Lancaster County;

The Purchasing Agent shall immediately include in the County's notice to bidders for construction contracts that all contractors submitting bids in response to the notice shall affirmatively certify to the Purchasing Agent that all individuals hired to perform construction or delivery labor services for the contractor under the contract shall be properly classified as employees and not as independent contractors if the individual does not meet the requirements of an independent contractor under federal and state law (including the requirements of the State of Nebraska Employee Classification Act), and that the contractor will comply with all legal obligations with respect to these employees (including, but not limited to , minimum and overtime pay, workers' compensation, unemployment compensation, and payment of federal and state payroll taxes). The notice to bidders shall further provide that contractors may use affidavits required pursuant to the Employee Classification Act for this purpose, but that a failure to make the affirmative certification to the Purchasing Agent shall render the bidder ineligible for award of the contract.

The Purchasing Agent shall immediately include the following provisions in contracts for construction or delivery services:

(1) Contractor agrees that each individual performing services for the contractor shall be properly classified as an employee and not as an independent contractor if the individual does not meet the requirements of an independent contractor under the State of Nebraska's Employee Classification Act and that contractor shall comply with all legal obligations with respect to the employee (including, but not limited to, minimum and overtime pay, workers' compensation, unemployment compensation, and payment of federal and state payroll taxes).

(2) Contractor understands and agrees that failure to classify each individual hired to perform services under the contract as an employee rather than as an independent contractor if the individual does not meet the requirements of an independent contractor under the State of Nebraska's Employee Classification Act and/or failure to comply with legal obligations with respect to the employee (including, but not limited to, minimum and overtime pay, workers' compensation, unemployment compensation, and payment of federal and state payroll taxes) shall be considered a breach of the contract and is a ground for rescission of the Contract by the County.

(3) Contractor additionally agrees to include the following provision in each subcontract entered into with a subcontractor as part of the contractor's contract with the County.

(a) Subcontractor agrees that each individual performing services for the subcontractor shall be properly classified as an employee and not as an independent contractor if the individual does not meet the requirements of an independent contractor under the State of Nebraska's Employee Classification Act and that subcontractor shall comply with all legal obligations with respect to the employee (including, but not limited to, minimum and overtime pay, workers' compensation, unemployment compensation, and payment of federal and state payroll taxes).

(b) Subcontractor understands and agrees that subcontractor's failure to properly classify individuals hired to perform services under the subcontract as employees and not as independent contractors if the individual does not meet the requirements of an independent contract under the State of Nebraska's Employee Classification Act and/or failure to comply with legal obligation with respect to the employee (including, but not limited to, minimum and overtime pay, workers' compensation, unemployment compensation, and payment of federal and state payroll taxes) shall be considered a breach of the contract and is a ground for rescission of the subcontract with the contractor.

(4) Contractor agrees that if subcontractor fails to or is suspected of failing to properly classify each individual hired pursuant to the subcontract as an employee and not as an independent contractor if the individual does not meet the requirements of an independent contractor under the State of Nebraska's Employee Classification Act and/or fails to comply with legal obligations with respect to the subcontractor's employees, the contractor shall take appropriate corrective action including, but not limited to, reporting the suspected violation of the State of Nebraska Employee Classification Act to the Nebraska Department of Labor or rescission of the subcontract by the contractor. Written notification of the corrective action shall be submitted to the Lincoln-Lancaster County Purchasing Department. Contractor understands and agrees that contractor's failure to take appropriate corrective action shall be considered a breach of the contractor's contract with the County and is a ground for rescission of the contract by the County.

(5) The County shall notify the Nebraska Department of Labor of any contractor or subcontractor it has determined is in breach of contract due to the terms of this order.

(6) Any contractor or subcontractor who shall have been determined by the Nebraska Department of Labor to have knowingly provided a false affidavit to the County under the State of Nebraska's Employee Classification Act shall be referred to the Purchasing Agent of the County who shall determine whether to declare such contractor or subcontractor an irresponsible bidder who shall be disqualified from receiving any business from the County for a stated period of time.

(7) This policy does not prohibit a contractor or subcontractor from hiring individuals to perform construction labor services as independent contractors, provided that the contractor's or subcontractor's use of such individuals as an independent contractor complies with the criteria found in subdivision 5 of *Neb. Rev. Stat. § 48-604* and is otherwise valid under federal and state law and is not intended to circumvent lawful obligations under federal and state law or county contractual requirements.

In the event the claim, damage, loss or expense is caused in part by the negligence of a party indemnified hereunder, the indemnification by the Contractor shall be prorated based on the extent of the liability of the party indemnified hereunder.
